

The background of the entire image is a complex, abstract geometric composition. It features a dense arrangement of overlapping planes, lines, and shapes in a palette of bright yellow, vibrant green, and deep red. The perspective is dynamic, with many elements appearing to recede or advance, creating a sense of depth and movement. The overall effect is reminiscent of a cubist or constructivist architectural drawing.

The Fourth Dimension And Non Euclidean Geometry In Modern Art:

The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak *The Fourth Dimension and Non-Euclidean Geometry in Modern Art* Linda D. Henderson, *The Fourth Dimension and Non-Euclidean Geometry in Modern Art 4th Dimension and Non-Euclidean Geometry in Modern Art* Linda Dalrymple Henderson, 1983 [The Visual Mind II](#) Michele Emmer, 2005 This collection of essays by artists and mathematicians continues the discussion of the connections between art and mathematics begun in the widely read first volume of *The Visual Mind* in 1993 **BOOK JACKET** **Hyperspace** Michio Kaku, 2016 Reissued in new covers this is the runaway bestseller from one of the world's leading theoretical physicists Are there other dimensions beyond our own Is time travel possible Michio Kaku takes us on a tour of the most exciting work in modern physics including research into the 10th dimension time warps and multiple universes to outline what may be the leading candidate for the Theory of Everything *Futurist Conditions* David Mather, 2020-10-29 Italian futurism visualized diverse types of motion which had been rooted in pervasive kinetic and vehicular forces generated during a period of dramatic modernization in the early 20th century Yet as David Mather's sweeping intellectual and art historical scholarship demonstrates it was the camera not the engine that proved to be the primary invention against which many futurist ideas and practices were measured Overturning several misconceptions about Italian futurism's interest in the disruptive and destructive effects of technology *Futurist Conditions* provides a refreshing update to the historical narrative by arguing that the formal and conceptual approaches by futurist visual artists reoriented the possibly dehumanizing effects of mechanized

imagery toward more humanizing spiritual aims Through its sustained analysis of the artworks and writings of Umberto Boccioni Giacomo Balla and the Bragaglia brothers dating to the first decade after the movement's founding in 1909 Mather's account of their obsession with kinetic motion pivots around a 1913 debate on the place and relative import of photography among traditional artistic mediums a debate culminating in the expulsion of the Bragaglias but one that also prompted a range of productive responses by other futurist artists to world changing social political and economic conditions

Situational Aesthetics Victor Burgin, 2009 The essays in this volume provide a succinct overview of Victor Burgin's multifaceted work during the last forty years from its origins in debates within conceptual art to its present concern with everyday perception in the environment of global media

Before Einstein Elizabeth L. Throesch, 2017-01-02 Before Einstein brings together previous scholarship in the field of nineteenth century literature and science and greatly expands upon it offering the first book length study of not only the scientific and cultural context of the spatial fourth dimension but also the literary value of four dimensional theory In addition to providing close critical analysis of Charles Howard Hinton's Scientific Romances 1884 1896 Before Einstein examines the work of H G Wells Henry James and William James through the lens of four dimensional theory The primary value of Hinton's work has always been its literary and philosophical content and influence rather than its scientific authority It is certain that significant late nineteenth century writers and thinkers such as H G Wells William James Olive Schreiner Karl Pearson and W E B Du Bois read Hinton Others including Henry James Joseph Conrad and Ford Madox Ford were familiar with his ideas Hinton's fourth dimension appealed to scientists spiritualists and artists and particularly at the end of the nineteenth century the interests of these different groups often overlapped Truly interdisciplinary in scope Before Einstein breaks new ground by offering an extensive analysis of four dimensional theory's place in the shared history of Modernism

Making Images Move Gregory Zinman, 2020-01-03 Making Images Move reveals a new history of cinema by uncovering its connections to other media and art forms In this richly illustrated volume Gregory Zinman explores how moving image artists who worked in experimental film pushed the medium toward abstraction through a number of unconventional filmmaking practices including painting and scratching directly on the film strip deteriorating film with water dirt and bleach and applying materials such as paper and glue This book provides a comprehensive history of this tradition of handmade cinema from the early twentieth century to the present opening up new conversations about the production meaning and significance of the moving image From painted film to kinetic art and from psychedelic light shows to video synthesis Gregory Zinman recovers the range of forms tools and intentions that make up cinema's shadow history deepening awareness of the intersection of art and media in the twentieth century and anticipating what is to come
