The Galactic Club Intelligent Life In Outer Space:

THE GALACTIC CLUB RONALD N. BRACEWELL, 1974 *The Galactic club* Ronald Bracewell (N.), 1921 **THE GALACTIC CLUB INTELLIGENT LIFE IN OUTER SPACE. RONALD N. BRACEWELL.** Ronald N. Bracewell, 1975 **NASA EP.** United States. National Aeronautics and Space Administration, 1968 **Unknowability** Nicholas Rescher, 2009-01-01

The realities of mankind's cognitive situation are such that our knowledge of the world's ways is bound to be imperfect. None the less, the theory of unknowability, agnoscology as some have called it, is a rather underdeveloped branch of philosophy. In this philosophically rich and groundbreaking work, Nicholas Rescher aims to remedy this. At the heart of the discussion is an examination of what Rescher identifies as the four prime reasons for the impracticability of cognitive access to certain facts about the world: developmental unpredictability, verificationist surdity, ontological detail, and predicative vagrancy. Rescher provides a detailed and illuminating account of the role of each of these factors in limiting human knowledge, giving us an overall picture of the practical and theoretical limits to our capacity to know our world.

The Protos Mandate Nick Kanas, 2014-07-26

In the 25th Century, the effects of overpopulation and global warming on Earth have led to the formation of human colonies on the Moon, Mars, and elsewhere in the Solar System. Yet the limited number of viable places forces humanity to look to the stars. A crash program has been developed to send Protos 1, a giant multigenerational star ship, to a newly discovered Earth-like planet orbiting a nearby star. The plan is for awake crewmembers to run the ship and for people in suspended animation to be roused before planet fall to use their skills in exploration and colony formation. To fulfill the goals of the mission and ensure that the in-flight population does not deplete the limited resources, the Protos Mandate is set up to govern a tightly controlled social system for the duration of the journey, which will take several generations. But problems threaten to sabotage the mission during its launch and transit, and what finally awaits the crewmembers shocks them in an unpredictable way. This novel chronicles the trials and tribulations of this epic first interstellar mission. The scientific appendix at the end of the book discusses the challenges of such an interstellar mission based on an extensive literature review and links these challenges to specific episodes in the novel. Issues that are considered include interstellar propulsion systems, economic considerations of interstellar flight, psychological and sociological factors inherent in a multigenerational space mission, problems with suspended animation, current knowledge of exoplanets, and issues related to colonizing a distant planet and the possible discovery of extraterrestrial life. A history of interstellar missions in science fiction is also reviewed.

Nick Kanas is an Emeritus Professor of Psychiatry at the University of California, San Francisco, where he directed the group therapy training program. For over 20 years, he conducted research on group therapy, and for nearly 20 years after that, he was the Principal Investigator of NASA-funded research on astronauts and cosmonauts. He is the co-author of *Space Psychology and Psychiatry*, which won the 2004 International Academy of Astronautics Life Science Book Award, and the author of *Humans in Space: The Psychological Hurdles*, which won the 2016 International Academy of Astronautics Life

Science Book Award Dr Kanas has presented talks on space psychology and on celestial mapping at several regional and Worldcon science fiction conventions A Fellow of the Royal Astronomical Society London he has been an amateur astronomer for over 50 years and is an avid reader of science fiction He is also the author of two non fiction books *Star Maps History Artistry and Cartography* and *Solar System Maps From Antiquity to the Space Age* and two science fiction novels *The New Martians* and *The Protos Mandate* all published by Springer

Exotheology Joel L. Parkyn, 2023-08-31 Since antiquity theology has frequently gone hand in hand with the study of the heavens Speculation regarding the plurality of worlds and the possibility of intelligent life beyond Earth has posed questions for and been stimulated by Christian theology Advancements in astronomy and astrophysics now reveal a vast universe containing trillions of galaxies Each new exoplanet discovered brings with it a new context in which to consider the place of humanity and the role of divinity in relation to creatures In particular the Christian doctrines of the incarnation and redemption must be understood afresh in light of the likelihood of extraterrestrial life In *Exotheology* Joel L Parkyn examines the twin historic developments in scientific and theological thought on extraterrestrials from antiquity to the twenty first century In doing so he demonstrates a consistent pattern of theological formulations that allow for a distinct relation between Christianity and extraterrestrial life but this has so far been without sufficient resolution Applying concepts from anthropology psychology and sociology to putative extraterrestrials he explores in new depth the implications of contact and argues for a divine pedagogy of potential modalities of supernatural presence and action with extraterrestrial intelligences

The UFO Experience Reconsidered Moon Books Schooner Moon Books, Robert L. Mason, 2008-02-01 This book was inspired by and is loosely based on *The UFO Experience A Scientific Inquiry* 1972 by the late Dr J Allen Hynek Dr Hynek's book is generally considered to be the most influential book ever written about UFOs but much has happened since 1972 This new book not only brings us up to date but extrapolates on current science whenever possible Perspectives are offered in three basic categories natural causes domestic technology and alien technology But perhaps more importantly a new way of looking at the phenomena is proposed that has been largely overlooked by other authors and which finds itself at home in any of these three possibilities The reader will not find discussion of conspiracy theories accounts of abductions or metaphysical and supernatural hypotheses However one will find speculations about possible alien visitations what alien technology might be capable of or what the distant future might hold
