*Small Boats and Big Seas* Ralph Stephenson, 1978      *Small Boats and Big Seas* Ralph Stephenson, 1978      Gordon Bennett and the First Yacht Race Across the Atlantic Sam Jefferson, 2016-02-25 The 1866 transatlantic yacht race was a match that saw three yachts battle their way across the Atlantic in the dead of winter in pursuit of a 90 000 prize Six men died in the brutal and close fought contest and the event changed the perception of yachting from a slightly effete gentlemen s pursuit into something altogether more rugged and adventurous The race also symbolized the beginning of America s gilded age with its associated obscene wealth and largesse the 90 000 prize put up by the three contestants is about 15 million in today s money as well as the thawing of relations between the US and UK The narrative focuses on the victorious yacht Henrietta and her owner James Gordon Bennett Bennett was the son of the multimillionaire proprietor of the New York Herald and a notorious playboy His infamous stunts included driving his carriage through the streets of New York naked tipping a railway porter 30 000 and turning up at his own engagement party blind drunk and mistaking the fire for a urinal which led to the coining of the phrase Gordon Bennett However Bennett was also a serious yachtsman and had served with distinction during the civil war aboard Henrietta and he was the only owner to be aboard his own boat during the race Other characters include Bennett s captain Samuel Samuels legendary clipper skipper ex convict and occasional vaudeville actor financier Leonard Jerome aboard Henrietta as race invigilator he also happened to be grandfather to Winston Churchill and Stephen Fisk a journalist so desperate to cover the race that he evaded a summons to appear as a witness in court and instead smuggled himself aboard Henrietta in a crate of champagne Using the framework of the race to discuss the various historical themes there s ample drama and the diverse and eccentric range of characters ensure that this is a book laced with plenty of human interest scandal and adventure      **Cruising World** ,1979-01      **Sea History** ,2000      **The Future of British Sea Power** Geoffrey Till, 1984-06-18      **The Golden Age of Yachting** L. Francis Herreshoff, 2022-06-15 The Golden Age of Yachting presents a panoramic view of yachting providing an insightful introduction to the pleasures craft and history of the sport with emphasis on the era of the great steam yachts It is a meticulous account based on accurate knowledge and detailed research Most yachting histories have been so much influenced by the nationality of the author that the British and American versions are quite different but L Francis Herreshoff was equally familiar with both sides He has given a much more factual account of the international races than can be found in other writings This book will appeal to the large group of amateur and professional seamen who strive to keep alive the traditions and lore of sail The book was first published by Sheridan House in 1963 under the title *An Introduction to Yachting* and reprinted in 1980 The title of this new paperback edition *The Golden Age of Yachting* more accurately reflects the treasures found in this magnificent volume      *The Publishers' Trade List Annual* ,1979      *Selection of Recent Books Published in Great Britain* 1940-Apr. 1941 ,1978      *The British Library General Catalogue of Printed Books 1976 to 1982* British Library, 1983      *Appletons' Annual*

R. Buckminster Fuller, The documents in this series originated with a proposal made by R Buckminster Fuller to the International Union of Architects I U A at their VIIth Congress in London England in July 1961 launching the World Design Science Decade He proposed then that the architectural schools around the world be encouraged by the I U A to invest the next ten years in a continuing problem of how to make the total world s resources which in 1961 serve only 40% serve 100% of humanity through competent design despite a continuing decrease of metal resources per capita In essence The World Design Science Decade series of documents suggests in great detail ways in which world architectural schools and specifically their students should initiate and assume The Design Science Decade The total series includes many of Fuller s most prescient ideas A note from the series editor John McHale Though the language of some of the texts may seem difficult at first approach it should be borne in mind that one of our major problems in thinking today 1965 is the use of language systems which still represent a fixed structurally compartmentalized world view The terms available to us for the expression of dynamic rather than static concepts are far from satisfactory Fuller s language is particularly representative of the transitional state of the western world between the older traditional noun centered culture to its present day changing verb centered culture In his search for an adequately descriptive terminology he tends to employ concepts and usages from many different fields juxtaposed in ways which may be unfamiliar to those more customarily restrained within the vocabularies of particular disciplines Description by the Buckminster Fuller Institute courtesy of The Estate of R Buckminster Fuller
