Small-Scale Steelmaking R. D. Walker, 2012-12-06 The contents of this volume cover all the major activities associated with small scale steelmaking in mini steelworks except Direct Reduction on which two comprehensive volumes have recently appeared see refs 11 a survey of raw materials supply being followed by independent analyses of arc furnace practice casting and rolling The volume is rounded off by a consideration of the important topics of energy costs and environmental factors As anyone associated with iron and steelmaking well knows the industry is not the exclusive preserve of the metallurgist although he plays a prominent role in its activities For this reason it is hoped that the level of treatment will commend the book to a wide readership that includes non metallurgical professionals in plant management and elsewhere as well as industrial metallurgists Lecturers in universities polytechnics and colleges of further education should find this volume useful as a course reader for final year and postgraduate studies of steelmaking **The Burgeoning LDC Steel Industry**, 1979
