The Future Battlefield And The ArabIsraeli Conflict Near East Policy Series:

The Future Battlefield and the Arab-Israeli Conflict Hirsh Goodman, W. Seth Carus, The revolution now taking place in the technology of war is one with potentially dramatic implications for the Arab Israeli military balance In this important book two Middle East military experts assess the impact of technological innovation on Israeli and Arab military forces They concentrate primarily on Israel and Syria since Syria remains intent on achieving strategic parity with Israel while other Arab countries are less inclined to become militarily involved The authors outline a number of developments and their consequences These include the proliferation of military technologies which make available types of equipment previously unattainable and the electronics revolution which permits acquisition of vastly more sophisticated command control communications and intelligence systems New weapons systems long range artillery rockets ballistic and cruise missiles and strike drones permit attacks deep in enemy territory Goodman and Carus see all these changes as a mixed blessing for Israel and Syria In both countries human resources will be tested by the need to develop use and maintain such highly sophisticated equipment Similarly the cost of such sophisticated hardware will strain the financial resources of both countries The authors assessment of the impact of changes on the future battlefield has applications beyond the Arab Israeli conflict In such countries the importance of a domestic weapons industry will be heightened as reliance on foreign sources becomes less attractive for reasons the authors discuss Reliance on good tactics and operational methods will remain keys to success But in all cases the benefits of the new technologies will depend on the relative skill with which countries can use them Between Israel and Syria the authors see the advantage as Israel s **The Future Battlefield and the Arab Israeli Conflict** will be of interest to military and strategic specialists political scientists concerned with international relations Middle East specialists and those interested in the impact of scientific and technological change on policy This volume is the first in a series developed with the Washington Institute for Near East Studies , [After The Storm](#) Anthony H Cordesman, 2019-08-19 This comprehensive new analysis goes far beyond today s headlines and the basic facts and figures on the military forces in the region Tracing the origin of the military forces in each Middle East country Tony Cordesman discusses current security developments and provides a qualitative and quantitative analysis of the strength and effectiveness o **Perilous Prospects** Anthony H Cordesman, 2018-04-19 In this book the author supplies the first account of the military and security concerns arising out of the Israeli Palestinian peace process and the recent assassination of Prime Minister Rabin considering a number of possible futures for the region and their effects on the peace process **The Culture of Military Innovation** Dmitry (Dima) Adamsky, 2010-01-27 This book studies the impact of cultural factors on the course of military innovations One would expect that countries accustomed to similar technologies would undergo analogous changes in their perception of and approach to warfare However the intellectual history of the Revolution in Military Affairs RMA in Russia the US and Israel indicates the opposite The US developed technology and weaponry for about a decade

without reconceptualizing the existing paradigm about the nature of warfare Soviet new theory of victory represented a conceptualization which chronologically preceded technological procurement Israel was the first to utilize the weaponry on the battlefield but was the last to develop a conceptual framework that acknowledged its revolutionary implications Utilizing primary sources that had previously been completely inaccessible and borrowing methods of analysis from political science history anthropology and cognitive psychology this book suggests a cultural explanation for this puzzling transformation in warfare The Culture of Military Innovation offers a systematic thorough and unique analytical approach that may well be applicable in other perplexing strategic situations Though framed in the context of specific historical experience the insights of this book reveal important implications related to conventional subconventional and nonconventional security issues It is therefore an ideal reference work for practitioners scholars teachers and students of security studies *Israel's National Security Towards the 21st Century* Uri Bar-Joseph, 2014-09-19 This volume discusses three principal issues the Israeli army and the Revolution of Military Affairs RMA Israel's present and future answers to the threats of weapons of mass destruction WMD and the impact of societal political and technological changes on Israel's future war objectives **Congressional Record** United States. Congress, 1991 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *Redefining security in the Middle East* Tami Jacoby, Brent Sasley, 2018-07-30 For over five decades the Cold War security agenda was distinguished by the principal strategic balance that of a structure of bipolarity between the United States US and the Soviet Union USSR This book seeks to draw from current developments in critical security studies in order to establish a new framework of inquiry for security in the Middle East It addresses the need to redefine security in the Middle East The focus is squarely on the Arab Israeli context in general and the Palestinian Israeli context in particular The character of Arab Israeli relations are measured by the Israeli foreign policy debate from the 1950s to the 1990s A dialogue between Islam and Islamism as a means to broaden the terrain on which conflict resolution and post bipolar security in the Middle East is to be understood is presented The Middle East peace process MEPP was an additional factor in problematizing the military strategic concept of security in the Middle East The shift in analysis from national security to human security reflects the transformations of the post Cold War era by combining military with non military concerns such as environmental damage social unrest economic mismanagement cultural conflict gender inequity and radical fundamentalism By way of contrast to realist international relations IR theory developing world theorists have proposed a different set of variables to explain the unique challenges facing developing states Finally the book examines the significance of ecopolitics in security agendas in the Middle East An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence [Journal of Palestine](#)

Studies ,2001 *Scuds or Butter?* Yahya M. Sadowski,2010-12-01 In the late 1970s and 1980s Middle Eastern states spent more than 600 billion expanding their military forces They acquired thousands of tanks advanced fighter aircraft ballistic missiles chemical weapons and in some cases nuclear devices These potent arsenals make the Middle East the tinderbox of world affairs In this book foreign policy analyst Yahya Sadowski shows that the arms race cannot be sustained in the 1990s Declining oil prices overpopulation economic mismanagement and foreign policy adventures such as the 1992 Gulf War which cost local states another 600 billion have sapped the economies of the Middle East Facing dwindling incomes and rising expenses growing numbers of Middle Easterners now favor diverting funds away from military expenditures and concentrating them on economic development programs Sadowski argues that arms control programs for the Middle East should be designed to reinforce and exploit these economic pressures for demilitarization He examines the strengths and weaknesses of various arms control proposals such as the U S call for a cartel of weapons exporters and a Jordanian plan to liquidate the foreign debt of states that curb military expenditures
