Sixty Years Of Southwestern Archaeology:

60 Sixty Years of Southwestern Archaeology Richard Benjamin Woodbury, 1993 Seldom in scientific history has an informal gathering of researchers had such an immediate impact and continuing influence on a profession as the Pecos Conference Begun by A V Kidder in 1927 it was the first regional archaeology conference in the United States and soon became an annual event Its history reflects the development of archaeological aims and theories of major federal programs and of mitigation and contract archaeology Although this unique meeting has never had formal memberships dues treasury permanent officers or headquarters it continues to bind Southwestern archaeologists together yearly in dynamic and vigorous dialogue Richard B Woodbury s study details the archaeological activity that was reported over the years at the Pecos Conference Partly an institutional history the book is also a lively record of regional archaeology and its role in the development of the field and its practitioners Through years of research and participation in the conference Woodbury has amassed a wealth of unpublished data correspondence and photographs that will make this the definitive history of the conference

Pushing Boundaries in Southwestern Archaeology Stephen E. Nash, Erin L. Baxter, 2023-04-07 Pushing Boundaries in Southwestern Archaeology draws together the proceedings from the sixteenth biennial Southwest Symposium In exploring the conference theme contributors consider

topics ranging from the resuscitation of archaeomagnetic dating to the issue of Athapaskan origins from collections based studies of social identity foodways and obsidian trade to the origins of a rock art tradition and the challenges of a deeply buried archaeological record The first of the volume s four sections examines the status history and prospects of Bears Ears National Monument the broader regulatory and political boundaries that complicate the nature and integrity of the archaeological record and the cultural contexts and legal stakes of archaeological inquiry The second section focuses on chronological big data in the context of pre Columbian history and the potential and limits of what can be empirically derived from chronometric analysis of the past The chapters in the third section advocate for advancing collections based research focusing on the vast and often untapped research potential of archives previously excavated museum collections and legacy data The final section examines the permeable boundaries involved in Plains Pueblo interactions obvious in the archaeological record but long in need of analysis interpretation and explanation Contributors James R Allison Erin Baxter Benjamin A Bellorado Katelyn J Bishop Eric Blinman J Royce Cox J Andrew Darling Kaitlyn E Davis William H Doelle B Sunday Eiselt Leigh Anne Ellison Josh Ewing Samantha G Fladd Gary M Feinman Jeffrey R Ferguson Severin Fowles Willie Grayeyes Matthew Guebard Saul L Hedquist Greg Hodgins Lucas Hoedl John W Ives Nicholas Kessler Terry Knight Michael W Lindeman Hannah V Mattson Myles R Miller Lindsay Montgomery Stephen E Nash Sarah Oas Jill Onken Scott G Ortman Danielle J Riebe John Ruple Will G Russell Octavius Seowtewa Deni J Seymour James M Vint Adam S Watson

BOOK JACKET Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research

Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research. **Science**

in the American Southwest George Ernest Webb, 2002-07 What began as a colony of the eastern scientific establishment soon became a self-sustaining scientific community. **BOOK JACKET Anthropology at Harvard** David L.

Browman, Stephen Williams, 2013-07-15 The history of anthropology at Harvard is told through vignettes about the people famous and obscure who shaped the discipline at Harvard College and the Peabody Museum. The role of amateurs and private funders in the early growth of the field is highlighted, as is the participation of women and of students and scholars of diverse ethnicities. *Thirty Years Into Yesterday* Jefferson Reid, Stephanie Whittlesey, 2015-11-01 For thirty years the

University of Arizona Archaeological Field School at Grasshopper, a 500-room Mogollon pueblo located on what is today the Fort Apache Indian Reservation in Arizona, probed the past, taught scholars of international repute, and generated controversy. This book offers an extraordinary window into a changing American archaeology and three different research programs as they confronted the same pueblo ruin. Like the enigmatic Mogollon culture it sought to explore, the earlier University of Arizona field schools in the Forestdale Valley and at Point of Pines Grasshopper research engendered decades of controversy that still lingers in the pages of professional journals. Jefferson Reid and Stephanie Whittlesey, players in the controversy who are intimately familiar with the field school that ended in 1992, offer a historical account of this major archaeological project and the intellectual debates it fostered. *Thirty Years Into Yesterday* charts the development of the Grasshopper program under three directors and through three periods dominated by distinct archaeological paradigms: culture history, processual archaeology, and behavioral archaeology. It examines the contributions made each season, the concepts and methods each paradigm used, and the successes and failures of each. The book transcends the interests of southwestern archaeologists in demonstrating how the three archaeological paradigms reinterpreted Grasshopper, illustrating larger shifts in American archaeology as a whole. Such an opportunity will not come again as funding constraints, ethical concerns, and other issues no doubt will preclude repeating the Grasshopper experience in our lifetimes. Ultimately, *Thirty Years Into Yesterday* continues the telling of the Grasshopper story that was begun in the authors' previous books. In telling the story of the archaeologists who recovered the material residue of past Mogollon lives and the place of the Western Apache people in their interpretations, *Thirty Years Into Yesterday* brings the story full circle to a stunning conclusion. **Correlative Archaeology**

