The French Descent Into Renaissance Italy 1494 95 Antecedents And Effects:

The French Descent Into Renaissance Italy, 1494-95 David Abulafia, 1995 This work questions the assumption that the French invasion of Italy under Charles VIII in 1494 95 inaugurated a new and wretched era in Italian history It focuses anew on the intricate politics of Renaissance Italy and the long history of Angevin attempts to impose their rule in Southern Italy

The French Descent Into Renaissance Italy, 1494-95 David Abulafia, 1995 **Collecting Art in the Italian Renaissance Court** Leah R. Clark, 2018-06-28 This book presents a new perspective on the Italian Renaissance court by examining the circulation collection and exchange of art objects **Communes and Despots in Medieval and**

Renaissance Italy John E. Law, 2016-12-05 Building on important issues highlighted by the late Philip Jones this volume explores key aspects of the city state in late medieval and Renaissance Italy particularly the nature and quality of different types of government It focuses on the apparently antithetical but often similar governmental forms represented by the republics and despotisms of the period Beginning with a reprint of Jones s original 1965 article the volume then provides twenty new essays that re examine the issues he raised in light of modern scholarship Taking a broad chronological and geographic approach the collection offers a timely re evaluation of a question of perennial interest to urban and political historians as well as those with an interest in medieval and Renaissance Italy **The Charlemagne Legend in Medieval**

Latin Texts William J. Purkis, Matthew Gabriele, 2016 Essays on the various manifestations of Charlemagne and his legends This book explores the multiplicity of ways in which the Charlemagne legend was recorded in Latin texts of the central and later Middle Ages moving beyond some of the earlier canonical raw materials such as Einhard s *Vita Karoli Magni* to focus on productions of the eleventh to fifteenth centuries A distinctive feature of the volume s coverage is the diversity of Latin textual environments and genres that the contributors examine in their work including chronicles liturgy and pseudo histories as well as apologetical treatises and works of hagiography and literature Perhaps most importantly the book examines the many lives that Charlemagne was believed to have lived by successive generations of medieval Latin writers for whom he was not only a king and an emperor but also a saint a crusader and indeed a necrophiliac William J Purkis is a Senior Lecturer in Medieval History at the University of Birmingham Matthew Gabriele is an Associate Professor of Medieval Studies in the Department of Religion Culture at Virginia Tech Contributors Jeffrey Doolittle Matthew Gabriele Miguel Dolan G mez Oren Margolis William J Purkis Andrew J Romig Sebasti n Salvad Jace Stuckey James Williams **City Walls** James D. Tracy, 2000-09-25 The essays presented in this volume first published in 2000 describe a phenomenon so widespread in human time and space that its importance is easily overlooked City walls shaped the history of warfare the mobilisation of manpower and resources needed to build them favoured some kinds of polities over others and their massive strength appropriately ornamented created a visual language of authority Previous collective volumes on the subject have dealt mainly with Europe but the historians and art historians who collaborate here follow a comparative agenda The millennial practice

of wall building that branched out from the ancient Near East into India Europe and North Africa shows continuities and points of contact of which the makers of urban fortifications were scarcely aware separate traditions in China sub Saharan Africa and North America illustrate universal themes of defensive strategy and the symbolism of power each time embedded in a distinctive local context

The City-State in Europe, 1000-1600 Tom Scott,2012-02-09 No detailed comparison of the city state in medieval Europe has been undertaken over the last century Research has concentrated on the role of city states and their republican polities as harbingers of the modern state or else on their artistic and cultural achievements above all in Italy Much less attention has been devoted to the cities territorial expansion why how and with what consequences cities in the urban belt stretching from central and northern Italy over the Alps to Switzerland Germany and the Low Countries succeeded or failed in constructing sovereign polities with or without dependent territories Tom Scott goes beyond the customary focus on the leading Italian city states to include for the first time detailed coverage of the Swiss city states and the imperial cities of Germany He criticizes current typologies of the city state in Europe advanced by political and social scientists to suggest that the city state was not a spent force in early modern Europe but rather survived by transformation and adaption He puts forward instead a typology which embraces both time and space by arguing for a regional framework for analysis which does not treat city states in isolation but within a wider geopolitical setting

Vauban Under Siege Jamel Ostwald,2007 Vauban under Siege is the first systematic comparison of the theory of Vauban siegecraft with its reality contrasting military engineering s pursuit of the efficient siege with generals contradictory search for rapid conquest purchased at the cost of additional lives

Escaping the Deadly Embrace Andrea Bartoletti,2022-11-15 Encirclement Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war Using historical case studies Escaping the Deadly Embrace examines how great powers try to escape the two front war problem and seek to preserve their security Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power The surrounding great powers may not have the capacity to initiate a joint invasion Yet their threatening presence triggers a double security dilemma for the encircled great power which has to disperse its army to secure its borders When the surrounding great powers become capable of launching a two front attack the encircled great power initiates war This situation disastrous in itself can also lead to war contagion when other great powers intervene in the new conflict owing to the rival based network of alliances Combining archival work and historiographical analysis Escaping the Deadly Embrace demonstrates the efficacy of this by assessing three major wars the Italian Wars the Thirty Years War and World War I These findings Bartoletti shows have important implications for future major wars Challenging the current focus on the US China rivalry he argues that the most concerning strategic scenario is the encirclement of China by India and Russia

The Artillery of the Dukes of Burgundy, 1363-1477 Robert Douglas Smith,Kelly DeVries,2005 A major new exploration of the history and development of gunpowder weapons in the 15th century

based on the artillery of the Dukes of Burgundy The four Valois Dukes of Burgundy created in little more than a century a fabulously wealthy and independent state Their centralised control and chancellery have bequeathed to us a vast treasure trove of documents including accounts and inventories of the Masters of the artillery under the later Dukes Although many of these were extracted and transcribed in the late nineteenth century modern historians have largely ignored their unprecedented insights into fifteenth century guns and their use When Charles the Bold the last Valois Duke took on the combined Swiss confederate forces in 1476 he lost not just the battles and his personal fortune but much of his artillerytrain as well Of the dozens of cannons captured at least 25 pieces survive in Swiss museums The documents that survive from the Valois state give us almost for the first time in medieval Europe the ability to see the course of history in a period when Europe was undergoing some of the most profound changes before the 20th century The Artillery of the Dukes of Burgundy is the first attempt to combine all these sources bringing newand fresh insights into the development and use of artillery in the fifteenth century Moreover this is the first modern study of medieval cannon one of the most important discoveries of the post classical world KELLY DeVRIES has authored numerous books and articles on medieval warfare ROBERT DOUGLAS SMITH formerly Head of Conservation in the Royal Armouries Tower of London is an acknowledged expert on medieval artillery This study is thefirst major fruit of their combined researches
