unaufgeklärt geblieben. Das Ergebnis ist das Bild einer vielgestaltigen sinfonischen Landschaft Großbritanniens, das die ästhetischen Perspektiven der einzelnen Komponisten wie auch ihre soziokulturellen Kontexte erhellt. Ein umfangreiches Verzeichnis aller bekannten Werke und eine ausführliche Bibliographie laden zu weiterer Erkundung des Sujets ein. Only in relatively recent times has any real attention been given to British symphonies. So a comprehensive survey showing what exists and how the situation in the United Kingdom developed from the beginnings in the 18th century until well into the 20th century is long overdue. The preliminary survey presented here shows how a British symphonic identity gradually took shape over more than a century through influences from abroad and at home. Enterprising attempts to find new ways of expression. By the end of the 19th century British symphonists had produced an impressive body of work, yet only with the appearance of Elgar's two symphonies in the following decade did this flourishing school find a champion of international renown. In this publication light is shone on those works that have to some extent been overshadowed as well as on those that have remained unpublished or unperformed. The result is a multi-faceted panorama of British symphonism offering many insights into the composers' thinking and their socio-cultural contexts. A comprehensive catalogue of all known works and an extensive bibliography invite readers to delve further into the subject.

**Improving Birth Outcomes** Institute of Medicine, Board on Global Health, Committee on Improving Birth Outcomes, 2003-11-28. Birth outcomes have improved dramatically worldwide in the past 40 years. Yet there is still a large gap between the outcomes in developing and developed countries. This book addresses the steps needed to reduce that gap. It reviews the available statistics of low birth weight, prematurity, and birth defects; reviews current knowledge and practices of a healthy pregnancy; identifies cost-effective opportunities for improving birth outcomes and supporting families with an infant handicapped by birth problems; and recommends priority research, capacity building, and institutional and global efforts to reduce adverse birth outcomes in developing countries. The committee has based its study on data and information from several developing countries and provides recommendations that can assist the March of Dimes, Centers for Disease Control and Prevention, and NIH in tailoring their international program and forging new partnerships to reduce the mortality and morbidity associated with adverse birth outcomes.
