It argues that brick making evolved alongside technological advancements and environmental adaptations. The book highlights intriguing facts such as how the Roman Empire standardized brick sizes for efficient construction and territorial expansion and how Mesopotamians used sun-baked bricks in early urban development. The book examines the evolution of brick making techniques from clay selection to firing and how they varied across cultures like Mesopotamia, Egypt, and the Roman Empire. It emphasizes the resourcefulness of ancient civilizations and their sustainable building practices connecting archaeology, materials science, and architectural history. Through archaeological findings and comparative analyses, the book illustrates diverse approaches to optimizing brick production. Ancient Brick Technologies begins by establishing a historical context, tracing the earliest evidence of brick usage and detailing the fundamental principles of brick production. It then delves into specific case studies, such as the sophisticated Roman brick industry and the use of adobe bricks in the Americas. The book progresses by examining how brick making evolved independently in different regions, offering insights into the social, economic, and environmental factors that shaped their development.      **Old Chinese** William H. Baxter, Laurent Sagart, 2014-09-02 This book introduces a new linguistic reconstruction of the phonology, morphology, and lexicon of Old Chinese, the first Sino-Tibetan language to be reduced to writing. Old Chinese is the language of the earliest Chinese classical texts (1st millennium BCE) and the ancestor of later varieties of Chinese, including all modern Chinese dialects. William Baxter and Laurent Sagart's new reconstruction of Old Chinese moves beyond earlier reconstructions by taking into account important new evidence that has recently become available: better documentation of Chinese dialects that preserve archaic features such as the Min and Wuxiang dialects; better documentation of languages with very early loanwords from Chinese such as the Hmong, Mien, Tai, Kadai, and Vietnamese languages; and a flood of Chinese manuscripts from the first millennium BCE excavated or discovered in the last several decades. Baxter and Sagart also incorporate recent advances in our understanding of the derivational processes that connect different words that have the same root. They expand our knowledge of Chinese etymology and identify for the first time phonological markers of pre-Han dialects such as the development of *r* to *j* in a group of east coast dialects but to *n* elsewhere. The most up-to-date reconstruction available. Old Chinese: A New Reconstruction brings the methodology of Old Chinese reconstruction closer to that of comparative reconstructions that have been used successfully in other language families. It is critical reading for anyone seeking an advanced understanding of Old Chinese.      *Collaborative Nationalism* Uradyn E. Bulag, 2010-07-16 Cosmopolitanism and friendship have become key themes for understanding ethnicity and nationalism. In this deeply original study of the Mongols, leading scholar Uradyn E. Bulag draws on these themes to develop a new concept he terms collaborative nationalism. He uses this concept to explore the paradoxical dilemma of minorities in China as they fight not against being

excluded but against being embraced too tightly in the bonds of friendship Going beyond traditional binary relationships he offers a unique triangular perspective that illuminates the complexity of regional interaction Thus Collaborative Nationalism traces the regional and global significance of the Mongols in the fierce competition among China Japan Mongolia and Russia to appropriate the Mongol heritage to buttress their own national identities The book considers a rich array of case studies that range from Chinggis Khan to reincarnate lamas from cadres to minority revolutionary history and from building the Mongolian working class to interethnic adoption So called friendship and collaboration permeate all of these arenas but Bulag digs below the surface to focus on the animosity and conflicts they both generate and mask Weighing the options the Mongols face he argues that the ethnopolitical is not so much about identity as it is about the capacity of an ethnic group to decide and organize its own vision of itself both within its community and in relation to other groups Nationalism he contends is collaborative at the same time that it is predicated on the pursuit of sovereignty
