Smart Business Networks:

Smart Business Networks Peter H.M. Vervest, Eric van Heck, Ken Preiss, Louis-Francois Pau, 2004-09-06 Scientists from management and strategy information systems engineering and telecommunications have discussed a novel concept Smart Business Networks They see the future as a developing web of people and organizations bound together in a dynamic and unpredictable way creating smart outcomes from quickly re configuring links between actors The question is What should be done to make the outcomes of such a network smart that is just a little better than that of your competitor More agile with less pain with more return to all the members of the network now and over time The technical answer is to create a business operating system that should run business processes on different organisational platforms Business processes would become portable The end to end management of processes running across many different organizations in many different forms would become possible This book presents you the outcomes of an energizing and new direction in management science

Networked Digital Technologies, Part II Filip Zavoral, Jakub Yaghob, Pit Pichappan, Eyas El-Qawasmeh, 2010-06-30 On behalf of the NDT 2010 conference the Program Committee and Charles University in Prague Czech Republic we welcome you to the proceedings of the Second International Conference on Networked Digital Technologies NDT 2010 The NDT 2010 conference explored new advances in digital and Web technology applications It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of Web technology and Internet applications We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future The conference received 216 papers out of which 85 were accepted resulting in an acceptance rate of 39% These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications Each paper was evaluated by a minimum of two reviewers Finally we believe that the proceedings document the best research in the studied areas We express our thanks to the Charles University in Prague Springer the authors and the organizers of the conference

Digital Enterprises Henderik A. Proper, Bas van Gils, Kazem Haki, 2023-11-14 This book explores different aspects of and provides concrete suggestions to meet the three main challenges for becoming a Digital Enterprise the transition to the digital age the emergence of service ecosystems and the growing role of data as a key underlying resource As a result of these intertwined and mutually amplifying trends today's enterprises are confronted with several challenges that profoundly impact their design from the definitions of products and services offered to their clients via the business processes that deliver these products and services to the underlying IT infrastructure The contributions which are written by leading enterprise architecture researchers and managers of large corporations cover four key aspects which form each one part of the book Part I presents experiences how different enterprises currently already need to embrace and exploit new challenges like blockchain customer centric services or value co creation networks Part II looks at the need for a new design logic i.e. the need for new ways of thinking regarding the design of enterprises Part

III is concerned with the coordination needed among different stakeholders of the ensuing continuous transformations Part IV eventually reflects on the ongoing consequences for enterprise modeling as used to capture both the current affairs of an enterprise as well as design study its possible future affairs The target audience of this book are both master and PhD level students who want to gain insights into key aspects of the challenges confronting digital enterprises as well as enterprise architects and information managers working in enterprises that are on their way to become digital **The Network**

Experience Peter H.M. Vervest, Diederik W. van Liere, Li Zheng, 2008-10-14 Digital networking technologies are empowering organizations to form dynamic networks generating exceptional or smart results These Smart Business Networks SBNs enable individual organizations to compete more effectively and to respond better to a changing world This idea attracted a diverse group of academic scholars and business professionals to Beijing from May 19 23 2008 hosted by Tsinghua University They discovered new ways to manage network resources operate business processes across a network create a business operations platform understand the importance of network position and the smart mastering of technology Effective managers they concluded must have a firm understanding of these fundamental network concepts in order to orchestrate the networks of the future This book presents the results of an intense and energizing event which resulted in new theoretical foundations and practical insights Coordination in Service Value Networks Benjamin Sebastian Blau, 2011

