The Heart of the Mission Cary Cordova, 2017-05-04 An illustrated in depth examination of the avant garde and politically radical Latino art of San Francisco's Mission District In *The Heart of the Mission* Cary Cordova combines urban political and art history to examine how the Mission District a longtime bohemian enclave in San Francisco has served as an important place for an influential and largely ignored Latino arts movement from the 1960s to the present Well before the anointment of the Mission School by art world arbiters at the dawn of the twenty first century Latino artists writers poets playwrights performers and filmmakers made the Mission their home and their muse The Mission home to Chileans Cubans Guatemalans Mexican Americans Nicaraguans Puerto Ricans and Salvadorans never represented a single Latino identity In tracing the experiences of a diverse group of Latino artists from the 1940s to the turn of the century Cordova connects wide ranging aesthetics to a variety of social movements and activist interventions The book begins with the history of the Latin Quarter in the 1940s and the subsequent cultivation of the Beat counterculture in the 1950s demonstrating how these decades laid the groundwork for the artistic and political renaissance that followed Using oral histories visual culture and archival research she analyzes the Latin jazz scene of the 1940s Latino involvement in the avant garde of the 1950s the Chicano movement and Third World movements of the 1960s the community mural movement of the 1970s the transnational liberation movements in Nicaragua and El Salvador and the AIDS activism of the 1980s Through these different historical frames Cordova links the creation of Latino art with a flowering of Latino politics

At the Heart of the Borderlands

Cameron D. Jones, Jay T. Harrison, 2023-04-15 *At the Heart of the Borderlands* is the first book length study of Africans and Afro descendants in the frontiers of Spanish America While people of African descent have formed part of most borderlands histories this study recognizes and explains their critical contribution to the formation of frontier spaces Lack of imperial control coupled with Spain's desperation for settlers and soldiers in frontier areas facilitated the social mobility of Afro descendants This need allowed African descendants to become not just members of borderland societies but leaders of it as well They were essential actors in helping to shape the limits of the Spanish empire Africans and Afro descendants built opposed and shaped Spanish hegemony in the borderlands taking on roles that would have been impossible or difficult in colonial centers due to the socio racial hierarchy of imperial policies and practices

Japanese Americans at Heart Mountain Saara Kekki, 2022-07 On August 8 1942 302 people arrived by train at Vocation Wyoming to become the first Japanese American residents of what the U S government called the Relocation Center at Heart Mountain In the following

weeks and months they would be joined by some 10 000 of the more than 120 000 people of Japanese descent two thirds of them U S citizens incarcerated as domestic enemy aliens during World War II Heart Mountain became a town with workplaces social groups and political alliances in short networks These networks are the focus of Saara Kekki s Japanese Americans at Heart Mountain Interconnections between people are the foundation of human societies Exploring the creation of networks at Heart Mountain as well as movement to and from the camp between 1942 and 1945 this book offers an unusually detailed look at the formation of a society within the incarcerated community specifically the manifestation of power agency and resistance Kekki constructs a dynamic network model of all of Heart Mountain s residents and their interconnections family political employment social and geospatial networks using historical big data drawn from the War Relocation Authority and narrative sources including the camp newspaper Heart Mountain Sentinel For all the inmates life inevitably went on people married had children worked and engaged in politics Because of the duration of the incarceration many became institutionalized and unwilling to leave the camps when the time came Yet most individuals Kekki finds took charge of their own destinies despite the injustice and looked forward to the day when Heart Mountain was behind them Especially timely in its implications for debates over immigration and assimilation Japanese Americans at Heart Mountain presents a remarkable opportunity to reconstruct a community created under duress within the larger American society and to gain new insight into an American experience largely lost to official history

Vanity Fair,1927 **Bulletin** American Heart Association,1925 **German Rocketeers in the Heart of Dixie** Monique Laney,2015-01-01 This thought provoking study by historian Monique Laney focuses on the U S government assisted integration of German rocket specialists and their families into a small southern community at the end of World War II In 1950 Wernher von Braun and his team of rocket experts relocated to Huntsville Alabama a town that would celebrate the team despite their essential role in the Nazi war effort a decade earlier for their contributions to the U S Army missile program and later to NASA s space program Based on oral histories provided by members of the African American and Jewish communities the rocketeers families and co workers friends and neighbors Laney s book demonstrates how the histories of German Nazism and Jim Crow in the American South intertwine in narratives about the past This is a critical reassessment of a singular time that links the Cold War the Space Race and the Civil Rights era while addressing important issues of transnational science and technology and asking Americans to consider their country s own history of racism when reflecting on the Nazi past

