M. Flinders Petrie, 2018-11-26 When in the end of 1880 I first started for Egypt I had long been preparing for the expedition during a couple of years before that measuring instruments theodolites rope ladders and all the impedimenta for scientific work had been prepared and tested To start work under circumstances so different from those of any European country and where many customary appliances were not to be obtained required necessarily much prearrangement and consideration though on the whole my subsequent experience has been that of decreasing the baggage and simplifying one's requirements The first consideration on reaching Egypt was where to be housed In those days there was no luxurious hotel close to the pyramids if any one needed to live there they must either live in a tomb or in the Arab village As an English engineer had left a tomb fitted with door and shutters I was glad to get such accommodation When I say a tomb it must be understood to be the upper chamber where the Egyptian fed his ancestors with offerings not the actual sepulchre And I had three rooms which had belonged to separate tombs originally the thin walls of rock which the economical Egyptian left between his cuttings had been broken away and so I had a doorway in the middle into my living

room a window on one side for my bedroom and another window opposite for a store room I resided here for a great part of two years and often when in draughty houses or chilly tents I have wished myself back in my tomb No place is so equable in heat and cold as a room cut out in solid rock it seems as good as a fire in cold weather and deliciously cool in the heat

Ten Years' Digging in Egypt, 1881-1891 W. M. Flinders Petrie, 2021-06-10 Ten years digging in Egypt 1881 1891 by W M Flinders Petrie Found and studied during his decade in Egypt Sometimes he s busy offering critiques of the pyramid builders marvelling at the genius of some specifically in the perfection of their measurements the laziness of others the imperfection of their measurements sometimes he s delighting in the technology used to cut and drill stone for the pyramids sometimes he s growing bored with his most recent discovery and moving on sometimes he s doing the dirty work of a dig sometimes he s belittling the Fellah he hires to do the backbreaking labour but he is always trying to uncover meaning in the antiquities he discovers at least the ones he is interested in Many consider Flinders Petrie the father of archaeology because he was the first to take seriously the need for systematic methodology at digs and there is no denying his contribution in this area of archaeology But the surprisingly positive opinions of Flinders Petrie must be tempered with his numerous faults **Ten years' digging in Egypt, 1881-1891** W.
