The photograph from the air of the University of Montreal built 1928-1945 on Mount Royal by Quebec-born Architect Engineer Ernest Cormier 1885-1980 trained in Paris That whole period was very important for developing the Province of Quebec The building was built on the north side of the Mountain with the enormous old cemetery easily visible and the St. Lawrence river just visible on the other side Today such a photograph would no longer be so striking the whole area has many more impressive buildings and enormous trees cover the area We lived a ten minute walk away from the bottom left hand corner of the picture in Outremont the francophone counterpart of Anglophone Westmount two miles or so to the west The head office of Family Medicine was situated close to and just to the west of the big tower It is from there that the Bethune-Chinese connection was established I was at the UofM from 1975-1995 It was by far the most productive period of our professional lives
