## **Smart Tennis How To Play And Win The Mental Game:**

*Smart Tennis* John F. Murray, 1999-03-22 The game with yourself is often tougher than the battle against any opponent. *Smart Tennis* shows you how to win the inner match while having fun along the way. Lindsay Davenport, world's 1-ranked player for 1998, becomes a more competent and confident tennis player. *Smart Tennis* is the secret weapon that tucks right into your tennis bag. Apply these proven principles of sport psychology to your game and gain a winning advantage both on and off the courts. *Smart Tennis* is a must for players at all levels, from beginners to Wimbledon champions. An outstanding book for understanding and improving your mental game. Vic Braden, tennis telecaster and researcher. If you ever want to use the title of this book to describe how you played your last match, then *Smart Tennis* is for you. David Higdon, senior writer, *Tennis Magazine*. This is an excellent book of psychological skills that can be immediately applied on the tennis court. E. Paul Roetert, Ph.D., Administration of Sports Science, United States Tennis Association. *Tennis Mindset* Bill Allen, Ph.D., 2018-11-15 *Tennis Mindset* explains three characteristics of skillful performance: tranquility, mental attentiveness, and effortless action, and teaches three transferable techniques to cultivate them: nasal breathing, meditation on the ball, and mind fasting. **Sensei Tennis** Mark A. Beede, John Nelson, 2018-07-31 Martial arts carries as integral components time-honored principles of personal mastery and athletic performance. Tennis, the sport for a lifetime, has much to learn from accepting and adhering to basic martial arts fundamentals, not only physically and technically but also personally, emotionally, and psychologically. Examining martial arts sheds light on common denominators of athletic performance which transfer and apply to every sport. An athlete cannot fulfill his potential without focusing on the full panoply of fundamentals: physically, tangible, and the psychologically and emotionally intangible. Mastering tennis requires completely committing to each and every fundamental, including those that improve attitude and learning skills. Mastering each fundamental represents a journey into improvement and excellence, not only for tennis and martial arts as specific disciplines but also for overall personal fulfillment and mastery in life. Embrace a learning mind set and look for the opportunity to learn from everything. Learn purposefully and with discipline. Stay in the present and focus on what is happening now. Dispense with your ego and go with the flow, fearing nothing. Stay calm and relaxed as the moment is the only thing. Feel yin and yang flow and force. Breathe fully, relaxing in the present without the self, without fear, and with the mind and body as one. Be ready. Look to the greatest threat. Move from the ground, staying balanced. Set up and use the earth's power to stroke from the ground, driving and rotating through the legs, hips, core, shoulders, arm, and racket. Mastering these fundamentals unlocks the power of action, unleashing the fulfilling power of the self. Paradoxically, dispensing with the self's ego leads to self-actualization and fulfillment. Learn and master these fundamentals, and you'll not only become a much better tennis player, you'll become a better learner, performer, and athlete. Much more importantly, you'll become a better person. **The Tennis Brain** Federico Di Carlo, 2016-12-17 Most times tennis players and athletes in general finish the competition unhappy about their

performances They feel that the potential was there but a hidden force prevented them from achieving a feel good performance Performances however are never usually black and white Most times athletes feel as though they were going through flows flash in flash out phases Falls during performance are conventionally defined slumps and are among the most hated between athletes above all when they feel that the main reason for slumps is not due to technical tactical or athletic flash outs but rather to the mental components of the sport activity In The Tennis Brain you will find the following Journey inside the processes and functions of the human brain Find a neuroscientific based evidence for theories on the mind and conscious processes Discover why the game of tennis is so prone to mind influences Understand how the mind processes influence tennis game specific situations Learn how to synchronize brain body and mind for best tennis in match performance Book Endorsements This work by Federico Di Carlo is a cornerstone among the contemporary research on cognitive neuroscience The reader is introduced to the exploration and a step by step understanding of the brain and mind mechanisms Through a fascinating journey in the world of tennis the author motivates the reader to discover and change wrong behaviours in a positive way This is a complete manual useful to both tennis professionals and fans as well as to anyone aspiring to achieve better results in the game of life Renzo Ardiccioni associate professor of communication Universit du Maine France Drawing upon a great number of studies as well as on the authors personal experience Tennis Brain brings together neurosciences and tennis practice challenging the readers to critically reconsider some of their habits and beliefs Di Carlo summarises the extensive research produced in the last three decades and makes it accessible to a wider audience bringing our understanding of key mental aspects of tennis out of the realm of empirical opinions and into the realm of science and knowledge Tennis Brain can actually guide the readers to develop their own critical thinking and to learn to improve Alessandro Bruinen Serio PhD founder of RISED Research for Integrative and Sustainable Development Since the first time we met I was really impressed with Di Carlo well founded opinion genuine love and immense enthusiasm for a neuroscientific driven tennis which comes out from every single page of The Tennis Brain Starting from a presentation of the structural and physiological mechanisms of the nervous system and the psychological assets of the mind Federico Di Carlo uses the tennis court to change the tennis player mind to a positive thinking and correct competitive mentality For scientific consistency I compared my thinking on the book with other readers and I received a similar feedback The Tennis Brain actually might represent a benchmark in the developing field of cognitive neuroscience applied to sport coaching Prof Salvatore Guccione Department of Drug Sciences University of Catania
