The Foundations An Anatomy Of Philanthropy And Society:

The Foundations Ben Whitaker, 1979 The Foundations Ben Whitaker, 1974 Se trata de la primera investigación independiente acerca de las fundaciones en el mundo y de sus efectos en la sociedad Se estudian sus fines políticos y económicos y sus realizaciones Es un oportuno y agudo análisis de uno de los más interesantes y menos conocidos fenómenos de la sociedad actual Handbook on the Economics of Philanthropy, Reciprocity and Social Enterprise Stefano Zamagni, Luigino Bruni, 2013-01-01 The recent era of economic turbulence has generated a growing enthusiasm for an increase in new and original economic insights based around the concepts of reciprocity and social enterprise This stimulating and thought provoking Handbook not only encourages and supports this growth but also emphasises and expands upon new topics and issues within the economics discourse Original contributions from key international experts acknowledge and illustrate that markets and firms can be civilizing forces when and if they are understood as expressions of cooperation and civil virtues They provide an illuminating discourse on a wide range of topics including reciprocity gifts and the civil economy which are especially relevant in times of crisis for financial capitalism The Handbook questions the current phase of the market economy that arises from a state of anthropological pessimism Such anthropological cynicism is one of the foundations of the contemporary economic system that is challenged by the contributors This highly original and interdisciplinary Handbook will provide a fascinating read for academics researchers and students across a wide range of fields including economics public sector economics public policy and social policy **The Future of Philanthropic Foundations** G. E. W. Wolstenholme, Maeve O'Connor, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world *Foundations of the American Century* Inderjeet Parmar, 2012-03-20 Inderjeet Parmar reveals the complex interrelations shared mindsets and collaborative efforts of influential public and private organizations in the building of American hegemony Focusing on the involvement of the Ford Rockefeller and Carnegie foundations in U S foreign affairs Parmar traces the transformation of America from an isolationist nation into the world's only superpower all in the name of benevolent stewardship Parmar begins in the 1920s with the establishment of these foundations and their system of top down elitist scientific giving which focused more on managing social political and economic change than on solving modern society's structural problems Consulting rare documents and other archival materials he recounts how the American intellectuals academics and policy makers affiliated with these organizations institutionalized such elitism which then bled into the machinery of U S foreign policy and became regarded as the essence of modernity America hoped to replace Britain in the role of global hegemon and created the necessary political ideological military and institutional capacity to do so yet far from being objective the Ford Rockefeller and Carnegie

foundations often advanced U S interests at the expense of other nations Incorporating case studies of American philanthropy in Nigeria Chile and Indonesia Parmar boldly exposes the knowledge networks underwriting American dominance in the twentieth century *The Routledge Companion to Nonprofit Management* Helmut Anheier, Stefan Toepler, 2020-04-08 Over the past three decades or so the nonprofit voluntary or third sector has undergone a major transformation from a small cottage industry to a major economic force in virtually every part of the developed world as well as elsewhere around the globe Nonprofit organizations are now major providers of public services working in close cooperation with governments at all levels and increasingly find themselves in competition with commercial firms across various social marketplaces This transformation has come with ever increasing demands for enhancing the organizational capacities and professionalizing the management of nonprofit institutions The Routledge Companion to Nonprofit Management is the first internationally focused effort to capture the full breadth of current nonprofit management research and knowledge that has arisen in response to these developments With newly commissioned contributions from an international set of scholars at the forefront of nonprofit management research this volume provides a thorough overview of the most current management thinking in this field It contextualizes nonprofit management globally provides an extensive introduction to key management functions core revenue sources and the emerging social enterprise space and raises a number of emerging topics and issues that will shape nonprofit management in future decades As graduate programs continue to evolve to serve the training needs in the field The Routledge Companion to Nonprofit Management is an essential reference and resource for graduate students researchers and practitioners interested in a deeper understanding of the operation of the nonprofit sector *Foundations and American Political Science* Emily Hauptmann, 2022-11-01 Foundations in the United States have long exerted considerable power over education and scholarly production Although today's titans of philanthropy proclaim more loudly their desire to transform schools and universities than did some of their predecessors philanthropic programs designed to reshape educational institutions are at least a century old In *Foundations and American Political Science* Emily Hauptmann focuses on the postwar Carnegie Ford and Rockefeller programs that reshaped political science She shows how significant changes in the methods and research interests of postwar political scientists began as responses to the priorities set by their philanthropic patrons Informed by years of research in foundation and university archives *Foundations and American Political Science* follows the course of several streams of private philanthropic money as they wended their way through public universities and political science departments in the postwar period The programs launched by the Carnegie Ford and Rockefeller philanthropies as well as their reception at the universities of California and Michigan steered political scientists towards particular problems and particular ways of studying them The rise of statistical analyses of survey data the decline of public administration and persistent conflicts over the discipline's purpose and the best methods for understanding politics Hauptmann argues all had their roots in the ways that postwar universities responded to

foundations programs Additionally the new emphasis universities placed on sponsored research sparked sharp disputes among political scientists over what should count as legitimate knowledge about politics and what the ultimate purpose of the discipline should be Patronizing the Public William J. Buxton, 2009-08-16 Patronizing the Public American Philanthropy's Transformation of Culture Communication and the Humanities is the first detailed and comprehensive examination of how American philanthropic foundations have shaped numerous fields including dance drama education film music folklore journalism local history museums radio television as well as the performing arts and the humanities in general Drawing on an impressive range of archival and secondary sources the chapters in the volume give particular attention to the period from the late 1920s to the late 1970s a crucial time for the development of philanthropic practice To this end it examines how patterns and directions of funding have been based on complex negotiations involving philanthropic family members elite networks foundation trustees and officers cultural workers academics state officials corporate interests and the general public By addressing both the contours of philanthropic power as well as the processes through which that power has been enacted it is hoped that this collection will reinforce and amplify the critical study of philanthropy's history
