The Forgotten Voyage:

Evolution on British Television and Radio Alexander Hall, 2021-09-30 This book charts the history of how biological evolution has been depicted on British television and radio from the first radio broadcast on evolution in 1925 through to the 150th anniversary of Charles Darwin's *Origin of the Species* in 2009. Going beyond science documentaries, the chapters deal with a broad range of broadcasting content to explore evolutionary themes in radio dramas, educational content, and science fiction shows like *Doctor Who*. The book makes the case that the dominant use in science broadcasting of the evolutionary epic, a narrative based on a progressive vision of scientific endeavour, is part of the wider development of a standardised way of speaking about science in society during the 20th century. In covering the diverse range of approaches to depicting evolution used in British productions, the book demonstrates how their success had a global influence on the genres and formats of science broadcasting used today.

Platypus Ann Moyal, 2004-10-29 Eloquent and concise, *Platypus* uncovers the earliest theories and latest discoveries about this delightfully odd member of the animal kingdom.

150 Years of Service on the Seas Marc I. Pinsel, 1982 This history chronicles the course that led to the creation of the present Naval Oceanographic Office. Preface p vii

Surveying the Record Edward Carlos Carter, 1999 Papers given at a conference on Scientific Exploration in North America to 1930 with topics including Cartography, Oceanic Exploration, Art, Anthropology, Lewis and Clark, and the West. This book adds much to our quest for knowledge of who and where we are by illuminating such themes as the role of maps and mapmaking in defining our national identity, the origins of Western exploration, the cultural clash found in the best-selling account of a 19th-century physician explorer with Arctic peoples, the role of art in the service of science in bringing these newly discovered places and peoples into the American parlor, and the impact of Mormon farming techniques on John Wesley Powell's famed 1878 Arid Region Report. Black and white maps and illustrations.

The United States and China Dong Wang, 2021-07-28 Now fully revised and updated, *The United States and China* offers a comprehensive synthesis of US-Chinese relations from initial contact to the present. Balancing the modern 1784-1949 and contemporary 1949-present periods, Dong Wang retraces centuries of interaction between two of the world's great powers from the perspective of both sides. She examines state-to-state diplomacy as well as economic, social, military, religious, and cultural interplay within varying national and international contexts. As China itself continues to grow in global importance, so too does the US-Chinese relationship, and this book provides an essential grounding for understanding its past, present, and possible futures.

spirit drive and determination A stunning and sure to be controversial book that pieces together through more than two dozen nineteenth century diaries letters albums minute books and quilts left by first generation Latter day Saints or Mormons the never before told story of the earliest days of the women of Mormon plural marriage whose right to vote in the state of Utah was given to them by a Mormon dominated legislature as an outgrowth of polygamy in 1870 fifty years ahead of the vote nationally ratified by Congress and who became political actors in spite of or because of their marital arrangements Laurel Thatcher Ulrich writing of this small group of Mormon women who ve previously been seen as mere names and dates has brilliantly reconstructed these textured complex lives to give us a fulsome portrait of who these women were and of their sex radicalism the idea that a woman should choose when and with whom to bear children
