

THE FRENCH GARDEN 1500-1800

WILLIAM HOWARD ADAMS

This first volume in The World Landscape Art and Architecture Series will trace the development of the art and architecture of the French Garden over a period of three hundred years, by examining a number of the key examples in detail as they took form from the earliest and quite simple cloister gardens to a markedly formal "French" style, and even as challenged by a vogue for more "natural" gardens.

The French Garden 1500 18

Brendan G. Carr

The French Garden 1500 18:

The French Garden, 1500-1800 William Howard Adams, 1979 **Getting Back Into Place** Edward S. Casey, 1993 Offers a philosophical exploration of the pervasiveness of place Presenting an account of the role of place in human experience this book points to place s indispensability in navigation and orientation The role of the lived body in matters of place is considered and the characteristics of built places are explored The Great Rebuildings Of Tudor And Stuart England Colin Platt, 2013-10-18 Rural England s Great Rebuilding of 1570 1640 first identified by W G Hoskins in 1953 has been vigorously debated ever since Some critics have re dated it on a regional basis Still more have seen Great Rebuildings around every corner causing them to dismiss Hoskins s thesis In this first full length study of the rebuilding phenomenon Colin Platt an accomplished architectural and social historian addresses these issues and presents a persuasive fresh assessment of the legacy of this revolution in housing design Although accepting Hoskins s definition of a first Great Rebuilding starting with the 1570s and ending in the devastations of the Civil War the author argues convincingly for a more influential second Great Rebuilding after peace had returned In examining architectural change both in the buildings themselves and through the writings of discerning contemporaries today s family house whether in town or country is shown to owe almost nothing to the Middle Ages Instead its origins lie in the increasingly sophisticated world of the Tudor and Jacobean courts in the refined taste of returned travellers and in a growing popular demand for personal privacy unobtainable in houses of medieval plan This fascinating and challenging study of changing tastes marks an important contribution to our understanding of Tudor and Stuart society and as such will not only be welcomed by students and historians of early modern England but by the interested general reader The Ephemeral History of Perfume Holly Dugan, 2011-09-14 In contrast to the other senses smell has long been thought of as too elusive too fleeting for traditional historical study Holly Dugan disagrees arguing that there are rich accounts documenting how men and women produced consumed and represented perfumes and their ephemeral effects She delves deeply into the cultural archive of olfaction to explore what a sense of smell reveals about everyday life in early modern England In this book Dugan focuses on six important scents incense rose sassafras rosemary ambergris and jasmine She links these smells to the unique spaces they inhabited churches courts contact zones plague ridden households luxury markets and pleasure gardens and the objects used to dispense them This original approach provides a rare opportunity to study how early modern men and women negotiated the environment in their everyday lives and the importance of smell to their daily actions Dugan defines perfume broadly to include spices flowers herbs animal parts trees resins and other ingredients used to produce artificial scents smokes fumes airs balms powders and liquids In researching these Renaissance aromas Dugan uncovers the extraordinary ways now largely lost that people at the time spoke and wrote about smell objects ambered civited expired fetored halited resented and smeeked or were described as breathful embathed endulced gracious halited incensial odorant pulvil redolent and suffite A unique contribution to early modern

studies The Ephemeral History of Perfume is an unparalleled study of olfaction in the Renaissance a period in which new scents and important cultural theories about smell were developed Dugan s inspired analysis of a wide range of underexplored sources makes available to scholars a remarkable wealth of information on the topic **The 17th and 18th Centuries** Frank N. Magill,2013-09-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who s who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual s life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual s place in history All entries conclude with a fully annotated bibliography **Green Thoughts** Eleanor Perenyi,2010-11-03 Unlike any other gardening book I know with its Old World charm its down to earth practicality its whimsy and sophistication Brooke Astor The New York Times Book Review A classic in the literature of the garden Green Thoughts is a beautifully written and highly original collection of seventy two essays alphabetically arranged on topics ranging from Annuals and Artichokes to Weeds and Wildflowers An amateur gardener for over thirty years Eleanor Per nyi draws upon her wide ranging knowledge of gardening lore to create a delightful witty blend of how to advice informed opinion historical insight and philosophical musing There are entries in praise of earthworms and in protest of rock gardens a treatise on the sexual politics of tending plants and a paeon to the salubrious effect of gardening see Longevity Twenty years after its initial publication Green Thoughts remains as much a joy to read as ever This Modern Library edition is published with a new Introduction by Allen Lacy former gardening columnist for The Wall Street Journal and The New York Times and the author of numerous gardening books You do not have to be a good gardener to fall in love with Green Thoughts It reads with the intrepid assurance of a classic Mary McCarthy The New York Review of Books One of those dangerous reference works that you reach for at a moment of horticultural crisis or indecision only to find yourself an hour later browsing far beyond the page where you began The New Yorker **British Rifleman vs French Skirmisher** David Greentree,2020-02-20 The battles between British and French forces during the Peninsular War 1807 14 and the Hundred Days campaign of 1815 saw both sides deploy specialist units of skirmishers trained in marksmanship and open order combat These light troops fulfilled several important roles on the battlefield such as masking large bodies of close order troops as they manoeuvred in battle firing upon enemy troops to provoke them into attacking prematurely and harassing enemy artillery crews and senior officers with aimed fire On occasion the skirmishers were tasked with special missions requiring individual initiative such as the capture or defence of key battlefield positions especially those situated in difficult terrain While Napoleon s skirmishers carried the smoothbore musket notoriously inaccurate and short ranged several elite units fighting for Britain were armed with the rifle a far more accurate weapon that was hampered by a slower rate of fire As well as the legendary 95th Rifles

Britain fielded rifle armed German troops of the 60th Regiment and the King's German Legion while France's light troops were fielded in individual companies but also entire regiments In this study David Greentree assesses the role and effectiveness of rifle armed British troops and their French open order opponents in three very different encounters Roli a August 1808 the first British battle of the Peninsular War the struggle for a key bridge at Barba del Puerco March 1810 and the bitter fight for the La Haye Sainte farmhouse during the battle of Waterloo June 1815 *Life - The Outburst of Life in the Human Sphere* Anna-Teresa Tymieniecka, 2013-03-09 Science and philosophy have both undergone radical transformations in recent times Now they are poised for a pivotal alliance Science has abandoned the mechanistic model of nature Philosophy has broken through the tight traditional circle of conceptualisation intellectualistic preconceptions and cognitive presuppositions The two now meet to focus on the palpitating fluctuating stream of nature life Their traditional prejudices dispersed under the pressure of new evidence philosophy phenomenology of life and the sciences of life meet in the Archimedean point of the human creative condition proper to the phenomenology of life and the role of the human subject central to the scientific view of reality They necessitate each other without the sciences of life philosophy phenomenology of life cannot penetrate the intricacies of nature life without recourse to philosophy to delineate design provide clues to the organisation of natural evidence the sciences of life cannot devise new strategies for inquiry nor survey their field The present collection throws open the barriers that separate nature and culture works of physis and those of the spirit Following the philosophical model of the onto-poiesis of life focusing on its specifically human sphere that of the human self interpretation in existence it encircles the vast new horizons of the new alliance **Garden Life**, 1911 **H, Natural science.
