Teaching Children With Autism Strategies To Enhance Communication And Socialization:

Teaching Children with Autism and Related Spectrum Disorders Christy Magnusen, 2005-07-15 Based on 25 years of working with children with ASDs Magnusen contends that teachers who can blend the science of education methodology with the art of teaching are best able to reach these children She takes a fresh look at established and more recent teaching methods and then explores why when and how these techniques should be applied *Teaching Children with Autism* Kathleen Ann Quill, 1995 This book describes teaching strategies and instructional adaptations which promote communication and socialization in children with autism It offers specific strategies that capitalize on the individual strengths and learning styles of the autistic child The TEACCH Approach to Autism Spectrum Disorders Gary B. Mesibov, Victoria Shea, Eric Schopler, 2010-02-23 TEACCH Treatment and Education of Autistic and related Communication handicapped CHildren has grown over the past three decades from a small clinic for children to an internationally recognized treatment and support modality for individuals of all ages with autism spectrum disorders In The TEACCH Approach to Autism Spectrum Disorders the program s founders and their colleagues explain its methods and philosophy based on an understanding and respect for the culture of autism The TEACCH program focuses on persons with autism and the development of instruction and supports based on each individual s skills interests and needs It draws from the research literature in psychology and neuropsychology to create activities and environments that are organized to emphasize meaningfulness an approach that has proved crucial to an autistic individual s ability to learn comprehend and apply learning across situations The TEACCH Approach to Autism Spectrum Disorders explains how TEACCH targets critical areas in executive functioning engagement communication and social skills Strategies can be tailored to an individual s unique developmental and functional level Parents become involved in all phases of intervention as collaborators cotherapists and advocates The program can be introduced and adapted for individuals of all ages from preschool children to adults Professionals can be trained in the program and its methods This progressive program offers individuals with autism their families teachers and therapists both optimism and useful strategies without minimizing the condition or its effects All clinicians working with people with autism will find The TEACCH Approach to Autistic Spectrum Disorders a valuable resource Autism Robin L. Gabriels, Dina E. Hill, 2002-01-01 Despite an increase in the awareness of autism families and professionals continue to struggle to find treatments that will fulfil the individual needs of their child From Research to Individualized Practice bridges the gap between the latest research findings and clinical practice The authors have brought together information from both fields in order to offer the reader best practice principles and hands on techniques These are all exemplified by clinical case examples and vivid illustrations Helping Children with Autism Become More Social Ann E. Densmore, 2007-08-30 Autism has been identified as the fastest growing serious developmental disability in the United States where nearly 2 million people are affected One of the most frustrating aspects of autism and similar disorders is that affected

children affected do not interact with others and often seem unaware of the people and the environment around them. Therapist Densmore takes us with her as she works in a remarkable program she has developed to lead such children into the social world. Allowing readers to look over her shoulder during sessions, Densmore explains Narrative Play, her approach to inspiring social contact. The work includes interviews with parents of children with autism and will be of wide interest to professionals, teachers, parents, and family members who can use the approach to help a child move into the social world. The book and the theory it promulgates will also interest students of psychology, special education, pediatrics, neurology, and speech. Autism has now reached epidemic proportions. It has been identified as the fastest growing serious developmental disability in the United States where nearly 2 million people are affected. For parents, therapists, and teachers, one of the most frustrating aspects of autism and similar disorders is that children affected are not social. They do not interact with others, even parents and siblings, and often seem unaware of the people and environment around them. In this work, therapist Ann E. Densmore takes us with her as she works with children with autism in a remarkable program she has developed to lead such children into the social world. They travel to farms, ponds, playgrounds, and other natural settings where they interact with peers and siblings, and with the novel therapist whose play therapy has brought remarkable results for many children. Using a conversational style that allows readers to look over her shoulder during sessions, Densmore explains her approach to inspiring social contact. Narrative Play: A child moves through four stages in this approach, finally combining language play and narrative skills to interact with others. The work includes interviews with parents of children with autism and will be of wide interest to professionals, teachers, parents, and family members who can use this approach to help a child move into the social world. This work and the theory it promulgates will also interest students of psychology, special education, pediatrics, neurology, and speech.

Educating Young Children with Autism Spectrum Disorders Erin E. Barton, Beth Harn, 2014-01-07. According to the CDC, one in fifty American children is diagnosed as having an autism spectrum disorder. This means more school-aged children are entering classrooms with ASDs, and teachers are being called upon to help facilitate their learning. *Educating Young Children with Autism Spectrum Disorders* is aimed at providing strategies for teachers, school counselors, and psychologists to help address the needs of children on the spectrum, as well as their families. Erin E. Barton and Beth Harn draw on current research and practices to discuss the possible causes of autism and to help prepare educators not only for teaching children in the classroom but also for providing families with the tools necessary to continue the educational process at home. Included are topics such as Improving communication and socialization, Developing instructive lessons, Assessing students' progress, Including families in educational goals, Finding students' special interests, and using those to help facilitate learning, Managing challenging behavior, and more. Including forms, charts, and a range of classroom activities, this is the only resource you will need to gain the insight and tools for making a difference in the educational lives of young children with autism.
