The Cambridge Companion to Frege Tom Ricketts, Michael Potter, 2010-09-02. Gottlob Frege (1848–1925) was unquestionably one of the most important philosophers of all time. He trained as a mathematician and his work in philosophy started as an attempt to provide an explanation of the truths of arithmetic, but in the course of this attempt he not only founded modern logic but also had to address fundamental questions in the philosophy of language and philosophical logic. Frege is generally seen along with Russell and Wittgenstein as one of the fathers of the analytic method which dominated philosophy in English-speaking countries for most of the twentieth century. His work is studied today not just for its historical importance but also because many of his ideas are still seen as relevant to current debates in the philosophies of logic, language, mathematics and the mind. *The Cambridge Companion to Frege* provides a route into this lively area of research.

The Priority of Propositions. A Pragmatist Philosophy of Logic María José Frápolli, 2023-02-22. This monograph is a defence of the Fregean take on logic. The author argues that Frege's projects in logic and philosophy of language are essentially connected and that the formalist shift produced by the work of Peano, Boole and Schroeder and continued by Hilbert and Tarski is completely alien to Frege's approach in the *Begriffsschrift*. A central thesis of the book is that judgeable contents, i.e. propositions, are the primary bearers of logical properties which makes logic embedded in our conceptual system. This approach allows coherent and correct definitions of logical constants, logical consequence and truth, and connects their use to the practices of rational agents in science and everyday life.

Two Soviet Studies on Frege B.V. Birjukov, 2012-12-06. 1. The significance of the two papers by B. V. Birjukov on Frege within Soviet studies on logic and its history is indicated by G. I. Ruzavin and P. V. Tavanec in their article 'Fundamental Periods in the Evolution of Formal Logic' in the collective volume *Philosophical Questions of Contemporary Formal Logic*. There, on page 18, while the organization of systematic studies on the history of logic is proposed as one of the fundamental tasks for Marxist logicians, reference is made to a series of recent publications which suggest that such a task is already being accomplished.
