## **Small Change For The Long Haul:**

From Polarisation to Multispecies Relationships Janet J. McIntyre-Mills, Yvonne Corcoran-Nantes, 2021-08-05 This book explores the concept of multi species relationships and suggests critical systemic pathways to protect shared habitats This book discusses how the eradication of species as a result of rapid urbanisation places humanity at risk This book demonstrates how narrow anthropocentrism has focused on the rights of human beings at the expense of other species and the environment This book explores a priori norms and a posteriori measures and indicators to include and protect multiple species This book aims to strengthen institutional capacity and powers to address and extend the UN 2030 Sustainable Development Agenda by drawing on local wisdom but also the need to implement laws to prevent ecocide This book highlights that our fragile interdependence requires a recognition of our hybridity and interconnectedness within the web of life and suggests ways to reframe policy within and beyond the nation state to support living systems of which we are a strand

**Transformation from Wall Street to Wellbeing** Janet McIntyre-Mills, 2014-09-02 Transformation from Wall Street to Well being Joining up the dots through Participatory democracy and governance to mitigate the causes and adapt to the effects of climate change addresses accountable leadership supports collective interests ethical governance and fairness to future generations in order to develop systemic approaches relevant to these issues The humanistic focus whilst central addresses how we see ourselves in relation to the environment It explores cultural perspectives in developed and developing parts of the world where people have a closer connection with the natural environment in comparison to those who live in cities Furthermore the book discusses participatory action research to prefigure a means to hold the market to ensure that the use of resources that are necessary for the common good are accessible and equitable The essential systemic aim this book offers is to balance human needs with nature The research summarizes the discourses and the adaptive praxis in order to develop a bridge between cosmopolitan ethics and cosmopolitan governance It does this in the interest of supporting and using cultural designs for living that support quality of life and spans five core domains as explained by the author Overall this monograph helps evaluate the extent to which the introduced approaches enable the community to consider their perceived assets and risks and the implications of their consumption choices

**Mixed Methods and Cross Disciplinary Research** Janet McIntyre-Mills, Norma R. A. Romm, 2019-07-12 This book uses mixed methods to extend the concept of wellbeing stocks to refer to dynamic ways of working with others It addresses metaphors and praxis for weaving together strands of experience The aim of the wellbeing stocks concept is to enable people to re evaluate economics and to become more aware of the way in which we neglect social and environmental aspects of life The pursuit of profit at the expense of people and the environment is a central problem for democracy and governance The vulnerability of cities is a symptom of the lack of balance between individual and collective needs This book explores the potential for cities specifically in the regions of Indonesia Africa and Australia to become more productive as sites for food and water security through more

creative use of technology It highlights the need for partners that see food and security feasible at the household level if supports are provided at the community national and international level The book examines how these regions are affected by demographics climate change and people movements but also explores ways to establish an effective cultural ecosystem management

Interest-Growth Differentials and Debt Limits in Advanced Economies Philip Barrett, 2018-04-11 Do persistently low nominal interest rates mean that governments can safely borrow more To address this question I extend the model of Ghosh et al 2013 to allow for persistent stochastic changes in nominal interest and growth rates The key model parameter is the long run difference between nominal interest and growth rates if negative maximum sustainable debts debt limits are unbounded I show how both VAR and spectral based methods produce negative point estimates of this long run differential but cannot reject positive values at standard significance levels I calibrate the model to the UK using positive but statistically plausible average interest growth differentials This produces debt limits which increase

by only around 5% GDP as interest rates fall after 2008 In contrast only a tiny change in the long run average interest growth differential from the 95th to the 97 5th percentile of the distribution is required to move average debt limits by the same amount     **Intermediate Microeconomics with Applications** Aroop K. Mahanty,2014-05-10 Intermediate

Microeconomics with Applications describes the methods and practicality of microeconomics specifically the actual empirical models This book is divided into 17 chapters and begins with discussions of the principles and concept of utility preference indifference and revenue analysis demand and production The succeeding chapters deal with the production theory the applications of linear programming theory of costs and profits Other chapters explore the fundamentals of perfect and imperfect competition the issues of pricing and decision making under uncertainty The final chapters discuss some factors of production and marketing the link between the so called general equilibrium and welfare economics and some economic regulation This book will be of value to economists and business managers     Accounting for Tastes Gary Stanley

BECKER,Gary S Becker,2009-06-30 Economists generally accept as a given the old adage that there s no accounting for tastes Nobel Laureate Gary Becker disagrees and in this lively new collection he confronts the problem of preferences and values how they are formed and how they affect our behavior He argues that past experiences and social influences form two basic capital stocks personal and social He then applies these concepts to assessing the effects of advertising the power of peer pressure the nature of addiction and the function of habits This framework promises to illuminate many other realms of social life previously considered off limits by economists     Cutting Ties with Your Parents Sharon Martin,2024-10-01

Estrangement from one or both parents even by choice can take a huge emotional and psychological toll Guilt or questioning the decision and trouble with setting or keeping boundaries can prevent a person from thriving and finding peace This compassionate workbook offers proven effective strategies to help readers accept their decision heal emotional wounds and develop healthy and supportive relationships as they move forward in their lives     **Managing Software for Growth** Roy

W. Miller,2004 Helps managers combat the manufacturing mindset that dominates business thinking and shows why this mindset is harmful to software development Introduces predictability to the historically unpredictable world of software development Allows organizations to improve job satisfaction by fostering an environment of creativity among developers
