Tamed, Lost, Revived Diane Flynt, 2023-09-18 For anyone who's ever picked an apple fresh from the tree or enjoyed a glass of cider writer and orchardist Diane Flynt offers a new history of the apple and how it changed the South and the nation. Showing how southerners cultivated over 2,000 apple varieties from Virginia to Mississippi, Flynt shares surprising stories of a fruit that was central to the region for over 200 years. Colorful characters abound in this history, including aristocratic Belgian immigrants, South Carolina plantation owners, and multiple presidents, each group changing the course of southern orchards. She shows how southern apples, ranging from northern varieties that found fame on southern soil to hyper-local apples grown by a single family, have a history beyond the region, from Queen Victoria's court to the Oregon Trail. Flynt also tells us the darker side of the story, detailing how apples were entwined with slavery and the theft of Indigenous land. She relates the ways southerners lost their rich apple culture in less than the lifetime of a tree and offers a tentatively hopeful future. Alongside unexpected apple history, Flynt traces the arc of her own journey as a pioneering farmer in the southern Appalachians who planted cider apples never grown in the region and founded the first modern cidery in the South. Flynt threads her own story with archival research and interviews with orchardists, farmers, cidermakers, and more. The result is not only the definitive story of apples in the South but also a new way to challenge our notions of history. **The Founding**

An Archive of Taste Lauren F. Klein, 2020-05-12 A groundbreaking synthesis of food studies archival theory and early American literature There is no eating in the archive This is not only a practical admonition to any would be researcher but also a methodological challenge in that there is no eating or at least no food preserved among the printed records of the early United States Synthesizing a range of textual artifacts with accounts both real and imagined of foods harvested dishes prepared and meals consumed *An Archive of Taste* reveals how a focus on eating allows us to rethink the nature and significance of aesthetics in early America as well as of its archive Lauren F Klein considers eating and early American aesthetics together reframing the philosophical work of food and its meaning for the people who prepare serve and consume it She tells the story of how eating emerged as an aesthetic activity over the course of the eighteenth century and how it subsequently transformed into a means of expressing both allegiance and resistance to the dominant Enlightenment worldview Klein offers richly layered accounts of the enslaved men and women who cooked the meals of the nation's founders and in doing so directly affected the development of our national culture from Thomas Jefferson's emancipation agreement with his enslaved chef to Malinda Russell's *Domestic Cookbook* the first African American authored culinary text The first book to examine the gustatory origins of aesthetic taste in early American literature *An Archive of Taste* shows how thinking about eating can help to tell new stories about the range of people who worked to establish a cultural foundation for the United States

Mr. Jefferson and the Giant Moose Lee Alan Dugatkin, 2024-05-31 In the years after the Revolutionary War the fledgling republic of America was viewed by many Europeans as a degenerate backwater populated by subspecies weak and feeble Chief among these naysayers was the French Count and world renowned naturalist Georges Louis Leclerc de Buffon who wrote that the flora and fauna of America humans included were inferior to European specimens Thomas Jefferson author of the Declaration of Independence U S president and ardent naturalist spent years countering the French conception of American degeneracy His *Notes on Virginia* systematically and scientifically dismantled Buffon's case through a series of tables and equally compelling writing on the nature of his home state But the book did little to counter the

arrogance of the French and hardly satisfied Jefferson's quest to demonstrate that his young nation was every bit the equal of a well established Europe Enter the giant moose The American moose which Jefferson claimed was so enormous a European reindeer could walk under it became the cornerstone of his defense Convinced that the sight of such a magnificent beast would cause Buffon to revise his claims Jefferson had the remains of a seven foot ungulate shipped first class from New Hampshire to Paris Unfortunately Buffon died before he could make any revisions to his *Histoire Naturelle* but the legend of the moose makes for a fascinating tale about Jefferson's passion to prove that American nature deserved prestige In *Mr Jefferson and the Giant Moose* Lee Alan Dugatkin vividly recreates the origin and evolution of the debates about natural history in America and in so doing returns the prize moose to its rightful place in American history
