The Future of Text and Image Ofra Amihay, Lauren Walsh, 2012-01-17

The question of the relation between the visual and the textual in literature is at the heart of an increasing number of scholarly projects and in turn the investigation of evolving visual verbal dynamics is becoming an independent discipline This volume explores these profound literary shifts through the work of twelve talented and in some cases emerging scholars who study text and image relations in diverse forms and contexts The inter medial conjunctures investigated in this book play with and against the traditional roles of the visual and the verbal The Future of Text and Image presents explorations of the incorporation of visual elements into works of literature of visual writing modes and of the textuality and literariness of images It focuses on the special potential literature offers for the combination of these two functions Alongside examinations of major forms and genres such as memoirs novels and poetry this volume expands the discussion of text and image relations into more marginal forms for
