Low vision rehabilitation is rapidly growing as a specialty practice for occupational therapists. This growth requires practical evidence-based information on the evaluation and treatment of the effects of low vision on occupational performance. Responding to this need, *Low Vision Rehabilitation: A Practical Guide for Occupational Therapists, Second Edition* blends standards of practice that have been developed for over 50 years by low vision therapists and optometrists with the latest scientific research and the unique perspective of occupational therapists. This text is written to introduce the student and general practitioner to low vision rehabilitation as commonly encountered in medical rehabilitation, as well as provides a conceptual approach to evaluation and treatment that will enrich an advanced practice. Authors: Stephen Whittaker, a low vision researcher, certified low vision therapist, and occupational therapist; Mitchell Scheiman, an optometrist and researcher; and Debra Sokol-McKay, an occupational therapist with specialty certification in low vision, as well as certification as a low vision therapist, vision rehabilitation therapist, and diabetes educator. They have carefully selected evidence-based evaluations and treatments that focus on clinical practicality and meaningful occupational goals in adults. New to the Second Edition: A focus on occupational performance using whatever works, whether visual, non-visual, or a combination of these different devices and adaptive techniques; The EPIC Framework, a general strategy to organize a treatment plan for daily activities using visual and non-visual techniques; Access to a companion website designed as a handy clinical reference with solutions to clinical problems, easily searchable and cross-linked to related content; The Success-Oriented Approach to interventions based on the most recent research on cognitive disability and depression associated with low vision; Applications of the latest electronic

accessibility devices including smartphones tablets and magnifiers that read aloud Incorporates the AADE TM 7 Self Care Behavior framework of the American Association of Diabetes Educators Incorporates concepts from the latest edition of the AOTA Occupational Therapy Practice Framework Domain and Process A chapter devoted to field loss spatial neglect and perceptual impairments resulting from acquired brain injury The latest in Medicare documentation standards including outcome to G code conversions and ICD 10 diagnostic coding for low vision Assessing Reading J. Charles Alderson,2000-02-24 This book is the most comprehensive and up to date treatment of the assessment of reading in a foreign or second language *The Psychology of Reading* Mildred C. Robeck,Randall R. Wallace,2017-11-06 The need to know why as well as how children and youth respond as they do to reading instruction has guided the selection of this book s content The second edition of this title originally published in 1990 has retained and elaborated upon the three major themes previously presented that reading is a linguistic process that motivation the affective domain may be as important in learning to read as the cognitive domain and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored The text integrates views from cognitive psychology psycholinguistics and neuropsychology as they relate to reading and writing A learning motivation model is provided to present associative learning conceptualization and self directed reading in a hierarchical relationship with distinct cognitive and affective components The distinction between beginning and proficient reading is maintained throughout the text
