Functions and Uses of

Disciplinary Histories Loren Graham, Wolf Lepenies, P. Weingart, 1983-07-31 Edward Gibbon's allegation at the beginning of his *Essay on the Study of Literature* 1764 that the history of empires is that of the miseries of humankind whereas the history of the sciences is that of their splendour and happiness has for a long time been accepted by professional scientists and by historians of science alike For its practitioner the history of a discipline displayed above all the always difficult but finally rewarding approach to a truth which was incorporated in the discipline in its actual form Looking back it was only too easy to distinguish those who erred and heretics in the field from the few forerunners of true science On the one hand the traditional history of science was told as a story of hero and hero worship on the other hand it was paradoxically enough the constant attempt to remind the scientist whom he should better forget It is not surprising at all therefore that the traditional history of science was a field of only minor interest for the practitioner of a distinct scientific discipline or specialty and at the same time a hardly challenging task for the professional historian Nietzsche had already described the historian of science as someone who arrives late after harvest time it is somebody who is only a tolerated guest at the thanksgiving dinner of the scientific community

Annals of Theoretical Psychology Hans van Rappard, Pieter J. van Strien, Leendert P. Mos, William J. Baker, 2013-11-11 This volume and its companion to be published as Volume 9 in the *Annals* series had their origin in a visit by the first editor to our Center in 1983 a year prior to our initiating publication of the *Annals* Some three years later Hans Rappard formally proposed to edit together with the historian of psychology in the Netherlands Pieter van Strien an *Annals* volume devoted to history and theory Rappard emphasized however that it was to be not just a volume on the relation between history of psychology and theoretical psychology but rather a volume on the relevance of history to theory or psychology in general In other words how and what could doing history contribute to theoretical problems that face contemporary psychology Another four years passed before commitments from the twenty seven contributors were received The plan was to publish a single volume devoted to history and theory however the length of six major papers eighteen commentaries and replies to commentaries necessitated a decision to publish the manuscript in two volumes It was not an easy decision especially as the contributors and editors had achieved an integrity of theme and content that is unusual for edited volumes Moreover in view of the manuscript's long past we felt little inclination to extend its history

Psychology from the Standpoint of the Subject Andrew Boreham, Klaus Holzkamp, Tod Sloan, 2013-01-23 This book introduces the groundbreaking work of the German critical psychologist Klaus Holzkamp In contrast to contemporary psychology's worldlessness the writings present a concept of psychology based on the individual's relations to the world and open up new perspectives on human subjectivity agency and the conduct of everyday life

Critical Theories of Psychological Development John M. Broughton, 2013-06-29 Something instructive occurred in the process of entitling the present

collection Both editor and publisher sought a simple and succinct rubric for the various pieces of work But they rapidly and reluctantly reached the consensus that by either intellectual or marketing criteria the insertion of the adjective psychological to qualify the noun development was a communicative necessity Much to the chagrin of the developmental psychologist the term development still connotes to the world at large as well as the general community of publishers librarians and computer archivists the modernization of nation states Inside and outside the university I find that when asked What are you interested in I am not at liberty to reply The concept of development without being absorbed immediately into a discussion of Third World studies The approach of the present volume should be taken as an exhortation to psychologists to take the genealogy of development seriously The history of the discipline is not so different from the history of the word and as we shall discover the concern with developmental progress cannot easily be separated from the urge for dominion This volume presents a selection from the recent critical scholarship on psychological development The emphasis is on rethinking the field of developmental psychology at the level of theory *Ecolinguistics Reader* Alwin Fill, Peter Mühlhäusler, 2006-05-01 Thirty years ago a new linguistic paradigm was created when Einar Haugen for the first time combined language with ecology For Haugen the ecology of language meant the study of the interrelations between languages in the human mind and in the multilingual community Since then a special branch of linguistics named ecolinguistics has developed in which the connection between language and ecology has been established in a variety of ways and by using a multitude of methods and approaches This reader contains important articles from all the different fields of ecolinguistics a volume long overdue for a discipline now recognized as a significant contribution to variety within the subject *Problems of Theoretical Psychology* International Society for Theoretical Psychology. Conference, 1996 **Social Action and Human Nature** Axel Honneth, Hans Joas, 1988 **Social Theory and Human Reality** Pertti Alasuutari, 2004-09-01 This is a smart and compelling book Difficult ideas are presented in an accessible manner with plenty of supporting illustrations Students will enjoy the research material and other supporting material A definite winner Professor Jay Gubrium University of Missouri This book gets to the heart of what the social sciences really know about the elusive and contradictory object of research human reality Drawing on a wide range of international examples and scenarios Social Theory and Human Reality examines key sociological concepts that we use to understand human behaviour such as norms rules and meanings language and discourse ritual and personality and identity construction Alasuutari clearly and convincingly demonstrates The constant interplay between routines and reflexivity that grounds social order how the body and our bodily experiences mediate our social reality that language plays a multifaceted role as it describes reflects and constructs human reality Building on the work started by Berger and Luckmann in *The Social Construction of Reality* this book is a lucid and contemporary analysis of the premises shared across the social sciences and of the kaleidoscope of human reality This important book will be welcomed by students and scholars alike in the fields of Cultural Studies Sociology and Anthropology