Globalization of Professional Services Ulrich Bäumer, Peter Kreutter, Wolfgang Messner, 2012-06-05 In the past services had a strong local and national focus Professional services were very likely to be independently and autonomously organized from country to country in order to cater to local needs and local legal requirements This has since changed radically and highly integrated business and delivery models around the globe have become the status quo in clients businesses and strategies Serving clients on a global level requires professional services firms to adopt a structural change from local to distributed global sales and delivery This book brings together many years of experience current perspectives and future ideas of international business practitioners academics and market researchers Along those lines it is structured into four parts Part I Winning Strategies and Innovative Ideas lays the book's foundation it discusses core strategies behind the globalization movement and introduces the major paradigms and ideas Part II Successful Processes for Realization provides solutions for how to establish successful processes for delivering global professional services Part III Inspired Talent Management goes to the core of the professional services industry attracting developing and keeping the right talent in the right locations Finally Part IV offers Experiences and Case Studies on all aspects related to successfully building a globalized professional services firm In short this handbook provides professional services firms and their clients alike with a sound foundation for responding strategically to fundamental global changes and turning them into business advantages It offers a comprehensive perspective of why and how to successfully globalize a professional services firm *Smart Business Networks* Peter H.M. Vervest, Eric van Heck, Ken Preiss, Louis-Francois Pau, 2005-12-14 Scientists from management and

strategy information systems engineering and telecommunications have discussed a novel concept Smart Business Networks They see the future as a developing web of people and organizations bound together in a dynamic and unpredictable way creating smart outcomes from quickly re configuring links between actors The question is What should be done to make the outcomes of such a network smart that is just a little better than that of your competitor More agile with less pain with more return to all the members of the network now and over time The technical answer is to create a business operating system that should run business processes on different organisational platforms Business processes would become portable The end to end management of processes running across many different organizations in many different forms would become possible This book presents you the outcomes of an energizing and new direction in management science *Agile Network Businesses* Vivek Kale,2017-07-20 A highly readable and yet comprehensive book on network businesses that have become governable with the advent of cloud and big data computing Vivek Kale is a master of simplifying the complex world of network theory and its relevance to business Jagdish N Sheth Charles H Kellstadt Professor of Marketing Emory University *Agile Network Businesses* Collaboration Coordination and Competitive Advantage reflects the shift from traditional networks to virtual and agile networks that enable businesses to operate dynamically thereby representing markets more closely This book enables IT managers and business decision makers to understand clearly what network businesses and enterprises are what they can do for them and how to realize them Customers in geographically dispersed markets are demanding higher quality products in a greater variety at lower cost and in a shorter time Thus enterprises have moved from a few centralized and vertically integrated facilities to geographically dispersed networks of capabilities competencies and resources which are the core of network businesses Enterprises are now constructing more fluid network businesses in which each member facility focuses on differentiation and relies increasingly on its partners suppliers and customers to provide the rest Network businesses have emerged as an organizational paradigm for collaboration and coordination across loosely connected individual organizations This pragmatic book Introduces network solutions and distributed systems that are a first step towards enabling a network enterprise It also gives a detailed description of networks and agent system that have paved the road to network enterprises Describes the basics of service oriented architecture SOA cloud computing and big data that are essential to network enterprises Details the distinguishing aspects of network enterprises which include virtual enterprises management of network enterprises and collaborative network enterprises Covers such major application areas as supply manufacturing e business platform social and wireless sensor networks Introduces decision networks in the context of supply chain networks This book reinterprets the traditional supply chain in terms of the flow of decisions information and materials which leads to reconfiguring the traditional supply chain network into mutually separate decision networks e g fourth party logistics or 4PL information networks e g wireless sensor networks and logistics networks e g third party logistics or 3PL

Business Aspects of Web Services Christof Weinhardt,Benjamin Blau,Tobias Conte,Lilia Filipova-Neumann,Thomas

