The Foreign Policy Of Modern Japan Campus 196:

The Foreign Policy of Modern Japan Robert A. Scalapino, 2024-03-29 The Foreign Policy of Modern Japan presents a thorough exploration of Japan's foreign policy, a complex and ever-evolving subject. The volume is the result of a 1974 conference in Hawaii where scholars from both the United States and Japan gathered to discuss Japan's foreign policy from multiple perspectives. This compilation of essays offers insights into the decision-making process, economic influences, security issues, and the broader international environment shaping Japan's diplomatic strategies. Contributions are drawn from a range of scholars providing diverse viewpoints that highlight the multifaceted nature of Japan's international relations. The collection covers a broad spectrum of topics from the workings of Japan's Foreign Ministry and its diplomatic style to the influence of public opinion and business on foreign policy, as well as economic relations and security matters. The essays are divided into distinct sections that cover key aspects of Japan's foreign policy. The first examines the decision-making processes, analyzing the role of Japan's bureaucratic institutions and the Diet in policy formulation. Subsequent sections delve into Japan's public and private interests, economic policies, and security issues, while a final part offers an overview of Japan's evolving global position. The contributors emphasize the challenges Japan faces in balancing domestic pressures, historical context, and international realities. Despite Japan's successful postwar foreign policy, the essays suggest that Japan may be undergoing gradual changes in its foreign approach, particularly in response to shifts in global economic and political dynamics. The volume provides a nuanced understanding of the factors shaping Japan's foreign policy, highlighting both its stability and the potential for future transformation. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. The State, Identity, and the National Question in China and Japan Germaine A. Houston, 2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving

socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model
