The Buddha Image Yuvraj Krishan, 1996 Illustrations 247 b w illustrations Description This book deals with crucial though controversial questions in Buddhist art the origin of the Buddha image and the iconography of the Buddha images The earliest Buddhist art of Sanchi and Bharhut is aniconic The Buddha is represented in symbols only In the later Buddhist art of Gandhara and Mathura the Buddha is represented in human form he is the principal subject of sculptural art The book seeks to explore the geographical area in which the image of the Buddha first emerged and whether the Buddhist doctrines Hinayana or Mahayana had anything to do with this transformation The Buddha image as developed eventually at Sarnath became the model for the Buddha images in whole of Asia south east central and eastern Asia The iconographic features of the Buddha image are superficially an aberration being in apparent conflict with the doctrine The Buddha had cut off his hair at the time of his renunciation the rules of the order enjoin that a monk must be tonsured and must discard and eschew all riches However in his images the Buddha has hair on his head later he is also endowed with a crown and jewels After an exhaustive examination of the views of various scholars the book answers these questions and resolves the controversies on the basis of literary numismatic and epigraphic sources More importantly it makes use of the

valuable evidence from the contemporaneous Jaina art Aniconism of early Jaina art and the iconographic features of Jaina images The implications of this study are also important Does India owe idolatry to Buddhism Was this of foreign inspiration Was the Buddha image fashioned after the Vedic Brahma and whether the Buddha's usnisa and Buddhist art motifs are rooted in the Vedic tradition The book is profusely illustrated and provides rich and stimulating fare to students of Indian art in general and of Buddhist art in particular Reimagining India-thailand Relations: A Multilateral And Bilateral Perspective

Reena Marwah, 2020-03-17 This book brings into focus India's relations with ASEAN and Thailand in particular In the 1990s India revived its relations with Southeast Asia Yet in comparison to China India continued to be a distant neighbour Hence India has once again through its Look and Act East policies become intertwined with its immediate neighbours in the East especially with Thailand The objective of the book is to contextualise India's relations and influence in Southeast Asia over a period of nearly two thousand years through culture and religion The scope of the book extends beyond bilateral issues to include the multilateral bringing in issues of trade negotiations under the Regional Comprehensive Economic Partnership RCEP and the Indo Pacific construct As ASEAN's importance grows in the regional and global landscape there are ramifications for its relations with its traditional partners The volatility and suspicion among the major powers especially USA and China harbour the potential to disunite ASEAN A rising India seeks a united and strong ASEAN both as a natural partner and in a bid to balance China's growing assertiveness and deep pockets Based on interviews conducted with experts diplomats and scholars in the field this book encompasses a wide range of aspects that pertain to the historical cultural economic and strategic international relations of ASEAN and Thailand with India **Counterheritage** Denis

Byrne, 2014-04-16 The claim that heritage practice in Asia is Eurocentric may be well founded but the view that local people in Asia need to be educated by heritage practitioners and governments to properly conserve their heritage distracts from the responsibility of educating oneself about the local popular beliefs and practices which constitute the bedrock of most people's engagement with the material past Written by an archaeologist who has long had one foot in the field of heritage practice and another in the academic camp of archaeology and heritage studies Counterheritage is at once a forthright critique of current heritage practice in the Asian arena and a contribution to this project of self education Popular religion in Asia including popular Buddhism and Islam folk Catholicism and Chinese deity cults has a constituency that accounts for a majority of Asia's population making its exclusion from heritage processes an issue of social justice but more pragmatically it explains why many heritage conservation programs fail to gain local traction This book describes how the tenets of popular religion affect building and renovation practices and describes how modernist attempts to suppress popular religion in Asia in the early and mid twentieth century impacted religious heritage Author Denis Byrne argues that the campaign by archaeologists and heritage professionals against the private collecting and looting of antiquities in Asia largely ignores the regimes of value which heritage discourse has helped erect and into which collectors and local diggers play Focussing on the

Philippines Thailand and Taiwan but also referencing China and other parts of Southeast Asia richly detailed portraits are provided of the way people live with old things and are affected by them Narratives of the author s fieldwork are woven into arguments built upon an extensive and penetrating reading of the historical and anthropological literature The critical stance embodied in the title counterheritage is balanced by the optimism of the book s vision of a different practice of heritage advocating a view of heritage objects as vibrant agentic things enfolded in social practice rather than as inert and passive surfaces subject to conservation

Thai Art David Teh, 2017-03-31 The interplay of the local and the global in contemporary Thai art as artists strive for international recognition and a new meaning of the national Since the 1990s Thai contemporary art has achieved international recognition circulating globally by way of biennials museums and commercial galleries Many Thai artists have shed identification with their nation but Thainess remains an interpretive crutch for understanding their work In this book the curator and critic David Teh examines the tension between the global and the local in Thai contemporary art Writing the first serious study of Thai art since 1992 and noting that art history and criticism have lagged behind the market in recognizing it he describes the competing claims to contemporaneity as staked in Thailand and on behalf of Thai art elsewhere He shows how the values of the global art world are exchanged with local ones how they do and don t correspond and how these discrepancies have been exploited How can we make sense of globally circulating art without forgoing the interpretive resources of the local national or regional context Teh examines the work of artists who straddle the local and the global becoming willing agents of assimilation yet resisting homogenization He describes the transition from an artistic subjectivity couched in terms of national community to a more qualified postnational one against the backdrop of the singular but waning sovereignty of the Thai monarchy and sustained political and economic turmoil Among the national currencies of Thai art that Teh identifies are an agricultural symbology a Siamese poetics of distance and itinerancy and Hindu Buddhist conceptions of charismatic power Each of these currencies has been converted to a legal tender in global art signifying sustainability utopia the conceptual and the relational but what is lost and what may be gained in such exchanges
