The Gamesman The New Corporate Leaders:

The Gamesman Michael Maccoby, 1976 The gamesman Michael Maccoby, 1976 Intensive interviews with two hundred and fifty managers from twelve major companies provide the basis for portraits of current American business leaders and a study of their characters familial and other relationships ambitions methods and conflicts **Technical Report** ,1981

Strategic Intelligence Michael Maccoby, 2015 Michael Maccoby is a globally recognised expert in leadership Drawing on his experience and multi disciplinary understanding in this book he explains the concept of Strategic Intelligence and the tools that equip leaders to improve and transform organizations Management Education and Humanities Barbara Czarniawska-Joerges, 2006 Academics and managers who strive for a humanistic management education usually care for people but they are challenged by sophisticated intellectual subjects and practical problems The authors experience competence and commitment enables them to present an extensive coverage of important views and an in depth study of these issues Eduard Bonet ESADE Spain This volume is a timely initiative It resonates with important questions on globalization and its consequences on the unrelenting quest for efficiency and productivity on recent corporate scandals and on the responsibilities of managers and management education This book is a manifesto for an intellectual revolution In a complex and open world managers often bump into the limits of the decontextualized tools associated with mainstream management knowledge and practice Managers have to navigate in a world that is not only economic but also political cultural shaped by history and ethical traditions and preoccupations not only as a mark of social capital but really as a way to enhance their managerial skills and efficiency The role of management education should be to prepare them for that odyssey and this volume tells us that humanities could be a powerful tool in that sense This project is served by a highly legitimate international panel of contributors who collectively point towards an alternative for management thinking and management education Marie Laure Djelic ESSEC Business School France Management Education and Humanities argues that management teachers and researchers seem to be increasingly dissatisfied with the way managers are usually educated in western countries It claims that educational practices and methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices and debates the role that humanism and humanities might play in the formation of new managerial lites The book examines three themes that have emerged as central to the contemporary debate on management education the profession of management humanism as a philosophy and worldview and the humanities as an academic field where management schools could find new inspirations for curricula All three themes are scrutinized in a frame of reference extended between two different points of view the traditional view with its tendency to idealize and even sometimes romanticize humanism the humanities and management as a social function and the past modern view which is inclined to skepticism and to the deconstruction of social and cultural phenomena Providing a lively account of this ongoing debate and exploring new trends and experiences in management education this book will be invaluable reading for teachers

students and researchers of management management strategy and organizational behaviour Lonely at the Top Thomas Joiner, 2011-10-25 Men appear to enjoy many advantages in society on average they make more money have more power and enjoy a greater degree of social freedom than women But many men pay a high price for the pursuit of success and power Taking family and friends for granted men will often let relationships take a back seat to their professional ambitions only to ultimately find themselves with few real friends they can rely on in hard times As a result they turn to affairs alcohol and other self destructive behaviors Sadly millions of men suffer untreated depression In this groundbreaking and provocative book award winning clinical psychologist Thomas Joiner makes an impassioned call for society to recognize the harmful effects that solitude can have on men Drawing on original research done for the National Institute of Mental Health he focuses on the particular situations that leave men rudderless He offers advice on support systems that are most useful to men and he offers prescriptive advice on how men can improve their lives *Transforming the Character of Public Organizations* A. Carol Rusaw, 1998-01-26 From her own experience in various agencies and organizations Dr Rusaw knows that to inspire change in any organization and particularly in the public sector change agents must understand that change is primarily collective nonrational and nonlinear People who seek to create change cannot stand apart from the problems issues and concerns raised by their constituents but must merge themselves into the data making analysis and diagnosis phases of consulting The agent must in other words participate actively in creating change and how the agent must do this why and the effects the agent can expect are the subjects of Dr Rusaw s book Few books discuss public sector change in the way Dr Rusaw does here and none incorporate the phenomenological perspective that she uses Her book will appeal to practicing public administrators who seek real life examples presented in conversational language It will also be important for teachers and students in public administration specifically in courses in organizational behavior leadership organization theory human relations and public personnel management Not only can change agents help public employees serve the purposes set out for them more effectively and efficiently but by service and other efforts they can also help reverse the downward trend that has characterized the public sector in recent years Dr Rusaw maintains that such change is made possible by personal transformation certainly but also by interpersonal transformations By focusing on individual and group needs as keys to organizational change change agents can facilitate what is most needed not just localized alterations but widespread holistic transformations Her book looks at the role of healing particularly the inherent skills of listening empathizing and encouraging and at the ways in which people can confront and solve problems in negotiated environments She also sees that central to re education and re socialization is the quality of the change agent s inner person how well the agent is able to understand the role of self in the change process Her book provides ways in which agents can inspire others to change too In other words Dr Rusaw sees organizational change as a process moving from the inside to the outside and it is on this foundation that her unusual thoughtful and ultimately practical book is based **The Human Side of Management**
