The Greening Of Us Foreign Policy:

U.S. Foreign Policy Donald M. Snow, Patrick J. Haney, 2017-08-02 *U S Foreign Policy Back to the Water s Edge* is based on the old idea that despite domestic differences and party politics Americans should unite at the water s edge and present a cohesive front to a hostile world The fifth edition explores this theme through coverage of the Trump administration its early policies and how Trump s initiatives fit into the broader historical patterns of foreign policy in the United States More compact than most of its competitors the fifth edition packs necessary information and concepts into a lean but readable format It contains rich historical content providing the reader with snapshots of some of the truly classic highlights and lowlights of America s record in foreign affairs Written with the student reader in mind each chapter offers several pedagogical aids designed to reinforce and extend comprehension of the material This text is also accompanied by a companion reader *Regional Cases in Foreign Policy Second Edition* was written by Don Snow with the specific intention of providing material and perspectives not contained in the text The reader contains fourteen mini cases that can accompany classroom discussions or lectures on subjects as diverse as relations with Russia Israel or the Islamic State specific questions like the border fence with Mexico U S Cuban relations or the British withdrawal from the European Union Brexit Case examples are drawn from all parts of the world

The Greening of Sovereignty in World Politics Karen Litfin, 1998 This is the first book to connect two important subfields in international relations global environmental politics and the study of sovereignty the state s exclusive authority within its territorial boundaries The authors argue that the relationship between environmental practices and sovereignty is by no means straightforward and in fact elucidates some of the core issues and challenges in world politics today Although a number of international relations scholars have assumed that transnational environmental organizations and institutions are eroding sovereignty this book makes the case that ecological integrity and state sovereignty are not necessarily in opposition It shows that the norms of sovereignty are now shifting in the face of attempts to cope with ecological destruction but that this greening of sovereignty is an uneven variegated and highly contested process By establishing that sovereignty is a socially constructed institution that varies according to time and place with multiple meanings and changing practices *The Greening of Sovereignty in World Politics* illuminates the complexity of the relationship between sovereignty and environmental matters and casts both in a new light Contributors Daniel Deudney Margaret Scully Granzeier Joseph Henri Jupille Sheldon Kamieniecki Thom Kuehls Ronnie D Lipschutz Karen T Litfin Marian A L Miller Ronald B Mitchell Paul Wapner Veronica Ward Franke Wilmer

based on the objective of national interest and national security
