Group Rights Peter Jones, 2022-03-24 Nowadays rights are frequently ascribed to groups distinguished by their nationality culture religion or language Rights are also commonly ascribed to institutionalised groups such as states businesses trade unions and private associations Yet the ascription of rights to groups remains deeply controversial Many people reject the very idea of group rights Amongst those who do not there is radical disagreement about which sorts of group might possess rights and why Some believe that group rights threaten the freedom and well being of individuals while others argue that the rights of groups can complement them Some claim that group rights can also be human rights others find that claim incoherent The contributions making up this volume wrestle with these and many other of the issues that surround group rights This volume brings together twenty four of the journal articles that have contributed most significantly to contemporary thinking on group rights

Mothers, Monsters, Whores Laura Sjoberg, Caron E. Gentry, 2013-07-04 A woman did that The general reaction to women's political violence is still one of shock and incomprehension Mothers Monsters Whores provides an empirical study of women's violence in global politics The book looks at military women who engage in torture the Chechen Black Widows Middle Eastern suicide bombers and the women who directed and participated in genocides in Bosnia and Rwanda Sjoberg Gentry analyse the biological psychological and sexualized stereotypes through which these women are conventionally depicted arguing that these are rooted in assumptions about what is appropriate female behaviour What these stereotypes have in common is that they all perceive women as having no agency in any sphere of life from everyday choices to global political events This book is a major feminist re-evaluation of women's motivations and actions as perpetrators of political violence

Black American Students in An Affluent Suburb John U. Ogbu, 2003-02-26 John Ogbu has studied minority education from a comparative perspective for over 30 years The study reported in this book jointly sponsored by the community and the school district in Shaker Heights Ohio focuses on the academic performance of Black American students Not only do these students perform less well than White students at every social class level but also less well than immigrant minority students including Black immigrant students Furthermore both middle class Black students in suburban school districts as well as poor Black students in inner city schools are not doing well Ogbu's analysis draws on data from observations formal and informal interviews and statistical and other data He offers strong empirical evidence to support the cross class existence of the problem The book is organized in four parts Part I provides a description of the twin problems the study addresses the gap between Black and White students in school performance and the low academic engagement of Black students a review of conventional explanations an alternative perspective and the framework for the study Part II is an analysis of societal and school factors contributing to the problem including race relations Pygmalion or internalized White

beliefs and expectations levelling or tracking the roles of teachers counselors and discipline Community factors the focus of this study are discussed in Part III These include the educational impact of opportunity structure collective identity cultural and language or dialect frame of reference in schooling peer pressures and the role of the family This research focus does not mean exonerating the system and blaming minorities nor does it mean neglecting school and society factors Rather Ogbu argues the role of community forces should be incorporated into the discussion of the academic achievement gap by researchers theoreticians policymakers educators and minorities themselves who genuinely want to improve the academic achievement of African American children and other minorities In Part IV Ogbu presents a summary of the study s findings on community forces and offers recommendations some of which are for the school system and some for the Black community Black American Students in an Affluent Suburb A Study of Academic Disengagement is an important book for a wide range of researchers professionals and students particularly in the areas of Black education minority education comparative and international education sociology of education educational anthropology educational policy teacher education and applied anthropology Encyclopedia of Urban Studies Ray Hutchison,2010 An encyclopedia about various topics relating to urban studies