Meinl, Wibke Michalk, 2011-11-10 Driven by maturing Web service technologies and the wide acceptance of the service oriented architecture paradigm the software industry's traditional business models and strategies have begun to change software vendors are turning into service providers In addition in the Web service market a multitude of small and highly specialized providers offer modular services of almost any kind and economic value is created through the interplay of various distributed service providers that jointly contribute to form individualized and integrated solutions This trend can be optimally catalyzed by universally accessible service orchestration platforms service value networks SVNs which are the underlying organizational form of the coordination mechanisms presented in this book Here the authors focus on providing comprehensive business oriented insights into today's trends and challenges that stem from the transition to a service led economy They investigate current and future Web service business models and provide a framework for Web service value networks Pricing mechanism basics are introduced and applied to the specific area of SVNs Strategies for platform providers are analyzed from the viewpoint of a single provider and so are pricing mechanisms in service value networks which are optimal from a network perspective The extended concept of pricing Web service derivatives is also illustrated The presentation concludes with a vision of how Web service markets in the future could be structured and what further developments can be expected to happen This book will be of interest to researchers in business development and practitioners such as managers of SMEs in the service sector as well as computer scientists familiar with Web technologies The book's comprehensive content provides readers with a thorough understanding of the organizational economic and technical implications of dealing with Web services as the nucleus of modern business models which can be applied to Web services in general and Web service value networks specifically Virtual and Networked Organizations, Emergent Technologies and Tools Goran D. Putnik, Maria Manuela Cruz-Cunha, 2012-07-25 This book constitutes the thoroughly refereed post conference proceedings of the First International Conference on Virtual and Networked Organizations Emergent Technologies and Tools ViNOrg 2011 held in Ofir Portugal in July 2011 The 35 revised full papers presented were carefully reviewed and selected from over 60 initial submissions The papers cover a wide range of topics such as ubiquitous computing and organizations cloud computing and architectures grid computing human computer interfaces serious games data mining Web services cognitive systems social networks and other emergent IT IS approaches in various function domains such as decision support systems planning design control negotiation marketing management and many other in the context of virtual and networked enterprises and organizations **Collaborative Networks for a Sustainable World** Luis M. Camarinha-Matos, Xavier Boucher, Hamideh Afsarmanesh, 2010-10-02 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins as the changes needed for sustainability exceed the capacity and capability of any individual actor In recent years there has been a growing awareness both in the political sphere and in civil society including the business sectors on the importance of

sustainability Therefore this is an important and timely research issue not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and governing those systems The discipline of collaborative networks especially which has already emerged in many application sectors shall play a key role in the implementation of effective sustainability strategies PRO VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area The conference dressed models infrastructures support tools and governance principles developed for collaborative networks as important resources to support multi stakeholder sustainable developments Furthermore the challenges of this theme open new research directions for CNs PRO VE 2010 held in St Collaborative Networks of Cognitive Systems Luis M. Camarinha-Matos, Hamideh Afsarmanesh, Yacine Rezgui, 2018-09-06 This book constitutes the refereed proceedings of the 19th IFIP WG 5.5 Working Conference on Virtual Enterprises PRO VE 2018 held in Cardiff UK in September 2018 The 57 revised full papers were carefully reviewed and selected from 143 submissions They provide a comprehensive overview of identified challenges and recent advances in various collaborative network CN domains and their applications with a strong focus on the following areas blockchain in collaborative networks industry transformation and innovation semantics in networks of cognitive systems cognitive systems for resilience management collaborative energy services in smart cities cognitive systems in agribusiness building information modeling industry 4.0 support frameworks health and social welfare services risk privacy and security collaboration platform issues sensing smart and sustainable enterprises information systems integration dynamic logistics networks collaborative business processes value creation in networks users and organizations profiling and collaborative business strategies **Agile Information Systems** Kevin C. Desouza, 2007 The Editor Kevin Desouza has organized the chapters under three categories discussion of the concept of agile information systems i.e. defining agile information management its attributes antecedents consequences etc discussion of information systems within the context of agility i.e. descriptions of agile information systems and their attributes how to build agile information systems etc discussion of organizational management issues in the context of agile information systems i.e. how to prepare the organization for agile information systems management of agile information systems for improved organizational performance etc This is the first book to address the hot topic of agile information systems Contributions break new ground and provide concrete applications for practice Contributors include highly respected academics from around the world **Context-Aware Systems and Applications** Phan Cong Vinh, Le Tuan Anh, Nguyen Thi Thuy Loan, Waralak Vongdoiwang Siricharoen, 2017-04-10 This book constitutes the proceedings of the 5th International Conference on Context Aware Systems and Applications ICCASA 2016 held in Thu Dau Mot Vietnam in November 2016 The 22 revised full papers presented were carefully selected from 35 submissions and cover a wide spectrum in the area of Context Aware Systems CAS CAS is characterized by its self facets such as self organization self configuration self healing self optimization self protection where context awareness used to

