Platonic Political Art John R. Wallach, 2010-11-01 In this first comprehensive treatment of Plato's political thought in a long time John Wallach offers a critical historicist interpretation of Plato. Wallach shows how Plato's theory while a radical critique of the conventional ethical and political practice of his own era can be seen as having the potential for contributing to democratic discourse about ethics and politics today. The author argues that Plato articulates and solves his Socratic Problem in his various dialogues in different but potentially complementary ways. The book effectively extracts Plato from the straightjacket of Platonism and from the interpretive perspectives of the past fifty years principally those of Karl Popper, Leo Strauss, Hannah Arendt, M. I. Finley, Jacques Derrida, and Gregory Vlastos. The author's distinctive approach for understanding Plato and he argues for the history of political theory in general can inform contemporary theorizing about democracy opening pathways for criticizing democracy on behalf of virtue, justice, and democracy itself.

Techne Theory Henry Staten, 2019-02-21 Only since the Romantic period has art been understood in terms of an ineffable aesthetic quality of things like poems, paintings, and sculptures and the art maker as endowed with an inexplicable power of creation. From the Greeks to the 18th century art was conceived as techne, the skill and know-how by which things and states of affairs are ordered. Techne Theory shows how to use this concept to cut through the Romantic notion of art as a kind of magic by returning to the original sense of art as techne, the standpoint of the person who actually knows how to make a work of art. Understood as techne, art making like all other cultural accomplishments is a form of work performed by an artisan who has inherited the know-how of previous generations of artisans. Along the way Techne Theory cuts through the humanist structuralist impasse over the question of artistic agency and explains what form really means.

Four Historical Definitions of Architecture Stephen Parcell, 2012 Definitions of architecture and other disciplines from ancient Greece to the eighteenth century.

Intersecting Art and Technology in Practice Camille C. Baker, Kate Sicchio, 2016-12-19 This book focuses on the artistic process, creativity, and collaboration and personal approaches to creation and ideation in making digital and electronic technology-based art. Less interested in the outcome itself, the artefact, artwork, or performance, contributors instead highlight the emotional, intellectual, intuitive, instinctive, and step-by-step creation dimensions. They aim to shine a light on digital and electronic art practice involving coding, electronic gadgetry, and technology mixed with other forms of more established media to uncover the practice as research processes required as well as the collaborative aspects of art and technology practice.

Selecting and Implementing Technologies in Libraries Tod Colegrove, 2022-09-14 New technology and services are fundamental to maintaining the relevance of libraries today, but which technologies and/or services make sense to implement and which to avoid? Building from a framework drawn in the overlap of design thinking with best practices in emerging technology and library practice, this book is a go-to guide for the active library practitioner and LIS student alike. From the 3D printers and laser cutters of today's library makerspace to collection development and library outreach, this

primer offers clear examples that illustrate the practical and collaborative approach that ensures alignment and increases the likelihood of success Written as a textbook for LIS students in the crossover areas of emerging technology design thinking and library management the book will also meet the needs of the active library practitioner in public academic and special libraries both those new to the field and seasoned professionals The practical treatment and examples provided will be of interest and immediate use Questions at the end of each chapter give readers an opportunity to think about the concepts presented The book is also designed to let the enduring values of librarianship and library practice shine through guiding the reader to navigate the future of library technology Topographies of the Sacred Catherine E. Rigby, 2004 Although the British romantic poets notably Blake Wordsworth and Byron have been the subjects of previous ecocritical examinations this text compares English and German literary models of romanticism *Rhetoric and Poetics in Antiquity* Jeffrey Walker, 2000-07-13 This book offers a counter traditional account of the history of both rhetoric and poetics In reply to traditional rhetorical histories which view rhetoric primarily as an art of practical civic oratory the book argues in four extended essays that epideictic poetic eloquence was central even fundamental to the rhetorical tradition in antiquity In essence Jeffrey Walker's study accomplishes what in the world of rhetoric studies amounts to a revolution he demonstrates that in antiquity rhetoric and poetry could not be viewed separately Greek and Latin Roots of Medical and Scientific Terminologies Todd A. Writing Borderless Histories of Art Claire Farago, 2025-06-30 Writing Borderless Histories of Art is an aspirational historical and critical project that offers a fundamental rethinking of the relationship of humans to the rest of nature Social justice Indigeneity abuses of power and the environmental crisis are the burning issues of today A transcultural approach calls for abandoning structures of domination that are built into the academic disciplines regardless of the scale or extent of interpretation Drawing upon writings from a wide range of fields Claire Farago argues that Art History can play a role in advancing the public s interconnectedness with the planetary life support system that so urgently needs to be restored Studying the discourse on art at the intersection of global capitalism environmental degradation and human subjection over four centuries Writing Borderless Histories of Art advocates ontologies that do not distinguish between the sentience of humans and other animals and go beyond the dualistic metaphysics of the nature culture divide While this book is addressed to a wide audience its multilayered approach also reaches out to art historians for whom chronology canons and style are structures fundamental to the organization and operation of the discipline The book is neither a history of ideas nor a search for the origins of art history but a recognition of the structures that drive its narratives

Art of the Modern Age Jean-Marie Schaeffer, 2000 This view encouraged theorists to consider artistic geniuses the high priests of humanity creators of works that reveal the invisible essence of the world
