The Canadian Family in Crisis John F. Conway, 2003-08 In this book sociology professor John F Conway looks at families past present and future and examines the changing nature of family Figures from the first decade of the new millennium tell us that one marriage in two may well end in divorce Conway considers the implications of divorce the impact of social changes on men women and children and suggests how these issues might be better addressed through family policy The new edition addresses the harsh new reality facing Canadian families especially those most vulnerable as a result of the crisis of the family The Canadian Family in Crisis is the first book to examine the drastic changes in the Canadian family over the last thirty years

**The Future of the Family** Daniel Patrick Moynihan, Timothy Smeeding, Lee Rainwater, 2004-10-06 High rates of divorce single parenthood and nonmarital cohabitation are forcing Americans to reexamine their definition of family This evolving social reality requires public policy to evolve as well The Future of the Family brings together the top scholars of family policy headlined by editors Lee Rainwater Tim Smeeding and in his last published work the late Senator Daniel Patrick Moynihan to take stock of the state of the family in the United States today and address the ways in which public policy affects the family and vice versa The volume opens with an assessment of new forms of family discussing how reduced family income and lower parental involvement can disadvantage children who grow up outside of two parent households The book then presents three vastly dissimilar recommendations each representing a different segment of the political spectrum for how family policy should adapt to these changes Child psychologist Wade Horn argues the case of political conservatives that healthy two parent families are the best way to raise children and therefore should be actively promoted by government initiatives Conversely economist Nancy Folbre argues that government's role lies not in prescribing family arrangements but rather in recognizing and fostering the importance of caregivers within all families conventional or otherwise Will Marshall and Isabel Sawhill borrow policy prescriptions from the left and the right arguing for more initiatives that demand personal responsibility from parents as well as for an increase in workplace flexibility and the establishment of universal preschool programs The book follows with

commentary by leading policy analysts Samuel Preston Frank Furstenberg Jr and Irwin Garfinkel on the merits of the conservative and liberal arguments Each suggests that marriage promotion alone is not enough to ensure a happy healthy and prosperous future for American children who are caught up in the vortex of family change They agree that government investments in children however can promote superior developmental outcomes and even potentially encourage traditional families by enlarging the pool of marriageable individuals for the next generation No government action can reverse trends in family formation or return America to the historic nuclear family model But understanding social change is an essential step in fashioning effective policy for today s families With authoritative insight The Future of the Family broadens and updates our knowledge of how public policy and demography shape one another

**Power, Intimacy, and the Life Story** Dan P. McAdams, 1988-01-01 Who am I And how do I fit into the world These are the questions individuals ask themselves to make sense of their lives Power Intimacy and the Life Story addresses the human quest for identity The author reinterprets some of the classic writings in psychology as he shows how each of us constructs a life story in order to meet the identity challenge and create a sense of unity and purpose in our lives Written for the social scientist practicing clinician educated layperson and student this compelling study describes how we construct stories that are organized by the two general life themes of power and intimacy Using the results of questionnaires and interviews with both college students and older adults the author illustrates an innovative way of understanding human lives in literary terms

**Resiliency Models and Addressing Future Risks for Family Firms in the Tourism Industry** Zehrer, Anita, Glowka, Gundula, Schwaiger, Katrin Magdalena, Ranacher-Lackner, Victoria, 2021-05-07 Family owned and family run firms which are mostly small and medium

sized enterprises are important when it comes to tourist destinations. It is therefore essential to understand how family firms address future risks and the challenges they face as part of the tourism industry. Since family businesses play such an important role for the entire tourism industry, it is worthwhile to analyze this business type when it comes to organizational resilience. Further, the development of practical solutions from field or case studies are beneficial for creating valuable learning effects for both firms and destinations alike. The examination of one risk scenario and its successful or missing management might be beneficial to create useful learning effects for the future. Therefore, it is essential to understand contemporary issues and future challenges of family firms in the hospitality service industry and to examine different perspectives at an individual firm and destination management level. *Resiliency Models and Addressing Future Risks for Family Firms in the Tourism Industry* provides an in-depth examination of tourism family firms since these firms are essential for supplying solutions for challenges such as dealing with uncertainty, becoming or remaining resilient, and creating sustainable tourism destinations. The chapters address the challenges of sustainability and resilience in an uncertain world and connect knowledge from family business research to tourism research focusing on hospitality. Highlighted topics include organization, ambidexterity, pandemic risk, firm management and leadership, and technology use in firm operations. This book is essential for family firms, hotel management, entrepreneurs, restaurateurs, tourism professionals, academicians, researchers, and students seeking the most advanced research on family firms' resilience and risk management within the tourism industry.

*Complex Adoption and Assisted Reproductive Technology*, 2001-03-07. New pathways to parenthood are being traveled by growing numbers of couples and single adults, including many who face medical and social barriers to having children. From a psychological standpoint, families formed by complex adoption and assisted reproductive technology (ART) are first and foremost just that: families. Yet they also face a unique array of issues and challenges that may be clarified and resolved in the therapeutic setting. This much-needed book provides a deeper understanding of the ways that complex adoption and ART shape the life experience of children and parents, identifying important areas and methods for assessment and treatment. Combining developmental and ecological research with in-depth case material, the book establishes an integrative framework for clinical practice. The authors draw upon knowledge and skills gained from working in a variety of new family contexts. In the area of adoption, many new options have evolved that differ from traditional practices of adoption at birth. Thousands of older children in foster and institutional care in the United States and abroad are awaiting permanent placements. Open adoption, kinship adoption, and transracial adoption are also transforming family life, as is the use of ART, which raises significant issues of family identity and family process. The book explores such key themes as the significance of early experience, the capacity to recover from exposure to trauma, the impact of heredity, and the difference that environment can make, and the centrality of primary attachment relationships. Also discussed are the impact of bias and other issues affecting families of difference, including lesbian and gay families. Concluding chapters consider promising future directions.

for training and research This is an important resource for social workers family therapists clinical psychologists psychiatrists and other professionals working with children and families as well as researchers and students in these fields It will serve as a text in advanced undergraduate and graduate level courses
