Terracotta Figurines from Kourion in Cyprus , by John Howard Young and Suzanne Halstead Young John Howard Young, Suzanne Halstead Young, 1955 **A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD** John

Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation

The Cyprus Collections in the Medelhavsmuseet Medelhavsmuseet (Stockholm, Sweden), Vassos Karageorghis, Sanne Houby-Nielsen, Paul Åström, 2003

Ancient Cypriote Art in the Musée D'art Et D'histoire, Geneva Vassos Karageorghis, 2004 **Archaic Greek Equestrian Sculpture** Mary Ann Eaverly, 1995 This welcome volume examines the use and meaning of equestrian statues in Archaic Greece relying not only on a full catalog of the sculptures but also on the rich comparative material in the literary and archaeological remains Previous works have either crowded this important material into a large study of all equestrian statues everywhere or else have examined only those few that belong

to the Athenian Acropolis It has therefore been difficult to characterize the style and distribution of this sculpture let alone examine them within their cultural milieu Mary Ann Eaverly carries out precisely these important tasks The first half of the volume identifies the unique characteristics of equestrian statues as a type apart from other Archaic sculpture The author places the sculptures within their historical and cultural context and considers critical factors such as cultic activity aristocratic symbolism and the influence of Peisistratos The second half of the volume is a catalog that discusses all the extant pieces individually Archaic Greek Equestrian Sculpture will be of interest to students and scholars of Greek sculpture the Greek artistic heritage and the complex history of Archaic Greece

The Swedish Cyprus Expedition: pt.3.The Hellenistic and Roman periods in Cyprus,by O.Vessberg and A.Westholm Svenska Cypern expedition,1934

Terracotta Figurines from Kourion in Cyprus John Howard,1955 **Archaic Cyprus** A. T. Reyes,1994 This book examines the textual and archaeological evidence for the history of Cyprus from 750 to 500 BC This significant period of the island s past is examined in three parts The first surveys what is known about the local population of Cyprus and the political and social organization of the island The second offer a narrative account of the period within a chronological framework more detailed than any analysis currently available It suggests that the defining feature of the Cypro Archaic period was the way in which local kingdoms adapted to different political and economic conditions in the Near East and Egypt and took advantage of them It challenges the prevalent view of a succession of foreign overlords controlling the island through military means The third part discusses the internal and external relations of Cyprus by studying specific groups of pottery seals and sculpture As a whole this book provies a more complete picture of Archaic Cyprus than ever previously attempted Generously illustrated with plates and figures this will be an invaluable work of reference for archaeologists and ancient historians of both the West and Near East

Phoenicia J. Brian Peckham,2014-10-30 Phoenicia has long been known as the homeland of the Mediterranean seafarers who gave the Greeks their alphabet But along with this fairly well known reality many mysteries remain in part because the record of the coastal cities and regions that the people of Phoenicia inhabited is fragmentary and episodic In this magnum opus the late Brian Peckham examines all of the evidence currently available to paint as complete a portrait as is possible of the land its history its people and its culture In fact it was not the Phoenicians but the Canaanites who invented the alphabet what distinguished the Phoenicians in their turn was the transmission of the alphabet which was a revolutionary invention to everyone they met The Phoenicians were traders and merchants the Tyrians especially thriving in the back and forth of barter in copper for Levantine produce They were artists especially the Sidonians known for gold and silver masterpieces engraved with scenes from the stories they told and which they exchanged for iron

and eventually steel and they were builders like the Bybians who taught the alphabet and numbers as elements of their trade. When the Greeks went west the Phoenicians went with them. Italy was the first destination, settlements in Spain eventually followed, but Carthage in North Africa was a uniquely Phoenician foundation. The Atlantic Spanish settlements retained their Phoenician character, but the Mediterranean settlements in Spain, Sicily, Sardinia, and Malta were quickly converted into resource centers for the North African colony of Carthage, a colony that came to eclipse the influence of the Levantine coastal city states. An emerging independent Western Phoenicia left Tyre free to consolidate its hegemony in the East. It became the sole west Asiatic agent of the Assyrian Empire. But then the Babylonians let it all slip away and the Persians, intent on war and world domination, wasted their own and everyone's time trying to dominate the irascible and indomitable Greeks. The Punic West, Carthage, made the same mistake until it was handed off to the Romans. But Phoenicia had been born in a Greek matrix and in time had the sense and good grace to slip quietly into the dominant and sustaining Occidental culture. This complicated history shows up in episodes and anecdotes along a frangible and fractured timeline. Individual men and women come forward in their artifacts, amulets, or seals. There are king lists and alliances, companies and city assemblies. Years or centuries are skipped in the twinkling of an eye, and only occasionally recovered. Phoenicia, like all history, is a construct, a product of historiography, an answer to questions. The history of Phoenicia is the history of its cities in relationship to each other and to the peoples, cities, and kingdoms who nourished their curiosity and their ambition. It is written by deduction and extrapolation, by shaping hard data into malleable evidence, by working from the peripheries of their worlds to the centers where they lived, by trying to uncover their mentalities, plans, beliefs, suppositions, and dreams in the residue of their products and accomplishments. For this reason, the subtitle *Episodes and Anecdotes from the Ancient Mediterranean* is a particularly appropriate description of Peckham's masterful posthumous volume, the fruit of a lifetime of research into the history and culture of the Phoenicians.

Earthly Paradises Maureen Carroll, 2003. The cultivation of gardens played an integral role in both the public and private spheres of the ancient world. Whether grown as sources of food, symbols of wealth and prestige, or as dwellings for the gods, gardens were nurtured at every level of society. In this beautifully illustrated book, Maureen Carroll examines the most recent evidence for the existence, functions, and designs of gardens from the second millennium B.C. to the middle of the first millennium A.D. in the cultures of the ancient Near East, Egypt, Greece, Italy, and the provinces of the Roman Empire. She looks at gardens in their many forms, including house gardens, orchards, and parks, sacred gardens, and cemetery gardens, and dedicates a chapter to gardens in ancient poetry. She also discusses ancient horticultural practices and the role of gardeners, concluding with a chapter on the survival of ancient gardening traditions in the Islamic and Byzantine worlds, and the perception and depiction of paradise in those cultures. Evidence is drawn from archaeological excavations, which can reveal the remains of gardens that were never mentioned in written sources, as well as from textual, pictorial, and environmental sources. Illustrated with delightful images from tomb and wall paintings, sculptural reliefs, and manuscripts, as

well as with informative reconstructions and plans this book provides fascinating insights into the earthly paradises of antiquity Book jacket
