Modeling of Natural Circulation and Forced Circulation BWRs Masahiro Furuya,2006 20% of the Nuclear Power Plants are known as Boiling Water Reactors BWRs These BWRs have pumps that cool their reactor In the design of new BWRs ways to cool the core by a natural circulation flow without pumps also called natural circulation BWRs are being considered In these new systems a chimney is installed on top of the core to increase natural circulation flow A possible disadvantage of natural circulation BWRs might be their susceptibility to instabilities which could then lead to both flow and power oscillations The stability features of both natural circulation and forced circulation BWRs have been investigated thoroughly using dedicated experimental setups analytical models and numerical codes We distinguish between pure thermal hydraulic stability where the fission power is assumed to be constant and coupled thermalhydraulic neutronic stability where the two phase mixture in the core influences the fission chain reaction *Boiling* Yasuo Koizumi,Masahiro Shoji,Masanori

Monde,Yasuyuki Takata,Niro Nagai,2017-06-22 Boiling Research and Advances presents the latest developments and improvements in the technologies instrumentation and equipment surrounding boiling Presented by the Japan Society of Mechanical Engineers the book takes a holistic approach first providing principles and then numerous practical applications that consider size scales Through six chapters the book covers contributed sections from knowledgeable specialists on various topics ranging from outlining boiling phenomena and heat transfer characteristics to the numerical simulation of liquid gas two phase flow It summarizes in a single volume the state of the art in boiling heat transfer and provides a valuable resource for thermal engineers and practitioners working in the thermal sciences and thermal engineering Explores the most recent advancements in boiling research and technology from the last twenty years Provides section content written by contributing experts in their respective research areas Shares research being conducted and advancements being made on
