The Great American College Tuition Ripoff:

The Great American College Tuition Rip-off Paul Streitz, 2005-03 This book is an examination of why American colleges and universities have extraordinarily high tuitions and why those tuitions grow faster than the rate of inflation It examines Hamilton College showing trends in tuition number of faculty comparison to non elite colleges and other information It examines the role that U S News and World Reports plays in increasing college tuition It determines that college tuitions are not set by the actual costs of running a college rather they are set by how much money an institution can obtain It shows the dramatic increases in the number of faculty administrators and staff It shows the proliferation of courses and extra curricular programs unnecessary for an education The book determines that the financial objective of colleges and universities is to spend as much money as possible with no sense of cost consciousness or the impact of higher tuitions on students The institutions then raise tuition and ask for more money from the alumni Tuitions are not set by costs but by demand It concludes that parents and students must organize into Parent Student Associations and make tuition a matter of collective bargaining

The Great Rip-Off in American Education Mel Scarlett, 2012-04-30 This hard hitting critique will serve as a wake up call to university administrators and faculty as well as to the average parent or prospective college student facing ever increasing tuition costs While reports of poor teaching at the elementary and secondary school level have unleashed widespread public outcry for reform little attention has been paid to the quality of teaching in colleges and universities Yet according to the National Commission on Educating Undergraduates in the Research University universities have too often failed and continue to fail their undergraduate populations and the students paying the tuition get in all too many cases less than their money's worth Citing this report and other similar studies experienced university administrator Dr Mel Scarlett criticizes the deficits of the current undergraduate educational system and suggests improvements that would ensure that college students get the education they're paying for Among his suggestions for reform are Renewed emphasis on teaching skills in Ph D programs to ensure that those who do teach have some pedagogical training besides their special expertise The more active role of experienced professors in the teaching of undergraduates to reverse the current trend of using graduate assistants or part time faculty to teach lower level courses Encouraging students active participation in the learning process as opposed to the passive learning model of the lecture method An adjustment of the university's publish or perish reward system which stresses research and ignores teaching Dr Scarlett lists a total of 20 deadly sins committed by universities against undergraduates and 80 improvements that would help to reform the current inadequate higher educational system

The Great American Jobs Scam Greg LeRoy, 2005-07-21 For the past 20 years corporations have been receiving huge tax breaks and subsidies in the name of jobs jobs jobs But as Greg LeRoy demonstrates in this important new book it's become a costly scam Playing states and communities off against each other in a bidding war for jobs corporations reduce their taxes to next to nothing and win subsidy packages that routinely exceed 100 000 per job But the subsidies come with few strings

attached So companies feel free to provide fewer jobs or none at all or even outsource and lay people off They are also free to pay poverty wages without health care or other benefits All too often communities lose twice They lose jobs or gain jobs so low paying they do nothing to help the community and lose revenue due to the huge corporate tax breaks That means fewer resources for maintaining schools public services and infrastructure In the end the local governments that were hoping for economic revitalization are actually worse off They re forced to raise taxes on struggling small businesses and working families or reduce services or both Greg LeRoy uses up to the minute examples naming names including Wal Mart Raytheon Fidelity Bank of America Dell and Boeing to reveal how the process works He shows how carefully corporations orchestrate the bidding wars between states and communities He exposes shadowy site location consultants who play both sides against the middle and he dissects government and corporate mumbo jumbo with plain talk The book concludes by offering common sense reforms that will give taxpayers powerful new tools to deter future abuses and redirect taxpayer investments in ways that will really pay off
