

Desert reclamation techniques

The term desert usually refers to areas that, in addition to being extremely dry, have high daytime temperatures, particularly in the summer. Many scientists also consider polar regions to be deserts, since they are arid and sustain little or no vegetation.

Deserts occupy between 15 and 20 per cent of the earth's land area. They usually receive less than 10 inches (250 mm) of precipitation yearly. Precipitation, usually rain, tends to come in a few heavy storms of short duration. Deserts are often bordered by semiarid areas.

Andrew Goudie

Techniques For Desert Reclamation:

Techniques for Desert Reclamation Andrew Goudie,1990 Techniques for Desert Reclamation Edited by Andrew S Goudie School of Geography University of Oxford Major world environmental issues such as the degradation of deserts and their margins are covered in this book Unlike many volumes which merely analyse the causes and consequences of desertification this book concentrates on the methods that are available to contend with some of the main symptoms of desert degradation These symptoms include soil erosion by wind soil erosion by water salinization loss of tree and shrub cover the loss of animal resources and the depletion of water resources If the utility stability and diversity of arid environments is to be maintained then the techniques described in this book will need to be employed The book is global in perspective and is written by academics and consultants with long continued and diverse experience of desert environments It attempts to present techniques for desert reclamation in a concise comprehensive and accessible way and assumes no technical expertise in the reader

Soil Management Michael A Fullen,John A Catt,2014-04-04 The soil is a fundamental constituent of the Earth s system maintaining a careful state of equilibrium within the biosphere However this natural balance is being increasingly disturbed by a variety of anthropogenic and natural processes leading to the degradation of many soil environments Soil Management provides a comprehensive and authoritative introduction to the many problems challenges and potential solutions facing soil management in the twenty first century Covering a range of topics including erosion desertification salinization soil structure carbon sequestration acidification and chemical pollution the book also develops a prognosis for the future of soil management in the face of growing populations and global warming Written with the needs of students in mind each chapter provides a broad overview of a problem analyses approaches to its solution and concludes with references and suggestions for further reading Soil Management will be of great value to environmental science and geography undergraduates taking soil management courses in their second or third year

Greening the Sands: Bioengineered Ecosystems for Desert Reclamation S Williams,2025-04-12 In an era defined by the escalating challenges of climate change and land degradation Greening the Sands emerges as a groundbreaking exploration into combating desertification through innovative bioengineered ecosystems This book delves deep into the alarming trends of land degradation water scarcity and the urgent need for arid region restoration offering actionable solutions that blend cutting edge science with ethical responsibility From understanding the principles of ecological engineering such as hydroponics microbial inoculation and the use of drought resistant plants to implementing tailored strategies across iconic deserts like the Sahara Gobi and Atacama this work provides a comprehensive roadmap to reclaiming degraded lands It examines transformative technologies such as solar powered irrigation systems artificial wetlands and drone seeded vegetation showcasing how these innovations can revolutionize desert reclamation efforts But beyond the technical lies the human element The book tackles critical debates on indigenous land rights equitable resource allocation and the societal

implications of altering fragile ecosystems By addressing socio political barriers technological limitations and the importance of public awareness it charts a path toward integrating bioengineered ecosystems into community driven initiatives for long term impact Through the lens of Kantian ethics readers are guided to consider fairness inclusivity and universal values in fostering trust and accountability Legal frameworks governing sustainability and environmental governance are outlined ensuring that progress aligns with both empirical evidence and moral imperatives Ultimately Greening the Sands envisions a future where deserts are not wastelands but thriving biodiverse regions Blending insights from soil restoration techniques climate adaptation strategies and innovative approaches to water conservation this book is a beacon of hope for policymakers scientists activists and communities striving to restore balance to our planet s most arid corners Whether you re searching for answers to combat global desertification trends or seeking inspiration for sustainable innovation this is your definitive guide to creating resilient ecosystems while respecting the delicate harmony of nature

Restoration and Rehabilitation of the Desert Environment N. Al-Awadhi,M.T. Balba,C. Kamizawa,2012-12-02 These proceedings contain technical papers presented at the Kuwait Japan Symposium on Restoration and Rehabilitation of the Desert Environment which was held in Kuwait on 3 4 March 1996 Kuwait was selected as the site for this fourth symposium because of its enormous need for restoring and rehabilitating its desert environment and because of the progress which Kuwait and Japan have been making collectively in these efforts at both pilot and field scale levels Kuwait s desert land has recently suffered from one of the worst man made disasters of all time having been polluted with vast amounts of oil from the nearly 7000 oil wells that were destroyed during the Gulf War The three themes for the symposium were remediation of the polluted soil enhancement of the visual impact of greenery and recycling of wastewater for rehabilitation purposes The first theme was highlighted with presentations on the KISR PEC Oil Lake Beds Remediation Project The second theme was launched with a broad based discussion on new strategies and alternatives for greening the desert and a summary of the Kuwait National Greenery Plan which is now being prepared The third theme featured presentations on water resource management in Japan and in KISR s Reverse Osmosis Project to make municipal wastewater recyclable for greenery use in densely populated areas The closing session culminated in perspectives and recommendations from both Kuwait and Japan and with a historical summary of the long standing Kuwait Japan Collaborative Program

Desert Olive Oil Cultivation Zeev Wiesman,2009-06-24 Due to the adverse stress conditions typical of olive cultivation in desert conditions the olive tree is responding with production of high levels of antioxidant substances Among these substances are polyphenols tocopherols and phytosterols Studies have shown that saline irrigated varieties of olives have demonstrated advantages over those irrigated with tap water This is just one of the aspects of desert cultivation of olives that is covered in Desert Olive Oil Advanced Biotechnologies Based on 20 years of research the book expounds on the appropriate selection of olive varieties with high productivity and oil quality the impact of foliar nutrition on decreasing alternate bearing and increasing fruit quality improving efficiency of mechanical harvesting

and increasing efficiency of oil extraction and oil quality regulating analysis Addresses olive cultivation methods for semi arid environments Focuses on intensive cultivation using saline and municipal waste recycled irrigation water and their significant impact on the production and nutritional value of olive oil Integrated and multidisciplinary approaches providing a comprehensive view of the desert olive industry Provides key considerations including ecological biotechnological agricultural and political impacts

The Impact of Desert Dust Across the Mediterranean Stefano Guerzoni,R.

Chester, 2013-04-17 The atmosphere is an important pathway for the transport of continentally derived material to the oceans. In this respect the Mediterranean Sea is of special importance because its atmosphere receives inputs of anthropogenic aerosols from the north and desert derived Saharan dusts from the south. The dusts, much of which is transported in the form of seasonal pulses, have important effects on climate, marine chemistry and sedimentation in the Mediterranean Sea. This volume brings together reviews and specific topic papers on the following aspects of Saharan dust transport to the Mediterranean Sea: i the modelling of Saharan dust transport; ii the chemistry and mineralogy of the dusts and their effect on precipitation; iii the contribution of the dusts to marine sedimentation; iv the aerobiology of the dusts; and v climatic implications of Saharan dust transport. The volume is aimed at students and researchers with an interest in the climate, biogeochemistry and geology of the Mediterranean Sea.
