*The Spread of Economic Ideas* David C. Colander, Alfred W. Coats, Alfred William Coats, 1993-01-29 This book first published in 1989 contains a spirited debate between eminent economists, journalists and publishers about the spread of economic ideas. The examination of the flow of ideas among economists and from economists to the public is followed by a discussion of the public policy use and abuse of these concepts.

*The Diffusion of Western Economic Ideas in East Asia* Malcolm Warner, 2016-12-19 This book examines the diffusion of economic ideas in East Asia, assessing the impact of external ideas on internal theory and practice. It considers economists from Adam Smith onwards, including Marx, Keynes, Hayek, and contemporary economists, and covers the subject both historically and also includes present day and likely future developments. The book covers all the major countries of East Asia and pays particular attention to specific economists who have had a strong impact in specific countries and to important developments in economic theory in East Asia, exploring how far these have been driven by Western economic ideas. This book will be welcomed by students and scholars of East Asia and South East Asia, as well as those interested in economics, economic history and management.

*The Spread of Economic Ideas and the Political Economy Paradigm Shift in Eastern Europe* Paul Dragoş Aligićă, 2004 The fast political and economic transition from communism to democracy and market economy in Eastern Europe in the 1990s has been preceded by a lengthy and yet unfinished transition in the realm of economic and political ideas. The change in the realm of ideas was the basic precondition and one of the major forces that set into motion the transformations leading to the collapse of the communist regime and the emergence on its ruins of a liberal order. The dissertation is an attempt to explore one specific aspect of this change of ideas phenomenon: the political economy paradigm shift. The study traces the process of diffusion of Western economic ideas during the ten years before and after 1989 through a comparative examination of nine East European countries. It systematically investigates, using expert surveys, content analysis and international databases, the institutions, networks and channels associated to this process. The study goes beyond a descriptive account and examines the paradigm shift by applying it a series of theories, models and interpretive frameworks meant to identify the mechanisms and processes through which the most fundamental ideas about institutional order are selected. The result is not only a systematic description of how the Western political economy ideas diffused in Eastern Europe but also an assessment of the factors and mechanisms facilitating or hindering this process.

*History of Economic Thought* Lewis Henry Haney, 1920

**The Politics of Ideas and the Spread of Enterprise Zones** Karen Mossberger, 2000 Using the spread of enterprise zones as a case study, this book explores how policy ideas are diffused amongst states. Taking the adoption of such zones as a way of regenerating the inner cities, the book traces the decision making process through five states.
