Soft CLIL and English Language Teaching Makoto Ikeda, Shinichi Izumi, Yoshinori Watanabe, Richard Pinner, Matthew Davis, 2021-08-24 Content and Language Integrated Learning CLIL is a

transformative and powerful approach to language education and has had a significant impact on educational pedagogy in recent years. Despite burgeoning literature on the efficacy and implementation of CLIL, there remains a gap between CLIL and English Language Teaching (ELT). Many practitioners wonder how they can do CLIL if their main classes are focused on English as a Foreign Language (EFL). This volume addresses these concerns by examining the experiences of various CLIL practitioners in the EFL context of Japan. Chapters outline the CLIL methodology, the differences in hard CLIL (subject led) and soft CLIL (language oriented), before focusing on the EFL interpretations of soft CLIL. Although the distinction of hard CLIL and soft CLIL has been mentioned in several publications, this is the first book length exploration of this issue featuring chapters examining expectations, challenges, material support, implementation, and even motivation in CLIL classrooms. All of this culminates in a review of the potential and future of CLIL in EFL contexts, paving the way for more widespread and well informed implementation of CLIL all over the world.

The resulting book provides a forward looking perspective on how the EHEA is evolving in response to current challenges and opportunities by focusing on topics such as internationalization, equity and employability, fundamental values, impact of digitalization or innovative learning and teaching. The papers presented offer insights in these areas, illustrating successful or failed implementations within the EHEA and are published in open access format to ensure that the researchers' perspectives are widely available to European policy and decision makers. Since 2024 marks the first post pandemic edition of the Conference, it is a good moment to not only take stock of the challenges brought by the Covid 19 pandemic and the war in Ukraine but also to explore how scientific research can support policy in shaping the directions for the future to come.
