Women Entrepreneurs Across Racial Lines Andrea Smith-Hunter, 2006-01-01 One of the strengths of this book lies in the admirable literature reviews throughout the volume The authors reviews vast amounts of literature on women entrepreneurs and more specifically studies involving women minority entrepreneurs The nature of this task should not be underestimated given the ever expanding academic field of entrepreneurship and women s entrepreneurship in particular I read this book as an academic and would argue that it is of most use for academics students and professors and provides an up to date and well researched portrait of women entrepreneurs in the USA and beyond this book fills an important gap in the literature not only because there is a growing population of women entrepreneurs but also because of the growing number of minority women entering entrepreneurship Jodyanne Kirkwood *Women in Management Review* This book serves an important purpose It draws attention to the need for further research on ethnic minority women entrepreneurs Anne de Bruin *International Small Business Journal* This monograph provides a very comprehensive study of women entrepreneurs in the US and in many industrialized and developing countries Recommended General readers all levels of students faculty and professionals E P Hoffman *Choice* In this book Andrea E Smith Hunter interweaves quantitative findings with qualitative depth resulting in an informative and objective report of explanatory variables differences and similarities among women entrepreneurs from unlike racial backgrounds Among others she develops models of human capital dimensions network structures and entrepreneurial success L o Paul Dana *Journal of International Entrepreneurship* Women entrepreneurs command an increasingly large presence at the international and national levels A significant part of

this impact is due to growing numbers of minority women becoming entrepreneurs This volume provides some of the most comprehensive data to date on the topic of women entrepreneurs across racial lines It offers a systematic and conceptual framework for understanding issues of network structures and human and financial capital analyzed through a comparative analysis of minority and white women entrepreneurs The book begins by looking at the historical and current contributions of women in the labor market as well as literature related to women entrepreneurs Subsequent chapters take a critical and in depth look at white and minority entrepreneurs Later chapters examine the status of women entrepreneurs in the US followed by various analyses of their position in the global marketplace The book concludes with a set of action tools to aid women entrepreneurs as they navigate the road to economic success Through a well chosen sample rich analysis and insightful accounts Andrea E Smith Hunter compellingly details the challenges and opportunities faced by women entrepreneurs in today s marketplace Government agencies researchers entrepreneurs and those involved with the financial aspects of entrepreneurial ventures will find this volume of great interest

Bosses in British Business F. R. Social Mobility in Industrial Society Seymour Martin

Lipset, Reinhard Bendix, 2024-06-21 Where else but in America captains of industry are fond of saying could a penniless immigrant like Andrew Carnegie achieve so much Any place else that has reached the same stage of industrial development is the answer implicit in Social Mobility The authors conclude somewhat surprisingly that it is not noticeably easier to pull oneself up by the bootstraps in the Land of Opportunity than it is in a number of other countries The very process of industrialization with its growing demands for skilled management prevents an elite in any nation from permanently establishing itself in a position of exclusive superiority Even in states where neither political institutions nor official ideologies favor upward mobility increasing industrialization requires a growing and consequently a changing elite class The authors are concerned primarily with mobility in the total population with movements into and out of the working class though they report extensively on the social origins of business leaders in various countries They deal too with the different values of different societies and with the motivation of the socially mobile Solidly based on examination of studies in more than ten languages and of raw data from unpublished works this is the first attempt in thirty years to bring together in one volume what is known of social mobility around the world Here is the first systematic comparison of mobility patterns in such diverse countries as Sweden and Italy Great Britain and Japan a comparison backed by statistics and given added meaning by discussions of the causes and consequences of mobility The authors analyze in detail the political implications of mobility and they explore the relationship between education and mobility Their discussions of factors making for success or failure in school of the role of intelligence in mobility of the effects on children of growing up in various environments and of the varying personalities of the mobile and non mobile bring together the work of both psychologists and sociologists This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1959 *The Commercial & Financial Chronicle ...* ,1918 **Machinery** ,1902 **Machinery** Lester Gray French,1901 British Business History, 1720-1994 J. F. Wilson,1995-10-15 This is the first textbook that comprehensively covers the three centuries of British business history from 1720 to the present day Wilson argues that company culture has been the most important component in the evolution of business organisations and management practices The influence of business culture on firms structure sources of finance and the background and training of senior managers is investigated to show its pivotal importance in determining business performance *Shopkeepers and Master Artisans in Nineteenth-Century Europe* Geoffrey Crossick, Heinz-Gerhard Haupt, 2016-07-01 First published in 1984 Shopkeepers and master artisans had a striking presence in the history of nineteenth century Europe not only in the development of industrial and urban economies but also the fabric of social life and the politics of protest The experience of 1848 the differing pace of various forms of nationalism and liberalism and at the end of the century the shift towards right

wing nationalist or Catholic political movements reflected a developing crisis in the petite bourgeoisie The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth century Europe
