**Critics Not Caretakers** Russell T. McCutcheon,2023-11-30 The essays collected together in Critics Not Caretakers argue that the study of religion must be rethought as an ordinary aspect of social historical existence a stance that makes the scholar of religion a critic of cultural and historical practices rather than a caretaker of religious tradition or a font of timeless wisdom and deep meaning The book begins with several essays that outline the basis of an alternative sociorhetorical approach to studying religion before moving on to a series of discrete dispatches from the ongoing theory wars each of which uses the work of such writers as Karen Armstrong Walter Burkert Benson Saler and Jacob Neusner as a point of entry into wider theoretical issues of importance to the field s future The author then examines the socio political role of this brand of critical scholarship a role that differs dramatically from the type of sympathetic caretaking generally associated with scholars of religion who feel compelled to go public Concluding the work is a consideration of how scholars as teachers can address issues of theory method and critical thinking in a variety of undergraduate classrooms the location where they have always been publicly accountable intellectuals The new edition of this still read and for some controversial book preserves the original essays but includes a new opening chapter and new introductory commentaries across all of the chapters to demonstrate how little the field has changed since the volume was first published in 2001 Accordingly the book

continues to provide a viable alternative for those wanting to take a more critical approach to the study of religion World Christian Trends Ad30-ad2200 (hb) ,2001 **Pietism in Germany and North America 1680-1820** Hartmut Lehmann,James Van Horn Melton,2016-12-05 This collection explores different approaches to contextualizing and conceptualizing the history of Pietism particularly Pietistic groups who migrated from central Europe to the British colonies in North America during the long eighteenth century Emerging in German speaking lands during the seventeenth century Pietism was closely related to Puritanism sharing similar evangelical and heterogeneous characteristics Dissatisfied with the established Lutheran and Reformed Churches Pietists sought to revivify Christianity through godly living biblical devotion millennialism and the establishment of new forms of religious association As Pietism represents a diverse set of impulses rather than a centrally organized movement there were inevitably fundamental differences amongst Pietist groups and these differences and conflicts were carried with those that emigrated to the New World The importance of Pietism in shaping Protestant society and culture in Europe and North America has long been recognized but as a topic of scholarly inquiry it has until now received little interdisciplinary attention Offering essays by leading scholars from a range of fields this volume provides an interdisciplinary overview of the subject Beginning with discussions about the definition of Pietism the collection next looks at the social political and cultural dimensions of Pietism in German speaking Europe This is then followed by a section investigating the attempts by German Pietists to establish new religiously based communities in North America The collection concludes with discussions on new directions in Pietist research Together these essays help situate Pietism in the broader Atlantic context making an important contribution to understanding religious life in Europe and colonial North America during the eighteenth century **Edward Said's Rhetoric of the Secular** Mathieu E. Courville,2011-10-20 Edward Said s Rhetoric of the Secular provides an important new reading of Edward W Said s work emphasizing not only the distinction but also the fuzzy borders between representations of the religious and the secular found within and throughout his oeuvre and at the core of some of his most customary rhetorical strategies Mathieu Courville begins by examining Said s own reflections on his life before moving on to key debates about Said s work within Religious Studies and Middle Eastern Studies and his relationship to French critical theorists Through close attention to Said s use of the literal and the figurative when dealing with religious national and cultural matters Courville discerns a pattern that illuminates what Said means by secular Said s work shows that the secular is not the utter opposite of religion in the modern globalized world but may exist in a productive tension with it **A World of Faith** Carolyn Pogue,2007-10 This is a comprehensive book covering most of the world s main religions in a captivating and accessible way that invites and inspires teens to look beyond their own faith and to explore the universality of spirituality that is rooted in everyone Interviews with young people are the basis of many of the chapters Full colour photos and comments allow teens to appreciate how the influences of different faith traditions affect other lives in a relevant way Thick and Dazzling Darkness Peter O'Leary,2017-11-21 How do poets use language to

render the transcendent often dizzyingly inexpressible nature of the divine In an age of secularism does spirituality have a place in modern American poetry In *Thick and Dazzling Darkness* Peter O Leary reads a diverse set of writers to argue for the existence and importance of religious poetry in twentieth and twenty first century American literature He traces a poetic genealogy that begins with Whitman and Dickinson and continues in the work of contemporary writers to illuminate an often obscured but still central spiritual impulse that has shaped the production and imagination of American poetry O Leary presents close and comprehensive readings of the modernist late modernist and postmodern poets Robinson Jeffers Frank Samperi and Robert Duncan as well as the contemporary poets Joseph Donahue Geoffrey Hill Fanny Howe Nathaniel Mackey Pam Rehm and Lissa Wolsak Examining how these poets drew on a variety of traditions including Catholicism Gnosticism the Kabbalah and mysticism the book considers how modern and contemporary poets have articulated the spiritual in their work O Leary also argues that an anxiety of misunderstanding exists in the study and writing of poetry between secular and religious impulses and that the religious nature of poets works is too often marginalized or misunderstood Examining the works of a specific poet in each chapter O Leary reveals their complexity and offers a defense of the value and meaning of religious poetry against the grain of a secular society

Smith,2004-11-10 One of the most influential theorists of religion Jonathan Z Smith is best known for his analyses of religious studies as a discipline and for his advocacy and refinement of comparison as the basis for the history of religions *Relating Religion* gathers seventeen essays four of them never before published that together provide the first broad overview of Smith s thinking since his seminal 1982 book *Imagining Religion* Smith first explains how he was drawn to

the study of religion outlines his own theoretical commitments and draws the connections between his thinking and his concerns for general education. He then engages several figures and traditions that serve to define his interests within the larger setting of the discipline. The essays that follow consider the role of taxonomy and classification in the study of religion, the construction of difference and the procedures of generalization and redescription that Smith takes to be key to the comparative enterprise. The final essays deploy features of Smith's most recent work, especially the notion of translation. Heady, original and provocative, *Relating Religion* is certain to be hailed as a landmark in the academic study and critical theory of religion.

**Introduction to the Study of Religion** Hillary P. Rodrigues, John S. Harding, 2023-11-29 Why do people study religion? How have they studied it in the past? How do we study religion today? Topics include: Definitions of religion; Perspectives in the study and teaching of religion; How religion began to be studied; Traditional perspectives: philosophical and theological; How people experience religion; Perspectives in the study of religious consciousness and perception: phenomenological and psychological; Studying religion within communities; Social and cultural perspectives: anthropological, sociological, political and economic; Judging religion; Critical perspectives: feminist approaches; the interaction of popular literature and religion; Contextual perspectives: historical and comparative; Themes: theories and current directions.
