Education Liora Bresler, David Cooper, Joy Palmer, 2002-09-11 *Fifty Modern Thinkers on Education* looks at fifty of the twentieth century's most significant contributors to the debate on education. Among those included are Pierre Bourdieu, Elliot Eisner, Hans J. Eysenck, Michel Foucault, Henry Giroux, Jürgen Habermas, Susan Isaacs, A. S. Neill, Herbert Read, Simone Weil. Together with *Fifty Major Thinkers on Education*, this book provides a unique history of educational thinking. Each essay gives key biographical information, an outline of the individual's principal achievements and activities, an assessment of his or her impact and influence, and a list of their major writings and suggested further reading. *Handbook of Critical and Indigenous Methodologies* Norman K. Denzin, Yvonna S. Lincoln, Linda Tuhiwai Smith, 2008-05-07 Built on the foundation of their landmark *Handbook of Qualitative Research*, it extends beyond the investigation of qualitative inquiry itself to explore the indigenous and non-indigenous voices that inform research, policy, politics, and social justice. Curriculum, Environment, and the Work of C. A. Bowers Audrey Dentith, David Flinders, John Lupinacci, Jennifer Thom, 2021-06-28 This edited volume extends ecological approaches to curriculum theory by recognizing and building on the contributions of the late Chet A. Bowers to curriculum and ecological studies globally. Chapters provide in-depth explanation of Bowers' central contributions to the field, including his identification of the linguistic roots of ecological degradation, the need for school curricula to support sustainability, and the principles of cultural commons, eco justice, and ecological intelligence. Building on these ideas and emphasizing the links between curriculum studies, social justice, and environmental education, the text illustrates how Bowers' ideas must now inform future approaches to schooling, teacher education, research, and Indigenous communities to guard against the global ecological crises we now face. This text will benefit researchers, academics, and educators with an interest in curriculum studies, sustainability, education, and environmental studies, in particular. Those interested in the sociology of education, educational change, and school reform will also benefit from the book. Critical Ethnography, Language, Race/ism and Education Stephen May, Blanca Caldas, 2022-11-22 This book provides a contemporary overview of work in critical ethnography that focuses on language and race/ism in education, as well as cutting-edge examples of recent critical ethnographic studies addressing these issues. The studies in this book, while centred primarily on the North American context, have wide international significance and interdisciplinary reach and address a range of educational contexts across K-12 education and less formal educational settings. They explore the racialized construction, positioning, and experiences of bi-multilingual students and the implications of this for educational policy, pedagogy, and practice. The chapters draw on a range of critical theoretical perspectives, including CRT, LatCrit, Indigenous epistemologies, and bilingual education; they also address significant methodological questions that arise when undertaking critical ethnographic work, including the key issues of positionality and critical reflexivity. **Recalibrating teacher training in African higher education institutions** Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically examines the role of governments in promoting parity during and in post-pandemic education. This comes from the realisation that the pandemic

has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark *Inner-City Schools, Multiculturalism, and Teacher Education* Frederick L. Yeo, 2013-04-03 Focusing on the causes for the continuing marginalization of minority children this book examines inner city education its teaching practices curricular rationales perspectives of teachers and students and the institutions themselves
