**Skyscrapers** Matthew Wells, 2005-01-01 An investigation of thirty skyscrapers from around the world both recently built and under construction that explains the structural principles behind their creation *Manhattan Skyscrapers* Eric Nash, 1999-08 The city of New York is the city of skyscrapers Every first time visitor to Manhattan experiences the awe of gazing up at the soaring stone steel and glass towers of Wall Street or Midtown and wonders how those structures came to be built *Manhattan Skyscrapers* answers the question by presenting the 75 most significant tall buildings that make up the city's famous skyline From Louis Sullivan's Bayard Condict Building of 1898 on Bleeker Street to the Conde Nast tower currently rising above Times Square *Manhattan Skyscrapers* lavishly presents over a hundred years of New York's most interesting and important tall buildings Author Eric P Nash profiles familiar skyscrapers such as the Woolworth Building the Empire State Building the Chrysler Building the World Trade Towers the AT also included are quotes from the buildings architects and the architectural critics of the time Each skyscraper is illustrated with full page color photographs by noted photographer Norman McGrath as well as architectural drawings and plans archival images of the original interiors postcards and other ephemera *Manhattan Skyscrapers* is essential reading or an ideal gift for anyone interested in the buildings that make New York the ultimate skyscraper city *Skyscrapers* Matthew Wells, 2005 An investigation of thirty skyscrapers from around the world both recently built and under construction that explains the structural principles behind their creation High-rise Manual Johann Eisele, Ellen Kloft, 2003 What constitutes a high rise building A high rise is in fact any building with more than 9 storeys and not just those striking skyscrapers which shape modern city skylines In the past architects who designed such structures used to be the exception but in the last 10 years more and more architectural offices have begun to focus on this type of building However the sheer complexity of designing and planning the construction of a high rise as opposed to other building types requires a wealth of specialized experience and expertise *The High Rise Manual* is the first comprehensive reference work on this subject All relevant aspects of such an undertaking are examined in detail by some 24 specialist authors Each step is extensively documented including the initial project planning the building organisation the laying of the foundations the supporting structure the building technology the office design and the Facility Management Theoretical contributions present the basic principles of select **Designing Tall Buildings** Mark Sarkisian, 2012-03-22 The first of its kind *Designing Tall Buildings* is an accessible reference that guides you through the fundamental principles of designing high rises Each chapter focuses on one theme central to tall building design giving you a comprehensive overview of the related architecture and structural engineering concepts Mark P Sarkisian provides clear definitions of technical terms and introduces important equations to help you gradually develop your knowledge Later chapters allow you to explore more complex applications such as biomimicry Projects drawn from Skidmore Owings and Merrill's vast catalog of built high rises many of which Sarkisian designed demonstrate these concepts This book advises you

to consider the influence of a particular site's geology, wind conditions and seismicity. Using this contextual knowledge and analysis, you can determine what types of structural solutions are best suited for a tower on that site. You can then conceptualize and devise efficient structural systems that are not only safe but also constructible and economical. Sarkisian also addresses the influence of nature in design, urging you to integrate structure and architecture for buildings of superior performance, sustainability and aesthetic excellence.

**The Skyscraper and the City** Lynn S. Beedle, Mir M. Ali, Paul J. Armstrong, 2007.
