Education, Philosophy and the Ethical Environment Graham Haydon,2006-09-27 How much can we reasonably expect from education This book written by a philosopher of education casts new light on this question by seeing values education not as a separate activity within schools but as an aspect of education that both reflects the surrounding climate of values and can help to change it Graham Haydon argues that all of us whether as teachers parents students or citizens share in a responsibility for the quality of that ethical environment He argues that we must ensure that what happens in schools will enable young people to appreciate the diversity of our ethical environment help them find their way through its complexities contribute to developing a climate of values that is desirable for all This book shows that values education is too demanding to be left to parents and too important to be entrusted to government initiatives For teachers engaged in values education this book brings a fresh perspective to what they are doing within a realistic view of their responsibilities For students of education it shows that practical issues can be illuminated by insights from philosophy *A Theory of Moral Education* Michael Hand,2017-11-14 Children must be taught morality They must be taught to recognise the authority of moral standards and to understand what makes them authoritative But there s a problem the content and justification of morality are matters of reasonable disagreement among reasonable people This makes it hard to see how educators can secure children s commitment to moral standards without indoctrinating them In *A Theory of Moral Education* Michael Hand tackles this problem head on He sets out to show that moral education can and should be fully rational It is true that many moral standards and justificatory theories are controversial and educators have an obligation to teach these nondirectively with the aim of enabling children to form their own considered views But reasonable moral disagreement does not go all the way down some basic moral standards are robustly justified and these should be taught directly with the aim of bringing children to recognise and understand their authority This is an original and important contribution to the philosophy of moral education which lays a new theoretical foundation for the urgent practical task of teaching right from wrong **Education**

and Practice Joseph Dunne,Pádraig Hogan,2004-08-06 This volume explores the distinctiveness of teaching and learning as a human undertaking and the nature and scope of the philosophy of education An investigation of the distinctiveness of teaching and learning as a human undertaking Provides fresh thinking on the nature and scope of the philosophy of education Draws on the original insights of an international group of experts in philosophy and education Includes an interview on education with Alasdair MacIntyre together with searching investigations of his views by other contributors