At the Heart of Work and Family Anita Iltis Garey,Karen V. Hansen,2011 *At the Heart of Work and Family* presents original research on work and family by scholars who engage and build on the conceptual framework developed by well known sociologist Arlie Russell Hochschild These concepts such as the second shift the economy of gratitude emotion work feeling rules gender strategies and the time bind are basic to sociology and have shaped both popular discussions and academic study The common thread in these essays covering the gender division of housework childcare networks families in the global economy and children of

consumers is the incorporation of emotion feelings and meaning into the study of working families These examinations like Hochschild s own work connect micro level interaction to larger social and economic forces and illustrate the continued relevance of linking economic relations to emotional ones for understanding contemporary work family life Heart Failure: New Insights for the Healthcare Professional: 2012 Edition ,2012-12-10 Heart Failure New Insights for the Healthcare Professional 2012 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Heart Failure The editors have built Heart Failure New Insights for the Healthcare Professional 2012 Edition on the vast information databases of ScholarlyNews You can expect the information about Heart Failure in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Heart Failure New Insights for the Healthcare Professional 2012 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>

Dictionary Catalog of the Harris Collection of American Poetry and Plays, Brown University Library, Providence, Rhode Island Brown University. Library,1972 *National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.),1986 **Ecologies of the Heart** E. N. Anderson,1996-03-28 There is much we can learn about conservation from native peoples says Gene Anderson While the advanced nations of the West have failed to control overfishing deforestation soil erosion pollution and a host of other environmental problems many traditional peoples manage their natural resources quite successfully And if some traditional peoples mismanage the environment the irrational value some place on rhino horn for instance has left this species endangered the fact remains that most have found ways to introduce sound ecological management into their daily lives Why have they succeeded while we have failed In *Ecologies of the Heart* Gene Anderson reveals how religion and other folk beliefs help pre industrial peoples control and protect their resources Equally important he offers much insight into why our own environmental policies have failed and what we can do to better manage our resources A cultural ecologist Gene Anderson has spent his life exploring the ways in which different groups of people manage the environment and he has lived for years in fishing communities in Hong Kong Malaysia Singapore Tahiti and British Columbia as well as in a Mayan farmtown in south Mexico where he has studied fisheries farming and forest management He has concluded that all traditional societies that have managed resources well over time have done so in part through religion by the use of emotionally powerful cultural symbols that reinforce particular resource management strategies Moreover he argues that these religious beliefs while seeming unscientific if not irrational at first glance are actually based on long observation of nature To illustrate this insight he includes many fascinating portraits of native life He offers for instance an intriguing discussion of the Chinese belief system known as Feng Shui wind and water and tells of

meeting villagers in remote areas of Hong Kong's New Territories who assert that dragons live in the mountains and that to disturb them by cutting too sharply into the rock surface would cause floods and landslides which in fact it does. He describes the Tlingit Indians of the Pacific Northwest who before they strip bark from the great cedar trees make elaborate apologies to spirits they believe live inside the trees, assuring the spirits that they take only what is necessary. And we read of the Maya of southern Mexico who speak of the lords of the Forest and the Animals who punish those who take more from the land or the rivers than they need. These beliefs work in part because they are based on long observation of nature but also and equally important because they are incorporated into a larger cosmology so that people have a strong emotional investment in them. And conversely, Anderson argues that our environmental programs often fail because we have not found a way to engage our emotions in conservation practices. Folk beliefs are often dismissed as irrational superstitions. Yet as Anderson shows, these beliefs do more to protect the environment than modern science does in the West. Full of insights, *Ecologies of the Heart* mixes anthropology with ecology and psychology, traditional myth and folklore with informed discussions of conservation efforts in industrial society to reveal a strikingly new approach to our current environmental crises. **Bank of America V.
