Tense Reference And Worldmaking:

Tense, Reference, and Worldmaking James A. McGilvray, 1991-09-09 Using Reichenbach's 1947 theory of tenses and temporal structures as a point of departure McGilvray modifies it to produce a theory of his own Analysing the difficulties Reichenbach's theory has in explaining the relationship of a speaker to a world he introduces a new model for this relationship based on the three interval temporal topology that Reichenbachian theory assigns to the sentences of natural languages McGilvray explains and defends in detail Reichenbach's theory of tense and temporal structure criticising and rejecting the major rival theory found in tense logic He also applies Reichenbach's nonstandard topology to English showing that it is correct for the language A significant aspect of McGilvray's study is the supplementing of Reichenbach's topology by including speakers sentences situations and things spoken about with the temporal intervals McGilvray relocates and reinterprets a prime source of faulty intuitions concerning time and tense our feeling that the past present and future must be thought of in terms of the settled the immediate and the unsettled He uses his theory to explain the temporal and semantic structure of complex constructions in English including propositional attitudes modals and conditionals As well he adapts the structure that Reichenbach's theory assigns to sentences to the aspects perfective complete and imperfective incomplete The novel view of temporal and semantic structure developed by McGilvray touches on virtually all the puzzles concerning the philosophy of language meaning and meaningfulness the nature of reference truth propositions and worldmaking His emphasis is on how the speaker by articulating sentences and understanding them is both free and constrained free to describe something which can be located at any time and in any world but constrained by the beliefs evidence information and commitments held or made at the time of speech

Tense, Reference, and Worldmaking

James Alasdair McGilvray, 1991 The tenses of natural languages are intimately connected with the abilities we have to relate real or fictional stories that take place outside our immediate temporal or spacial context While philosophers and cognitive scientists have had difficulty coming to terms with these abilities James McGilvray maintains that they must be understood before an adequate view of what a tense is can be constructed

Meier, Helen Aristar-Dry, Emilie Destruel, 2009-10-20 Carlota S Smith was a key figure in linguistic research and a pioneering woman in generative linguistics This selection of papers focuses on the research into tense aspect and discourse that Smith completed while Professor of Linguistics at the University of Texas at Austin Smith's early work in English syntax is still cited today and her early career also yielded key research on language acquisition by young children Starting in the mid 1970s after her move to UT she embarked on her most important line of research In numerous papers the first of which was published in 1975 and in a very important 1991 book *The Parameter of Aspect* Smith analyzed how languages encode time and how they encode the ways events and situations occur over time Smith's work on the expression of time in language is notable because of its careful analyses of a number of quite different languages including not only English and French but also Russian Mandarin and Navajo Inspired by a year in France in the early 1970s Smith began to analyze the differing ways in which languages encode time and how they encode the ways events and situations occur over time In doing so she developed her signature two component theory of aspect This model of temporal aspect provided an excellent framework for graduate students seeking to analyze the temporal systems of an array of languages including under described languages that are so much the focus of research in UT's Linguistics Department Selected by Carlota Smith herself and by her longtime friends and colleagues this book contains her 1980 piece on temporal structures in discourse her 1986 comparison of the English and French aspectual systems a 1996 paper on the aspect system in Navajo an increasingly endangered language which Smith worked to preserve and her 1980 and 1993 papers on the child's acquisition of tense and aspect Smith who died in 2007 was a trailblazer in her field whose broad interests fed into her scholarly research She was an avid reader who sought to bring the analytic tools of linguistics to the humanistic study of literature by examining the syntactic and pragmatic principles which underlie literary effects Her research on rhetorical and temporal effects in context was integrated into her last book *Modes of Discourse* 2003 The current volume of articles covers much of her most fruitful work on the way in which language is used to express time and will be essential reading for many working and studying in linguistics generally and in semantics particularly Adverbials Jennifer R. Austin, Stefan Engelberg, Gisa Rauh, 2004 Adverbials have become an important testing ground for research on the interfaces between syntax semantics and pragmatics The articles selected for this volume present recent research on this topic Among the issues addressed are the occurrence of adverbials in various domains of the sentence Mittelfeld left and right periphery adverbials in front of gaps and the influence of the discourse context on the interpretation and position of adverbials Particular classes of adverbials that are discussed include domain

locative temporal manner transparent and degree adverbials Beyond the exploration of these topics the volume reflects the current debate between proponents of semantic driven approaches to the positioning of adverbials which assume adverbials to be adjuncts and approaches that claim a primacy of syntax in conceiving of adverbials as specifiers in a universally valid hierarchy of functional projections

The Targeting System of Language Leonard Talmy, 2024-04-09 A proposal that a single linguistic cognitive system targeting underlies two domains of reference anaphora speech internal and deixis speech external In this book Leonard Talmy proposes that a single linguistic cognitive system targeting underlies two domains of linguistic reference those termed anaphora for a referent that is an element of the current discourse and deixis for a referent outside the discourse and in the spatiotemporal surroundings Talmy argues that language engages the same cognitive system to single out referents whether they are speech internal or speech external Talmy explains the targeting system in this way as a speaker communicates with a hearer her attention is on an object to which she wishes to refer this is her target To get the hearer s attention on it as well she uses a trigger a word such as this that here there or now The trigger initiates a three stage process in the hearer he seeks cues of ten distinct categories uses these cues to determine the target and then maps the concept of the target gleaned from the cues back onto the trigger to integrate it into the speaker s sentence achieving comprehension The whole interaction Talmy explains rests on a coordination of the speaker s and hearer s cognitive processing The process is the same whether the referent is anaphoric or deictic Talmy presents and analyzes the ten categories of cues and examines sequences in targeting including the steps by which interaction leads to joint attention A glossary defines the new terms in the argument
