Peter Gries challenges the view that partisan elites on Capitol Hill are out of touch with a moderate American public. Dissecting a new national survey Gries shows how ideology powerfully divides Main Street over both domestic and foreign policy and reveals how and why with the exception of attitudes toward Israel liberals consistently feel warmer toward foreign countries and international organizations and desire friendlier policies toward them than conservatives do. *The Politics of American Foreign Policy* weaves together in depth examinations of the psychological roots and foreign policy consequences of the liberal conservative divide the cultural socio racial economic and political dimensions of American ideology and the moral values and foreign policy orientations that divide Democrats and Republicans. Within this context the book explores why Americans disagree over US policy relating to Latin America Europe the Middle East East Asia and international organizations such as the UN. Although more than a century has passed since the end of the Victorian era the great achievements of the period 1837-1901 are grossly undervalued. Phrases such as Victorian monstrosity are bandied about by many who ought to know better. Professor Curl's robustly argued and beautifully illustrated book shows that the Victorians produced confident colourful rumbustiously eclectic architecture and that they went further than anyone since Roman times to potty train Urban Man. He deals with the palette of styles available to the Victorians unprecedented building types new materials ecclesiastical buildings that arguably were superior to mediaeval exemplars the responses of a vital society to contemporary challenges and puts the built fabric firmly within the context of the intellectual complexities of the age. Wearing his learning lightly he presents his case with grace gusto and elegance bringing the Victorian period to new life in a work which will give readers much to ponder savour and enjoy.