dynamically control computing and networking functions The overall goal of CAS is to realize nature inspired autonomic systems that can manage themselves without direct human interventions **The Network Challenge (Chapter 12)** Colin Crook, 2009-05-19 Complexity theory offers valuable insights into the interactions of complex systems such as networked enterprises Complexity theory addresses the network effects that result from interactions between many individual actors This chapter examines the implications of this theory for business and how these effects influence key management areas such as making sense strategy and organization The author explores issues such as fads and crowds using information and technology and the use of agent based simulations Finally he explores the shifts in management thinking and business education needed to utilize complexity theory a shift in mental models that may be crucial to success in a networked world

Pervasive Collaborative Networks Luis M. Camarinha-Matos, Willy Picard, 2008-08-27 COLLABORATIVE NETWORKS Becoming a pervasive paradigm In recent years the area of collaborative networks is being consolidated as a new discipline Camarinha Matos Afsarmanesh 2005 that encompasses and gives more structured support to a large diversity of collaboration forms In terms of applications besides the traditional sectors represented by the advanced supply chains virtual enterprises virtual organizations virtual teams and their breeding environments new forms of collaborative structures are emerging in all sectors of the society Examples can be found in e government intelligent transportation systems collaborative virtual laboratories agribusiness elderly care silver economy etc In some cases those developments tend to adopt a terminology that is specific of that domain often the involved actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks For instance the grid community adopted the term virtual organization but focused mainly on the resource sharing perspective ignoring most of the other aspects involved in collaboration The European enterprise interoperability community which was initially focused on the intra enterprise aspects is moving towards inter enterprise collaboration Collaborative networks are thus becoming a pervasive paradigm giving basis to new socio organizational structures On the Move to Meaningful Internet Systems: OTM 2013 Workshops Yan Tang Demey, Herve Panetto, 2013-09-25 This volume constitutes the refereed proceedings of the international workshops Confederated International Workshops OTM Academy OTM Industry Case Studies Program ACM EI2N ISDE META4eS ORM SeDeS SINCOM SMS and SOMOCO 2013 held as part of OTM 2013 in Graz Austria in September 2013 The 75 revised full papers presented together with 12 posters and 5 keynotes were carefully reviewed and selected from a total of 131 submissions The papers are organized in topical sections on On The Move Academy Industry Case Studies Program Adaptive Case Management and other non workflow approaches to BPM Enterprise Integration Interoperability and Networking Information Systems in Distributed Environment Methods Evaluation Tools and Applications for the Creation and Consumption of Structured Data for the e Society Fact Oriented Modeling Semantics and Decision Making Social Media Semantics Social and Mobile Computing for collaborative environments cooperative information systems Ontologies Data

Bases and Applications of Semantics **Design Science Research. Cases** Jan vom Brocke, Alan Hevner, Alexander Maedche, 2020-09-23 Design Science Research is a powerful paradigm enabling researchers to make important contributions to society and industry Simply stated the goal of DSR is to generate knowledge on how to find innovative solutions to important problems in the form of models methods constructs and instantiations Over the past 20 years the design science research DSR paradigm has developed into an established paradigm in Information Systems Research and it is of strong uptake in many other disciplines including Management Science and Computer Science This book provides a collection of twelve DSR cases presented by experienced researchers in the field It offers readers access to real world DSR studies together with the authors reflections on their research processes These cases will support researchers who want to engage in DSR and represent a valuable addition to existing introductions to DSR methods and processes Readers will learn from the hands on experiences of respected experts who have conducted extensive DSR in a range of application contexts

Managing Knowledge for Global and Collaborative Innovations Samuel Kai Wah Chu, Samuel Chu, 2010 Networked and interconnected world improving communication collaboration and knowledge sharing between people and organization is very important This book provides an insight into knowledge management practices and their applications to a wide range of complex issues *Breaking the Ice between government and business* ,
