The Concept of Nature in Science and Theology Niels Henrik Gregersen, Michael W. S. Parsons, Christoph Wassermann, 1997 *How Do We Know?* Dirk Evers, Antje Jackelen, Taede Smedes, 2010-04-15 A study on the relationship between science and theology with respect to epistemological differences between religious belief and scientific knowledge

Time & Eternity Antje Jackelen, 2005-06-28 What is time Is there a link between objective knowledge about time and subjective experience of time And what is eternity Does religion have the answer Does science Antje Jackelen investigates the problem and concept of time Her analysis of the subject includes The notion of time and eternity as it is narrated through Christian hymn books stemming from Germany Sweden and the English speaking world with insights into changes of the concept and understanding of time in Christian spirituality over the past few decades Theological approaches to time and eternity as well as a look at Trinitarian theology and its relation to time The discussion of scientific theories of time including Newtonian relativistic quantum and chaos theories The formulation of a theology of time a theological mathematical model incorporating relational thinking oriented towards the future the doctrine of trinity and the notion of eschatology Description of the editor *Teologi og naturvidenskab* Viggo Mortensen, 1989 Signs of Meaning in the Universe Jesper Hoffmeyer, 1997-02-22 From reviews for the bestselling Danish edition dashing and idiomatic language that is a pleasure to read Berlingske Tidende an appetizer and eye opener Hoffmeyer is a modernistic pioneer in the wide open spaces of the natural sciences Politiken extremely well written and interesting manifesto for a bioanthropology Inf It should be read by anyone who likes to be wiser and at the same time to be challenged in his habitual conception of the relations between culture and nature Weekend Avisen On this tour of the universe of signs Jesper Hoffmeyer travels back to the Big Bang visits the tiniest places deep within cells and ends his journey with us complex organisms capable of speech and reason What propels this journey is Hoffmeyer's attempt to discover how nature could come to mean something to someone by telling the story of how cells tissue organs plants animals even entire ecosystems communicate by signs and signals *The Study of Science and Religion* Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i.e. how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction *Gyldendals religionsleksikon* :
