are weeds adapted to are considered then there are only about 13 French agriculture Others may be limited endemic species in the British Isles while 1000 not by the sea but by the climate species are endemic to Spain Nevertheless the example of Ireland However the poverty of the British flora is which was isolated much earlier than the rest not a unique phenomenon The whole of of the British Isles does show the effect of north western Europe an area including isolation because it does have a much poorer northern France and much of Germany and flora and fauna

The Ecology of Urban Habitats

Oliver Gilbert, 2012-12-06 This book is about the plants and animals of urban areas not the urban fringe not encapsulated countryside but those parts of towns where man's impact is greatest The powerful anthropogenic influences that operate in cities have until recently rendered them unattractive to ecologists who find the high proportion of exotics and mixtures of planted and spontaneous vegetation bewildering They are also unused to considering fashion taste mowing machines and the behaviour of dog owners as habitat factors I have always maintained however and I hope this book demonstrates that there are as many interrelationships to be uncovered in a flower bed as in a field in a cemetery as on a sand dune and due to the well documented history of urban sites together with the strong effects of management they are frequently easier to interpret than those operating in more natural areas The potential of these communities as rewarding areas for study is revealed in the literature on the pests of stored products urban foxes and birds The journals of local natural history societies have also provided a rich source of material as amateurs have never been averse to following the fortunes of their favourite groups into the heart of our cities It is predictable that among the few professionals to specialize in this discipline have been those

enclosed in West Berlin who must be regarded as among the leading exponents of urban ecology
