Effective Teaching in Schools

Theory and Practice

The book shows us that effective practice is not that far from the reality of what is often done, but it is not a simple matter of copying what is done. It is a matter of understanding the reasons why it works, and then applying that understanding to our own practice. The book is a guide to the theory and practice of effective teaching, and it is a guide to the theory and practice of effective learning. It is a guide to the theory and practice of effective teaching and learning, and it is a guide to the theory and practice of effective teaching and learning.

Chris Kyriacou is
Professor of Education,
University of York

The first edition of this extremely successful book has been thoroughly updated to take account of changes in policy and practice, and includes material which addresses the new professional standards for qualified teacher status (QTS) and beyond. The book also addresses the needs of those undertaking teacher education and all other initial teacher training programmes. The book is a guide to the theory and practice of effective teaching, and it is a guide to the theory and practice of effective learning. It is a guide to the theory and practice of effective teaching and learning, and it is a guide to the theory and practice of effective teaching and learning.

The second edition has taken particular account of developments in personalised learning, the use of ICT, interactive learning, classroom strategies, inclusion, assessment for learning, evidence-based classroom practice, the Every Child Matters agenda, and the teaching methods underpinning the National Strategies.

Dr Chris Kyriacou is Reader in Educational Psychology at the Department of Educational Studies, University of York, and is also the author of three other books published by Nelson Thornes.
