Study Of Religion In Colleges And Universitieshc1970:

Fifty Years of Religious Studies in Canada Harold Coward, 2014-11-07 In Canadian universities in the early 1960s no courses were offered on Hinduism Buddhism or Islam Only the study of Christianity was available usually in a theology program in a church college or seminary Today almost every university in North America has a religious studies department that offers courses on Western and Eastern religions as well as religion in general Harold Coward addresses this change in this memoir of his forty five year career in the development of religious studies as a new academic field in Canada He also addresses the shift from theology classes in seminaries to non sectarian religious studies faculties of arts and humanities the birth and growth of departments across Canada from the 1960s to the present the contribution of McMaster University to religious studies in Canada and Coward s Ph D experience there the Centre for Studies in Religion and Society at the University of Victoria and the future of religious studies as a truly interdisciplinary enterprise Coward s retrospective while not a history as such documents information from his varied experience and wide network of colleagues that is essential for a future formal history of the discipline His story is both personally engaging and richly informative about the development of the field

Religion in a Pluralistic Society J.S. Pabee, 2023-08-28 [Encyclopedia of the American Religious Experience](#) Charles H. Lippy, 1988 Contains 105 essays that examine the role of religion in North American society from the time of Native American tribal cultures to the age of the electronic church Organized by topic with cross references bibliographies and a detailed index

Why Study Religion? Richard Brian Miller, 2021 Why Study Religion offers an alternative framework Critical Humanism for thinking about the purposes of the discipline Richard B Miller theorizes about the ends rather than the means of humanistic scholarship He argues that the future of religious studies will depend on how well it can articulate its goals as a basis for motivating scholarship in the field

The Study of Religion in Colleges and Universities Paul Ramsey, John Frederick Wilson, 2015-03-08 The study of religion traditionally sponsored by sectarian institutions has within recent decades come to claim an increasingly larger share of attention in colleges and universities generally and in the process the constituent intellectual disciplines have undergone significant changes In this volume twelve distinguished scholars take stock of the current state of the field and explore the prospects for future development The areas covered in the essays with their authors are biblical studies Stendhal Western religious history Clebsch philosophy of religion Diamond theology McGill Catholic studies Preller Jewish studies Neusner sociology of religion Harrison comparative religious ethics Little history of religions Sullivan religion and art Turner and religion and literature Driver A practical commentary on the current state of the field Gustafson concludes the volume Taken together the essays provide an overview of the subject matter of religion study that should enable scholars of religion to situate and define their own work while helping others to appreciate the claims that work has upon the resources and concerns of colleges and universities Originally published in 1970 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of

print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Secularization in the Long 1960s Clive D. Field, 2017-03-16 *Secularization in the Long 1960s* Numerating Religion in Britain provides a major empirical contribution to the literature of secularization It moves beyond the now largely sterile and theoretical debates about the validity of the secularization thesis or paradigm Combining historical and social scientific perspectives Clive D Field uses a wide range of quantitative sources to probe the extent and pace of religious change in Britain during the long 1960s In most cases data is presented for the years 1955-80 with particular attention to the methodological and other challenges posed by each source type Following an introductory chapter which reviews the historiography introduces the sources and defines the chronological and other parameters Field provides evidence for all major facets of religious belonging behaving and believing as well as for institutional church measures The work engages with and largely refutes Callum G Brown's influential assertion that Britain experienced revolutionary secularization in the 1960s which was highly gendered in nature and with 1963 the major tipping point Instead a more nuanced picture emerges with some religious indicators in crisis others continuing on an existing downward trajectory and yet others remaining stable Building on previous research by the author and other scholars and rejecting recent proponents of counter secularization the long 1960s are ultimately located within the context of a longstanding gradualist and still ongoing process of secularization in Britain

Vanderbilt Divinity School Dale A. Johnson, 2001 The Vanderbilt Divinity School is one of only four university based interdenominational institutions in the United States and the only one in the South As such its history provides a distinct vantage point for viewing what has occurred in theological education since the latter part of the nineteenth century In this book the contributors explore the school's history in terms of four main themes Engagement with southern culture present from the beginnings of the university but taking on special significance in the mid twentieth century around the issue of race The transition from an institution of the church Methodist to an independent and interdenominational school with a liberal Protestant orientation The development of the modern research university evident in the establishment of a graduate program in religion in addition to its program for the profession of ministry From the 1950s a growing concern with diversity and inclusivity in keeping with national and international issues and developments both religious and cultural which has broadened the school's sense of ecumenism and deepened its commitments to social justice Conflict has played an important part in shaping the history of the Vanderbilt Divinity School from struggles over initial visions to questions of financial support and institutional control from local debates over academic freedom to national issues of social justice Especially noteworthy are the transformations the school has undergone since 1960 the James Lawson affair where the divinity school faculty resigned over the expulsion of an African

American graduate student who was organizing local lunch counter sit ins the impact of social change on the school since the late 1960s and the contributions of women and African Americans including their appointment to the faculty
