The Heart Of England Oxford Paperbacks:

English Novel Hist 1895-1920 David Trotter, 2022-02-22 First Published in 1993 Written specifically for students and assuming no prior knowledge of the subject David Trotter's *The English Novel in History 1895 1920* provides the first detailed and fully comprehensive analysis of early twentieth century English fiction Whereas all previous studies have been rigorously selective Trotter looks at over 140 novelists across the whole spectrum of fiction from the innovations of Joyce's *Ulysses* through to popular mass market genres such as detective stories and spy thrillers By examining the novels in both stylistic and historical terms David Trotter looks at the ways in which writers responded to contemporary preoccupations such as the spectacle of consumption and the growth of suburbia or to anxieties about the decline of Empire racial degeneration and sexual anarchy He also challenges the view that literature of the period can be interpreted as a neat procession from realism to Modernism

Books and Prints at the Heart of the Catholic Reformation in the Low Countries (16th-17th Centuries) Renaud Adam, Rosa De Marco, Malcolm Walsby, 2022-10-24 Often considered the advent of mass media the use of books and prints by Protestants has been widely studied and has generated a rich and plentiful bibliography In contrast the production and use of the same media by the proponents of the Counter Reformation have not received the attention they deserve especially in the context of the Low Countries The twelve chapters in this volume provide new perspectives on the efficacy of the handpress book industry to support the Catholic strategy in the Spanish Low Countries and underline the mutually beneficial relationship between the Counter Reformation and the typographic world This volume represents an important contribution to our understanding of the sociocultural and socioeconomic background of the Catholic Netherlands

The Feeling Heart in Medieval and Early Modern Europe Katie Barclay, Bronwyn Reddan, 2019-12-02 The heart is an iconic symbol in the medieval and early modern European world In addition to being a physical organ it is a key conceptual device related to emotions cognition the self and identity and the body The heart is read as a metaphor for human desire and will and situated in opposition to or alongside reason and cognition In medieval and early modern Europe the feeling heart the heart as the site of emotion and emotional practices informed a broad range of art literature music heraldry medical texts and devotional and ritual practices This multidisciplinary collection brings together art historians literary scholars historians theologians and musicologists to highlight the range of meanings attached to the symbol of the heart the relationship between physical and metaphorical representations of the heart and the uses of the heart in the production of identities and communities in medieval and early modern Europe

The Heart of the Matter Wesley M. Collins, 2016-11-16 Can a culture have a theme that unifies seemingly unrelated practices In this volume Collins suggests that Maya Mam customs as different as constructing a house staying healthy seeking God disciplining children agreeing to a contract or just speaking the language all originate from the same concept a search for the center This is far more than mere balance long recognized as a Mayan cultural value Rather center space is a place of physical and metaphysical peace

acceptance meaning health happiness and home Collins also shows how cenderedness is deeply embedded in the grammar of Mam its lexicon morphology syntax and discourse structure This relatedness of Mam culture and linguistics provides an unusually detailed contribution to the debate on linguistic relativity and the Sapir Whorf hypothesis Collins combines historical accounts with firsthand ethnographic and linguistic methodology to explore the concept of centeredness Detailed accounts of his personal interaction with the Mam illustrate and enrich the book s concepts This volume will interest students of the relationship between language and culture generally and specifically those interested in the study of Maya of Mexico and Guatemala

Victorian Poetry and the Culture of the Heart Kirstie Blair,2006-04-27 Victorian Poetry and the Culture of the Heart is a significant and timely study of nineteenth century poetry and poetics It considers why and how the heart became a vital image in Victorian poetry and argues that the intense focus on heart imagery in many major Victorian poems highlights anxieties in this period about the ability of poetry to act upon its readers In the course of the nineteenth century this study argues increased doubt about the validity of feeling led to the depiction of the literary heart as alienated distant outside the control of mind and will This coincided with a notable rise in medical literature specifically concerned with the pathological heart and with the development of new techniques and instruments of investigation such as the stethoscope As poets feared for the health of their own hearts their poetry embodies concerns about a widespread culture of heartsickness in both form and content In addition concerns about the heart s status and actions reflect upon questions of religious faith and doubt and feed into issues of gender and nationalism This book argues that it is vital to understand how this wider culture of the heart informed poetry and was in turn influenced by poetic constructs Individual chapters on Barrett Browning Arnold and Tennyson explore the vital presence of the heart in major works by these poets including Aurora Leigh Empedocles on Etna In Memoriam and Maud while the wide ranging opening chapters present an argument for the mutual influence of poetry and physiology in the period and trace the development of new theories of rhythm as organic and affective

The English Catalogue of Books Published from January, 1835, to January, 1863 ,1864 **The Heart of Long Term Care** Rosalie A. Kane,Robert L. Kane,Richard C. Ladd,1998 Long term care in the United States has taken the nursing home as its benchmark but the monetary social and psychological costs of nursing home care are all too high This book challenges the current dominance of nursing homes as the principal institution of long term care It offers a series of alternative models where both services and housing can be provided in a way that allows long term consumers to enjoy dignified normal lifestyles It addresses the political and economic consequences of making this decision The authors start with the premise that long term care is designed to assist people who lack the capacity to function fully independently They argue that no disabled person of any age should be required to forsake his her humanity in exchange for care The book rejects the artificial dichotomy between social and medical care asserting that both play important roles in psychological and physical well being of long term care patients The authors consider the need for competent and compassionate medicine and discuss the

methods for improving both its coordination of care and its effectiveness The book redefines the meaning of safety and protection in long term care and how this goal can be accomplished without sacrificing quality of living As the new millennium and the aging of baby boomers approaches more creative approaches to providing better long term care are required This volume outlines a useful framework for the provision of effective and humane community based programs that are both feasible and affordable It will be an invaluable guide for geriatricians public health professionals family physicians nurses and others who care for elderly patients

The Particle Odyssey : A Journey to the Heart of the Matter Frank Close,Michael Marten,Christine Sutton,2002-07-25 The Particle Odyssey takes the reader on a spectacular illustrated journey to the heart of matter In clear non technical language the authors describe the key experiments and fundamental discoveries which have led to our current understanding of the matter that makes up the universe and the forces that govern it During the 20th century scientists discovered WHAT the Universe is made of as the 21st century begins they are preparing experiments to find out HOW it came to be like this This great adventure which will involve a metaphorical journey back in time to within a billionth of a second of the Big Bang is the latest stage in the quest to understand the nature of the matter that makes our Universe and the forces that govern it The Particle Odyssey takes the reader on a spectacularly illustrated journey to the heart of matter In clear non technical language the authors describe the key experiments and fundamental discoveries which have led to our current understanding of the origins and nature of the material universe There are individual portraits of all the major subatomic particles from the electron to the top quark The authors describe the history of experimental particle physics its origins in the discovery of X rays in 1895 the dissection of the atom by Rutherford and others the unexpected revelations of the cosmic rays the explosion of new particles in the 1950s and 60s the discovery of quarks and the rise of the standard model in the last part of the 20th century And they also look at the great challenges that face physicists today where did antimatter go what is dark matter can there be a theory of everything and the experiments they are devising to explore them The Particle Odyssey brings together and presents with style over 100 of the best images of particle events mysterious abstract often beautiful pictures of the tracks of subatomic particles as they speed curve dance or explode through cloud and bubble chambers stacks of photographic emulsion and the giant multi element detectors of modern experiments Here are spiralling electrons the tell tale vees of strange particles matter and antimatter born from raw energy energetic jets of particles spraying out from the decay points of quarks and gluons A further 250 pictures many taken specially for this book illustrate the laboratories experiments and personalities of over a century of particle physics