Fumi Arakawa, 2022-06-02 In *Correlative Archaeology*, Fumi Arakawa applies correlative thinking practices which are derived from an East Asian view of the world that stresses connectivity to archaeological interpretations. Arakawa, a Japanese scholar who was trained in Western archaeology, argues that a correlative paradigm can help archaeologists as well as scholars and researchers from other disciplines consider competing paradigms and integrate Native American voices and narratives into

interpretations of prehistoric art and landscapes Hinterlands and Regional Dynamics in the Ancient Southwest Alan P. Whittlesey *The Bioarchaeology of Social Control* Ryan P. Harrod, 2017-09-20 Taking a bioarchaeological approach this book examines the Ancestral Pueblo culture living in the Four Corners region of the United States during the late Pueblo I through the end of the Pueblo III period AD 850 1300 During this time a vast system of pueblo villages spread throughout the region creating what has been called the Chaco Phenomenon named after the large great houses in Chaco Canyon that are thought to have been centers of control Through a bioarchaeological analysis of the human skeletal remains this volume provides evidence that key individuals within the hierarchical social structure used a variety of methods of social control including structural violence to maintain their power over the interconnected communities Theodore E. White and the Development of Zooarchaeology in North America R. Lee Lyman, 2016-07-01 Theodore E White and the Development of Zooarchaeology in North America illuminates the researcher and his lasting contribution to a field that has largely ignored him in its history The few brief histories of North American zooarchaeology suggest that Paul W Parmalee John E Guilday Elizabeth S Wing and Stanley J Olsen laid the foundation of the field Only occasionally is Theodore White 1905 77 included yet his research is instrumental for understanding the development of zooarchaeology in North America R Lee Lyman works to fill these gaps in the historical record and revisits some of White s analytical innovations from a modern perspective A comparison of publications shows that not only were White s zooarchaeological articles first in print in archaeological venues but that he was also at least initially more prolific than his contemporaries While the other founders of the field were anthropologists White was a paleontologist by training who studied long extinct animals and their evolutionary histories In working with remains of modern mammals the typical paleontological research questions were off the table simply because the animals under study were too recent And yet White demonstrated clearly that scholars could infer significant information about human behaviors and cultures Lyman presents a biography of Theodore White as a scientist and a pioneer in the emerging field of modern anthropological zooarchaeology In the Aftermath of Migration Anna A. Neuzil, 2016-12-15 The Safford and Aravaipa valleys of Arizona have always lingered in the wings of Southwestern archaeology away from the spotlight held by the more thoroughly studied Tucson and Phoenix Basins the Mogollon Rim area and the Colorado Plateau Yet these two valleys hold intriguing clues to understanding the social processes particularly migration and the interaction it engenders that led to the coalescence of ancient populations throughout the Greater Southwest in the fourteenth and fifteenth centuries A D Because the Safford and Aravaipa valleys show cultural influences from diverse areas of the pre Hispanic Southwest particularly the Phoenix Basin the Mogollon Rim and the Kayenta and Tusayan region they serve as a microcosm of many of the social changes that occurred in other areas of the Southwest during this time This research explores the social changes that took place in the Safford and Aravaipa valleys during the thirteenth through the fifteenth centuries A D as a result of an influx of migrants from the Kayenta and Tusayan regions of northeastern Arizona Focusing on domestic architecture and ceramics the author evaluates how migration affects the expression of identity of both migrant and

indigenous populations in the Safford and Aravaipa valleys and provides a model for research in other areas where migration played an important role Archaeologists interested in the Greater Southwest will find a wealth of information on these little known valleys that provides contextualization for this important and intriguing time period and those interested in migration in the ancient past will find a useful case study that goes beyond identifying incidents of migration to understanding its long lasting implications for both migrants and the local people they impacted The Sociopolitical Structure Of Prehistoric Southwestern Societies Steadman Upham,Kent G Lightfoot,Roberta A. Jewett,2019-06-26 This book examines current archaeological approaches for studying the organizational structure of prehistoric societies in the American Southwest It presents the historical background of the divergent theoretical models that have been used to interpret Southwestern socio political organizations
