Toys, Tools & Teachers Marge Cambre, Mark Hawkes, 2004. Here, Cambre and Hawkes offer a framework for thinking about technology as it impacts teaching and learning today. *Toys, Tools & Teachers* takes a hard look at the benefits and the trade-offs of a technology-saturated education. The authors look at technology through a trifocal lens: as teaching aid, as a threat, and as progress. They also explore ways in which technology can significantly impact education through distance learning, networking, and wireless technologies. This book is a reflection on technology and a review of the footprint of technology on children's toys and the tools teachers and students have available for teaching and learning. As today's students are bombarded with things technological, school administrators and teachers are challenged on a daily basis to acquire up-to-date technologies and use them wisely in the teaching, learning, and testing process. Educators and parents are urged to discern the positive and negative effects of technology and make appropriate choices for their charges. Researchers are challenged to devise strategies for demonstrating the effectiveness of technology and for pointing the way to better methods of integrating technology so that no child is left behind. Will be of interest to parents, school board members, and educators.
